This notice may also be viewed at <http://www.verizon.com/about/terms-conditions/network-disclosures>

Description of the Planned Network Change(s):

Verizon intends to remove Nokia Multi-Customer Optical Network Terminal (MC-ONT) equipment from its fiber network at all locations in the sixty-three (63) wire centers listed above. MC-ONT equipment is currently used to provide voice, video, and data services for customer locations in multi-tenant buildings in the above wire centers. Verizon is removing MC-ONT equipment because the platform is in a “manufacturer-discontinued” status. This status may impair the timely maintenance or repair of existing MC-ONT facilities. As a replacement technology, Verizon will deploy Nokia Single Family Unit Optical Network Terminal (SFU-ONT) equipment.

Description of Reasonably Foreseeable Impact(s) of the Planned Change(s):

The same services offered over the MC-ONT platform will continue to be offered over the SFU-ONT platform. Verizon wholesale customers reselling services provided on an MC-ONT platform may be asked to assist with scheduling the migration appointment with their end users. To help ensure an orderly transition, Verizon may require customers and interconnecting entities to assist with scheduling end-user migrations well before the MC-ONT implementation date.
