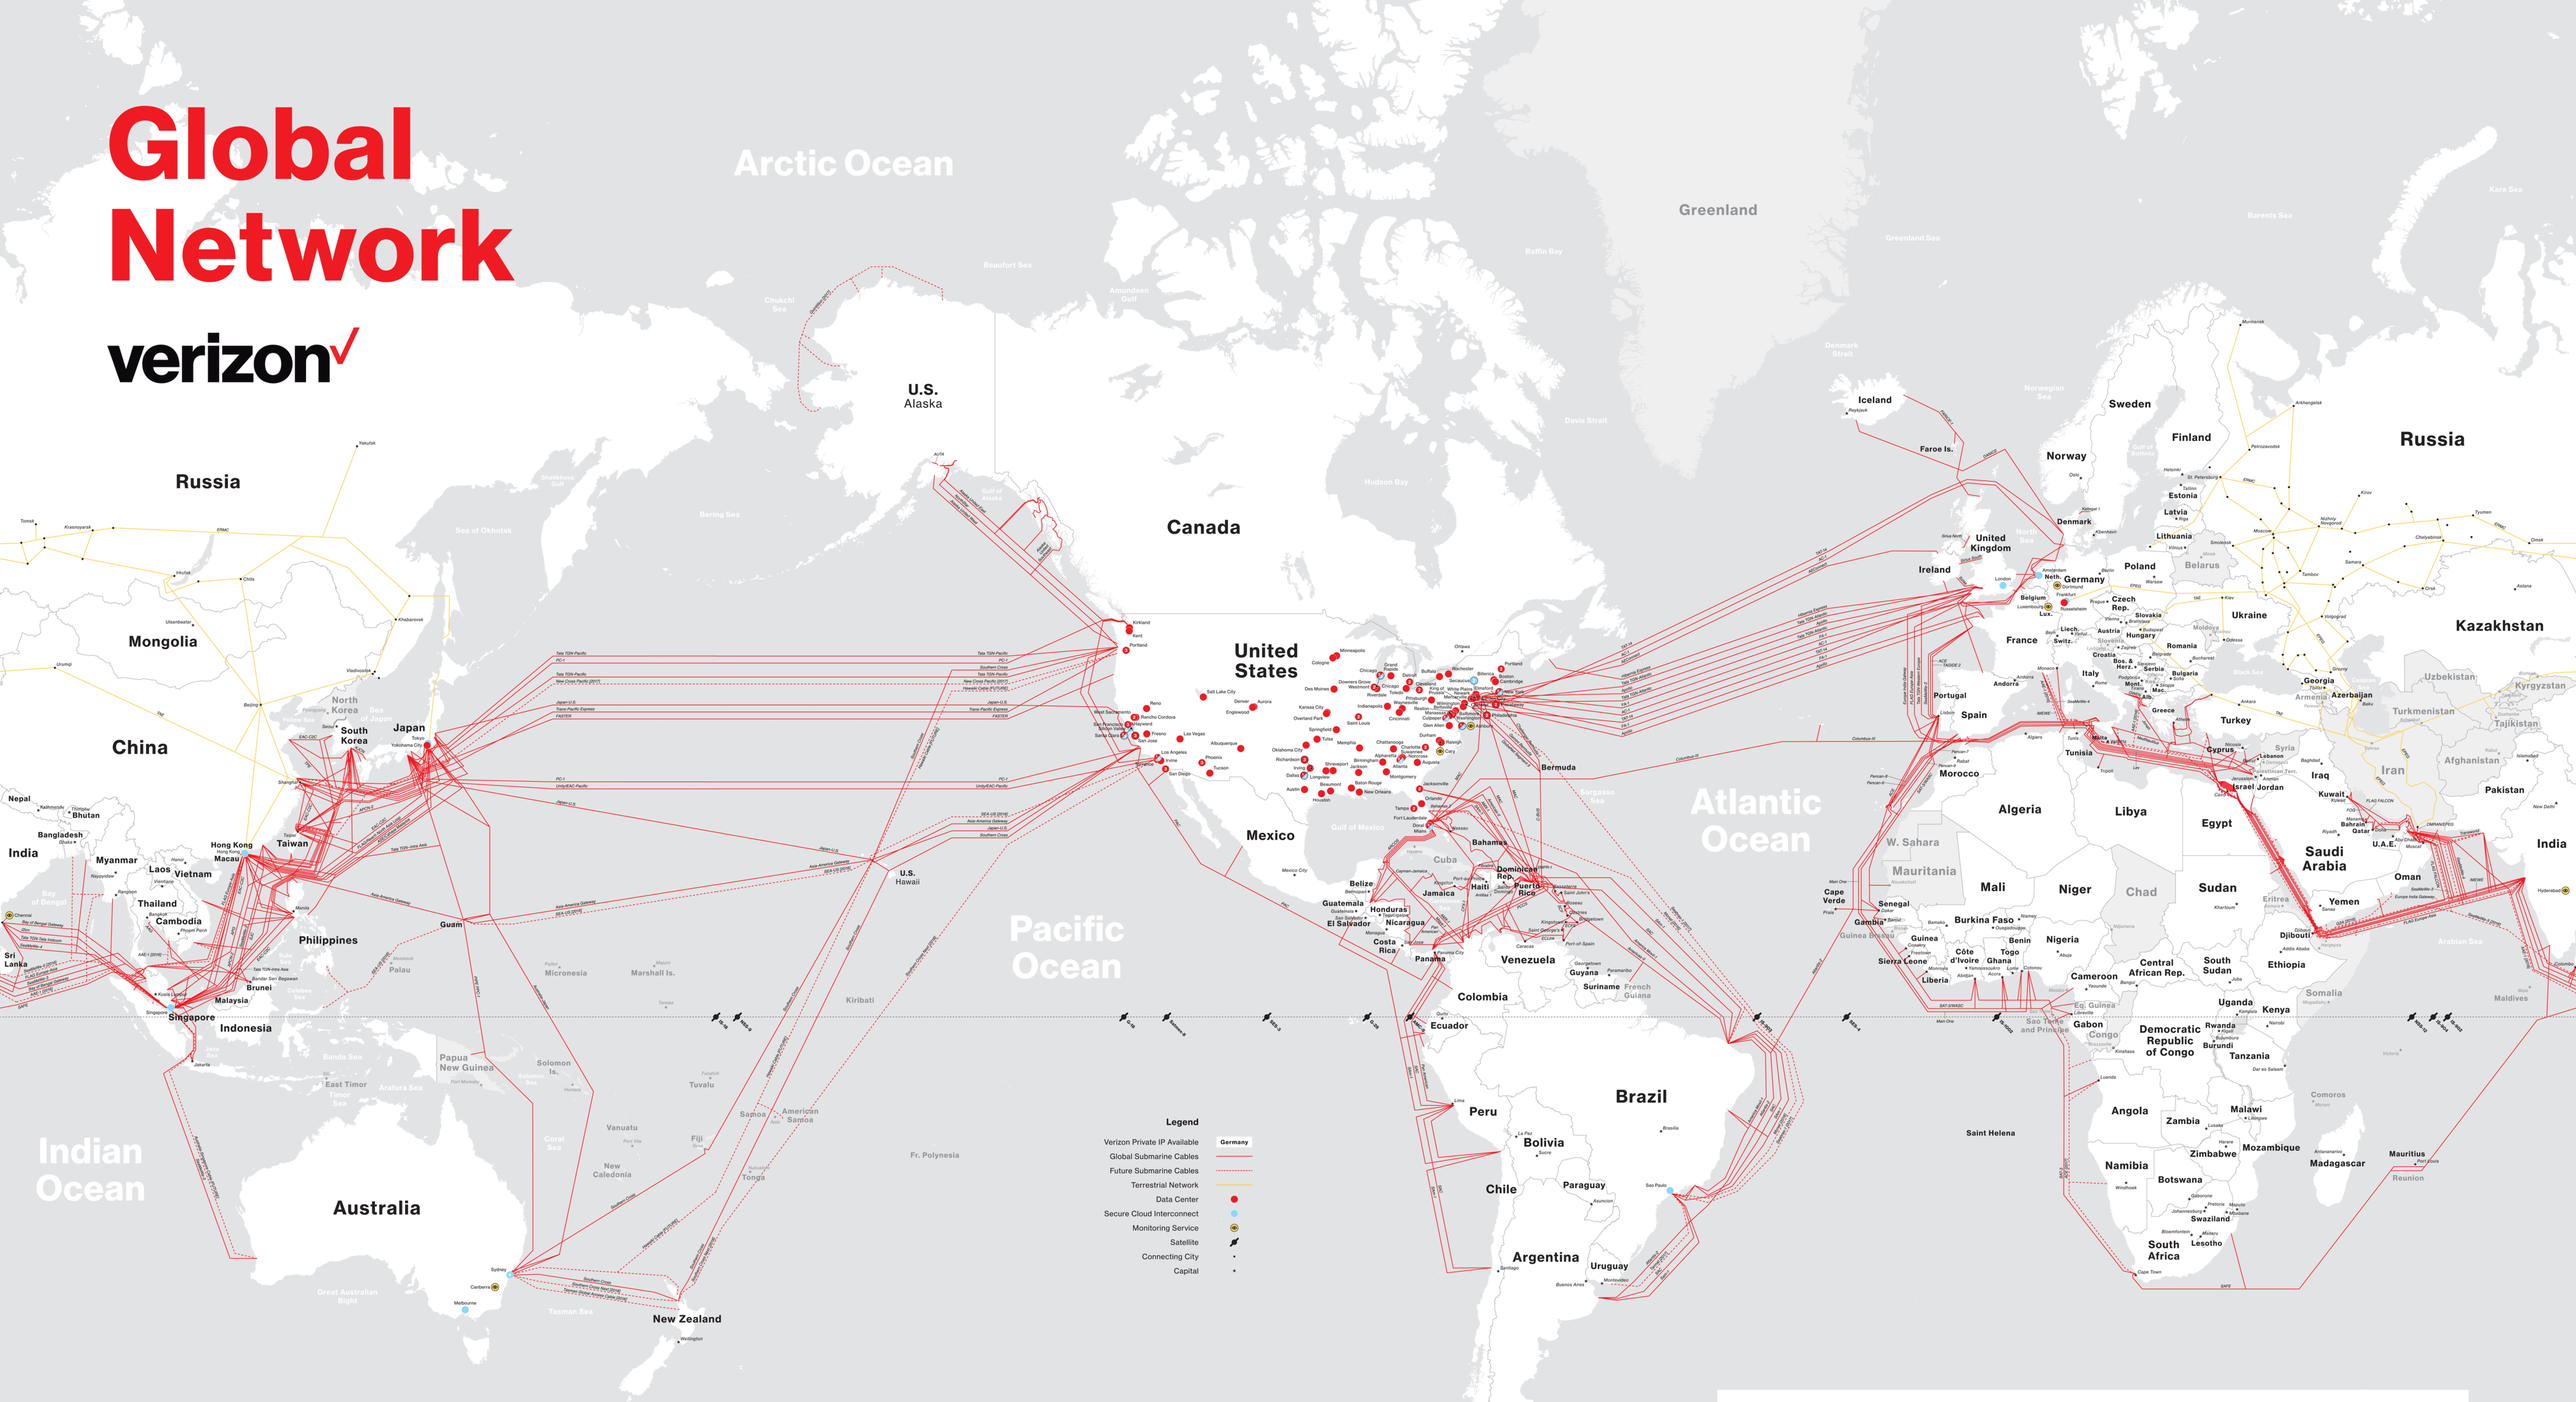
Global Network

verizon



Powerful global networks

Securely connect your systems, machines, information, ideas, and people to help accelerate business performance and transform the way you work.

- State-of-the-art fiber-optic network
- Blazing fast backbone: Up to 40Gbps, (up to 100Gbps on select routes)
- Reaches more than 2,700 cities in more than 150 countries
- Hundreds of thousands of route miles, including terrestrial and undersea cable, spanning six continents

Submarine cable network system

Stay connected and business-focused around the world and around the clock.

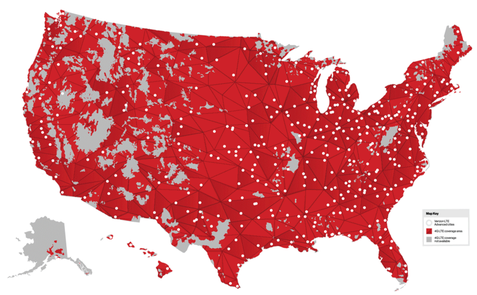
- More than 80 submarine cable networks worldwide carry IP, data, and voice traffic
- Mesh network provides multiple, diverse paths across the Atlantic and Pacific, offering automatic service restoration and high availability
- Multiple diverse paths for voice and data traffic reliability

Cloud and data center solutions

Make your business more efficient, responsive, and competitive through secure and reliable data center and cloud solutions – all supported by leading expertise.

- Over 50 Data Centers, including managed hosting and colocation centers, in 20 countries around the world
- Five Global Network Operations Centers in the U.S., Europe, and Asia
- Seven Security Operations Centers on 4 continents, offering continuous security monitoring and management

Verizon LTE Advance covers more than 450 cities in America from coast to coast.



Important Map Information:

This map does not guarantee coverage. This map depicts predicted and approximate wireless coverage, and may contain areas with limited or no service. Even within a coverage area, there may be "dead spots" or areas with no service. In addition, your service, including foliage and weather, may affect availability and quality of service. The coverage areas may include networks run by other carriers; some of the coverage depicted is based on their information and may not reflect our most recent network upgrades. See verizonwireless.com/coveragelocator for additional information.

For more details on 4G coverage, please visit www.verizonwireless.com/broadbandcoverage.
