

Fios Router

Action required

Download and install the My Fios app for personalized setup instructions.

Don't have internet access?

Use the setup instructions on next page.

Put your router to work:

- Your Fios Router is your gateway to all Fios services.
- Simple to set up and easy to operate.

Troubleshooting

If the light is red or flashing red, visit verizon.com/routersupport

Setup instructions

1. Connect your cables.

- A. Connect the coax cable from the coax port on your router to a coax outlet.
- B. If you ordered internet speeds greater than 100 Mbps, connect the Ethernet cable from your router's WAN port to an Ethernet outlet.
- C. Connect the router power cord to an electrical outlet.
- D. Router will take up to 10 minutes to power up completely. Move on when the front light is solid white.

2. Connect your devices.

Wired or Wi-Fi? Your choice.

Wired

- A. Connect the Ethernet cable to any yellow LAN port on your router.
- B. Connect the other end to your computer.

Wired connection

Wi-Fi

- A. Get the Wi-Fi name and password off the label on your router.
- B. On your device, choose your Wi-Fi name when it appears.
- C. Enter the Wi-Fi password exactly as it is on your router label.

Router label

Wi-Fi network

The Fios Router has one Wi-Fi name supporting 2.4 GHz and 5 GHz signals. The Self-Organizing Network (SON) feature lets your devices move between the two signals automatically for an optimized Wi-Fi connection.

3. Complete activation.

Activate your router by opening a web browser on your computer and following the prompts.
