NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

1. Basis of Presentation and Recent Accounting Standard Updates

Verizon New Jersey Inc. (Verizon New Jersey or the Company) is a wholly owned subsidiary of Verizon Communications Inc. (Verizon). The unaudited condensed consolidated financial statements include the accounts of Verizon New Jersey Inc. and its wholly owned subsidiary Verizon Online New Jersey LLC. The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim periods. These condensed consolidated financial statements reflect all adjustments that are necessary for a fair presentation of results of operations and financial position for the interim periods shown including normal recurring accruals and other items. All significant intercompany accounts and transactions have been eliminated. We have evaluated subsequent events through May 28, 2010, the date these condensed consolidated financial statements were issued. The results for the interim periods are not necessarily indicative of results for the full year. The balance sheet at December 31, 2009 has been derived from the audited financial statements at that date but does not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. For a more complete discussion of significant accounting policies and certain other information, you should refer to our December 31, 2009 audited financial statements.

Recent Accounting Standards

In September 2009, the accounting standard update regarding revenue recognition for multiple deliverable arrangements was issued. This update requires the use of the relative selling price method when allocating revenue in these types of arrangements. This method allows a vendor to use its best estimate of selling price if neither vendor specific objective evidence nor third party evidence of selling price exists when evaluating multiple deliverable arrangements. This standard update is effective January 1, 2011 and may be adopted prospectively for revenue arrangements entered into or materially modified after the date of adoption or retrospectively for all revenue arrangements for all periods presented. We are currently evaluating the impact that this standard update will have on our consolidated financial statements.

In September 2009, the accounting standard update regarding revenue recognition for arrangements that include software elements was issued. This update requires tangible products that contain software and non-software elements that work together to deliver the products' essential functionality to be evaluated under the accounting standard regarding multiple deliverable arrangements. This standard update is effective January 1, 2011 and may be adopted prospectively for revenue arrangements entered into or materially modified after the date of adoption or retrospectively for all revenue arrangements for all periods presented. We are currently evaluating the impact that this standard update will have on our consolidated financial statements.

2. Shareowner's Investment

(dollars in millions)	Common Stock	Accumulated Deficit
Balance at December 31, 2009	$ 1,357	$ (12)
Net loss	---	(55)
Balance at March 31, 2010	$ 1,357	$ (67)

Net income (loss) and comprehensive income (loss) were the same for the three months ended March 31, 2010 and 2009, respectively.

3. Notes Receivable

The Financial Services agreement between Verizon Network Funding Corp. (VNFC) and us allows VNFC to collect funds on our behalf. These funds are assigned a variable interest rate and demand note basis, therefore, the carrying value of the notes receivable approximates its fair market value. As of March 31, 2010 and December 31, 2009, we had notes receivable in the amount of $941 million and $812 million from VNFC, respectively.

4. Debt

The fair value of our short-term and long-term debt, excluding capital leases, is determined based on market quotes for similar terms and maturities or future cash flows discounted at current rates. The fair value of our short-term and long-term debt, excluding capital leases, was approximately $3,297 million and $3,169 million at March 31, 2010 and December 31, 2009, respectively, as compared to the carrying value of approximately $3,184 million and $3,061 million at March 31, 2010 and December 31, 2009, respectively.

5. Commitments and Contingencies

Various legal actions and regulatory proceedings are pending to which we are a party and claims which, if asserted, may lead to other legal actions. We have established reserves for specific liabilities in connection with regulatory and legal matters that we currently deem to be probable and estimable. We do not expect that the ultimate resolution of pending regulatory and legal matters in future periods will have a material effect on our financial condition, but it could have a material effect on our results of operations.

From time to time, state regulatory decisions require us to assure customers that we will provide a level of service performance that falls within prescribed parameters. There are penalties associated with failing to meet those service parameters and we, from time to time, pay such penalties. We do not expect these penalties to have a material effect on our financial condition, but they could have a material effect on our results of operations.

6. Other Items

Medicare Part D Subsidy

Under the Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010, both of which became law in March 2010 (collectively the Health Care Act), beginning in 2013, Verizon and other companies that receive a subsidy under Medicare Part D to provide retiree prescription drug coverage will no longer receive a federal income tax deduction for the expenses incurred in connection with providing the subsidized coverage to the extent of the subsidy received. Because future anticipated retiree prescription drug plan liabilities and related subsidies are already reflected in our financial statements, this change requires us to reduce the value of the related tax benefits recognized in our financial statements in the period during which the Health Care Act was enacted. As a result, we recorded a one-time, non-cash income tax charge of $27 million in the first quarter of 2010 to reflect the impact of this change.
