Fios Internet

fios✓

Welcome to Fios Internet for Business.

All the power and performance you need to succeed.

Feel like someone hit the fast-forward button on your business? Actually, it's your email and data files moving at blazing-fast, fiber-optic speed. It's the power of Verizon Fios Internet for Business.

Beyond amazing symmetrical upload and download speeds and performance, Fios also brings you many business-boosting enhancements. The Verizon Security and Privacy Multi-Device plan can help keep your confidential data confidential. It includes:

- One comprehensive security solution for an unlimited number of devices (PCs, Macs, Android and iOS).
- Real time updates to help protect against the latest viruses, malware and online threats.
- PC cleanup to safely remove junk files for better computer performance and health.
- Web Advisor helps safely surf and search the web. Be warned before visiting a phishing site.

Your business is now powered by the network that's light years ahead. And backed by the provider you can count on year after year.

Note: Some enhancements may include additional costs.

Troubleshoot

My computer occasionally loses its connection to the internet. How can I fix it?

- Check the Ethernet or Wireless connection between your computer and router, as well as the Coaxial/Ethernet connection between the ONT and Router (refer to Equipment section for ONT).
- Check the connections between your router and wall jack.
- Make sure your router power cord is properly plugged in.
- Disconnect your power cord, wait a few minutes, then plug it in again.
- If you have a wireless connection, make sure there is no interference (2.4 GHz phones, microwaves, fluorescent lights) between your computer and router.
- Try moving your computer closer to the router for a stronger signal.

How do I reboot my router?

Many issues can be resolved by rebooting your router. Just unplug the power cord to your router, plug it back into the electrical outlet and wait 90 seconds. Check to see if this resolves the trouble.

Always reboot your router first — that might be all that is required to correct the problem.

How do I “factory reset” my router?

If rebooting your router did not fix the issue, you can try a factory reset:

- Using the tip of a ballpoint pen or pencil, press and hold the Reset button on the back of your router for 3 to 5 seconds.
- You will see the lights on the router flicker, or turn solid red.
- Once the lights return to normal, try to connect as you normally would.

Note: Any setting changes you may have made to the router will be lost.

I forgot my Verizon account User ID and password. What should I do?

If you know your Verizon Online User ID and the answer to your secret question, but forgot your password, use the Verizon Online Password Reset Tool at verizon.com/mybusiness.

My service seems slow. What can I do?

1. Clear your temporary internet files by clearing the cache on your browser according to your browser specifications.
2. Close your browser
3. Reboot your computer.
4. Conduct a speed test.
You can conduct a speed test to verify any performance issues by visiting verizon.com/bisfiospeedtest.

I'm having trouble installing Verizon Fios Online software. What should I do?

- Make sure you have closed or exited all programs.
- Temporarily disable anti-virus or fax software.

I can't send or receive email.

- Double-check to ensure that the email address has been typed correctly.
- Check to see if you have an active internet connection by opening the home page in your Web browser.
- Contact your email provider to ensure you have correctly configured your email client.

I can't connect to the internet.

Most issues are resolved by rebooting your router, either by using the power switch or unplugging it from the power source — and then waiting approximately 30 - 90 seconds.

If that doesn't work:

- Check the Ethernet connections between your computer and the router and between your computer and the wall jack. (Remember, your PC should be connected to the yellow port on the back of the router if you're directly wired. This does not pertain to wireless connections.)
- Make sure that your router power cord is securely plugged in.
- Try rebooting your computer.
- Power-cycle your router by first disconnecting the power cord, waiting a few minutes, then reconnecting the power cord.
- Check to ensure that your firewall software is not blocking your internet access. Refer to your firewall software user guide.
- Try "factory resetting" the router (see instructions on page 7).

What is the difference between Dynamic IP and Static IP addresses?

To communicate on the internet, computers or other devices must have an IP address. IP addresses are either Dynamic or Static.

- If you have a Dynamic IP address, a new IP address is assigned to your computer each time you connect to Verizon Broadband. When you close your internet connection or turn your computer off, your computer releases the temporary IP address. Most business owners who connect to the internet to collect email, browse websites or make transactions online use Dynamic IP addresses.
- A Static IP address gives you a permanent home on the internet, with a numeric address that uniquely identifies

your business and is always dedicated with the same computer. Static IP addresses don't change. This is because the global DNS (Domain-Name Service) record matches your domain to your IP address, enabling computers around the world to go to your IP address when a request pertaining to your domain is made.

Important – Before you add more Static IP addresses:

If your business uses Static IP addresses and you wish to increase the number of Static IP addresses you purchase (i.e., if you go from a block of five or more IPs, or if you go from a block of five IPs to a block of 13 IPs, etc.), your IP addresses will change. Static IP addresses are assigned in sequential order. If you increase the amount of Static IP addresses, then you will be assigned a new sequence of IP addresses, which will require a change to your router configuration. When you place your order for an increased number of Static IP addresses, you will be informed of your new IP address range and the date on which the new IPs will be available. It is your responsibility to reconfigure your business equipment.

Your business wireless network

What things should I keep in mind?

- Wireless routers generally have a range of 100 to 150 feet; that can vary based on the construction of your building.
- Setting up is easier when all your computers use the same operating system.
- Newer versions of operating systems, like Windows 8 and Windows 10, have features and setup wizards that also make it easier.
- Make sure your wireless router is at least 10 feet from devices that could interrupt the signal — 2.4GHz phones, microwaves, fluorescent lights — and away from large metal objects.
- Position computers to receive the router's signal through a wall, rather than around a corner.
- Minimize the number of walls your router has to send its signal through.
- Position your wireless router as high and as close to the center of your business as possible.
- Placing your router near a window will allow you to access the network outside your business.
- Remember to secure your network by using the WPA2 Key.
- Expand the reach of your Fios wireless network with a Fios Network Extender. For details visit verizon.com/bizfiosnetworkextender.

Additional assistance

Verizon makes it easy to get the help you need. Just go to verizon.com/bizsupport.

Still need help? Call us at 1.800.Verizon (1.800.837.4966).

Fios TV

Welcome to Fios TV for Business

You've read the reviews. Heard the buzz. Seen the awards and all the adjectives used to describe Fios TV. It delivers a 100% fiber-optic digital experience directly to your business that produces a crystal clear picture and room-shaking sound. Now imagine that, on hundreds of channels, thousands of On Demand titles and with every show and movie you record. Fios TV for Business keeps your company/business up-to-date and your clients entertained.

Streaming on the go.

The impressive Fios TV app allows you to watch TV and stream movies On Demand with your tablet or mobile phone - at work or on the go. Try it today if you haven't already!

For more details, visit verizon.com/bizfiostvapp.

Note: The ability to stream transactional movies on demand is available to Private Viewing business customers once they have accepted the Terms of Service and Private Viewing conditions at verizon.com/mybusiness.

If you haven't already, it's time to experience for your business. Let's get started with some basics.

Verizon Fios TV remote

It has everything you need to do it all.

This is Fios TV. It's so easy, all you have to do is "press the button." These are the buttons and what they do.

How to set up your Fios TV remote

The instructions in this booklet will work with our current remote controls — the P265. If you have another remote control, please refer online to set up your remote at verizon.com/bizfiostvhelp. You can also watch Help Videos on channel 131.

1. Turn on your TV and the Fios TV Set-Top Box. Make sure you can see live TV.
2. Press and hold the “OK” and “Fios TV” buttons together then release both buttons. The red LED light blinks 2 times and then stays on.
3. Press and hold the “Play” button . The remote control tries a new TV code every second. The red LED light blinks each time a new code is sent.
4. When the TV turns off, release the “Play” button  immediately.

NOTE: Some TVs may respond slower than others. If necessary, you can press the Ch+ and Ch- buttons to go forward or backward one TV code at a time.

5. Test your remote to ensure it is working properly:
 - Turn on the TV by pressing the “TV” button on your Fios TV remote.
 - Press the Vol+ and Vol- buttons to ensure that you can control the volume.
 - Press the “Mute” and “A/V” buttons to ensure they work.

If any of these buttons do not work, press and hold that button. Release the button as soon as it works.

6. If all the buttons work, press “OK” to this TV remote code. The red LED light blinks 3 times and then turns off. Your remote control is now programmed.

For additional information on device codes, refer to the Fios TV Remote Control User Guide that came with your remote.

Learn the basics of your remote.

Your new remote can be used to control your Set-top Box and your TV. The choice is yours.

- Press TV power button to turn TV power on and off. Remote must be programmed to operate your TV.
- Press the “STB” power button at the top of the remote to turn power on and off. Comes pre-programmed.
- Press the “CH+” button to see the next higher channel.
- Press 1-3 -1 then “OK” to tune to Channel 131.
- Press the “Last” button to return to the last channel.
- Press the “Info” button to see information about the current program.
- Press the “Guide” button to see a list of TV programs.
- Press the “Exit” button to return to TV watching.
- Press the “Menu” button to launch the Fios TV Main Menu. From here you can access all the features of your Fios TV service.
- Use the arrow keys to navigate through this menu.

Note: If LED light flashes 5 times, batteries need to be replaced.

If you have a DVR

If you have a set-top box with a built-in DVR, you have special button functions. Here's what they do:

- The “DVR” button displays your list of recorded programs.
- The “Pause” button is a rocker button. Press the lower half of the button to pause the program. Press the upper half of the button to continue to play from where you left off.
- The “Skip Back” button jumps back a few seconds in the program you are watching.
- The “Skip Forward” button jumps forward in the recorded program you are watching.
- The “Record” button records the current program.

Tips:

- The remote will exit the programming mode after 20 seconds if no keys are pressed.
- Directions to sync the P265 remote with your TV are printed on the back of the remote.

Getting help.

Need help or have Fios TV questions? Three ways Verizon makes it simple.

1. Tune to Channel 131 for answers to many of your questions.
2. Visit us online at verizon.com/bizsupport.
3. Help Videos – Press Menu on the remote control and scroll to Customer Support then Help Videos.

Interactive Media Guide – Fios TV remote

Prepare to be amazed by the power and control you have with your remote. Your remote is a powerful interactive media guide.

Starting now, you will be served a wealth of media choices onscreen, just by using your remote.

Take your Fios remote in hand and command it all.

Surf, record, order movies. Discover new and convenient ways to find what you're looking for — by title, by actor, or by scheduled time.

With your Fios TV remote, it's easy.

Which means there's nothing to stop you from getting what you want, when you want it. You'll see.

You may be using our classic remote.

The classic P144 has four buttons at the top instead of two. Whichever model you're using, the programming instructions are the same.

How do you tell which remote you have?

The new P265 has "Fios TV" printed at the top (shown in the image to the right), the classic P144 does not. You can purchase either remote at verizon.com/smallbusiness/accessories/remote-controls/

Video On Demand and search

Video On Demand

Just click the “On Demand” button or go to Channel 900, and you’ll enter a world of endless movies. Search by category, by keyword or by actor. You’ll see our “featured titles” right up front with the hottest releases and favorites. Our poster view makes for easy recognition. And if you still can’t decide, just watch a preview. Sit back and watch your movie with Fios-quality picture and sound.

Pay Per View

The latest hit shows and events, such as concerts and wrestling matches, are yours at the push of a button with your Fios TV remote. To see what’s playing and to order, press the “Menu” button on your remote, and:

- Scroll down to Pay Per View.
- Highlight a title in Upcoming Shows.
- Press “OK”.
- Follow the instructions to purchase.

Business customer must call 1.800.Verizon (1.800.837.4966) to order additional premium channels like Music Choice, International, sports programming HBO, Cinemax and International channels as Self-Serve ordering is not available.

Note: Pay Per View and Transactional Video on Demand are only available for Private Viewing customers and may not be exhibited by any customers to the public or patrons. Private Viewing Business Customers must enter online confirmation of the Terms of Service and Private Viewing Conditions in order to purchase Video on Demand and Pay Per View programming. Premium Channels are not available to all Business Customers.

If you've prepurchased a presentation, you can easily set a reminder so you don't miss a minute of it.

Just go to the Main Menu and:

- Select the event through Search or with the Guide button.
- Select Set Reminder on the event information screen.

TV listings search

What was the comedy with the two mismatched roommates? Or the name of the guy who played Igor? Find that movie, show, favorite actor, play or presentation in seconds. Simply use the on-screen keypad, scroll wheel or cell phone pad. Type in a keyword (or just initials, if that's all you know). Our Global Search will tear through.

Need Help? Press the "Main Menu" and select "Customer Support."

TV DVR listings, High-Definition Video On Demand and Pay Per View* can give results by:

- Category (movies, children, sports, music).
- Keyword (program title, actor, topic).
- Content type (TV listings, PPV, DVR, HDTV and VOD).

*Your search may find programming to which you are not subscribed.

Blocking Controls

The Fios TV guide provides the ability to control and manage the programs and content that come into your business.

With Blocking Controls, it's easy to:

- Selectively block programming by channel or rating.
- Selectively block Pay Per View and all purchases.

- Set up two different user-defined PINs (one to block programs and one for purchases).
- Hide adult programming from the TV Listings.
- Use On/Off quick settings to temporarily disable blocking controls without losing your settings.

When programs with a particular rating level are blocked, the Fios TV Guide automatically blocks the higher ratings.

Also, if you have the DVR Set-top Box, programs recorded with a PIN require the PIN to be entered in order to play back the recorded program.

Primary Account Owners can set parental controls and content permissions on the main account and each sub account within your My Business account.

Tip:

- Go to Main Menu, scroll down to Settings, System and Parental/Purchase.
- You can set up two separate PINs: one to block programming, the other to block purchases for VOD, PPV, packages or premiums.
- You can temporarily disable the blocks by using the On/Off quick setting. Your settings will be saved.
- You can record shows/movies on your DVR Set-top Box using a PIN, but you'll need the PIN to play them back.

Need Help? Press the Main Menu and select Customer Support.

Recording TV shows

To record a show that's currently playing.

- Press the  button on the remote.

Got to the show late? No problem. If you start recording after the show has started, the DVR will actually record the show from the beginning as long as the channel you wish to record is preselected.

To schedule recording of an upcoming show or series.

- Press "Menu" on your remote.
- Go to Guide or use Search to find the show.
- Use the  and  to highlight the show you want to record.
- Press : a green check will appear next to the show.
- Press  a second time to record a series.
- Press  a third time to cancel a scheduled recording.

Series Manager

This smart feature ensures that all the shows are recorded, even if the show's time slot or length is changed by the broadcaster. The folder with a red dot tells you the Series Manager has been scheduled. It will enable you to:

- Record only first-run episodes.
- Add extra time before and after a show.
- Permanently save a show.
- Rank the series you want to record.

Recording Pay Per View programs

This is an option available on some Pay Per View programs. Press  when the Pay Per View program begins. If you'd prefer to automatically record future Pay Per View shows, choose the Purchase and Record option when you select a show. Then enjoy it anytime you'd like.

Tips:

- Typically your DVR is designed to record up to about 85 hours of standard-definition and 15 hours of Hi-Def TV programming, however recording times may be greater with newer DVR models.
- Programs recorded in Hi-Def can only be played back on remote Hi-Def set-top boxes.

Review, cancel or delete scheduled recordings of shows

Reviewing scheduled recordings

Simply press the **DVR** button on your remote or select **DVR** from the Main Menu. You'll see the list of shows you've scheduled to be recorded under Scheduled Recordings. If you've scheduled to record a series, choose Manage Series Recording and you'll see them listed. As a helpful reminder, you'll also see how much recording time you have left.

Cancelling scheduled recordings

It's easy to undo what you've done. Just:

- Select "Scheduled Recordings" from the DVR menu.
- Highlight the program you want to cancel.
- Press "OK".
- Then press "Cancel".

Playing a Recorded Show

Here's all you have to do:

- Select "View Recordings" from the DVR menu.
- Highlight the program you want to watch.
- Press "OK".
- Then press "Play."

Deleting or saving a recorded show.

Use these buttons to control playback of a recorded program. You can easily vary the rewind and fast-forward speeds.

- Press once for 3 times the speed.
- Press twice for 15 times the speed.
- Press three times for 60 times the speed.
- Press four times for 300 times the speed.

Note: DVR Service is not available to all Fios TV Business customers.

To delete, select "Recorded Programs" from the DVR menu. Press "C" to delete or press "OK" to View info and "OK" to Delete.

Once the recording space is full, the DVR will automatically delete the oldest shows to make room for new recordings. If there's a show you want to be sure isn't deleted, select Recorded Programs from the DVR menu, highlight a program you want to save, then select Protect.

Controlling Live TV with the DVR

Controlling live TV.

With Fios TV, you can control live TV in some cool new ways.

- Pause the current channel being viewed.
- Switch to another channel.
- Go back to the previous channel.
- Resume viewing the program that was previously paused.

You can continuously switch between two channels, pausing, fast-forwarding and rewinding on both channels. Fios TV lets you control live TV in the ways described below.

Pausing or resuming live TV.

Press the Pause button once to freeze the action. Press Play to resume the show.

Rewinding live TV.

Press the “Rewind” button to go back to any part of a show already stored. Then press “Play” and resume watching the show. While you’re doing this, you won’t miss a thing because the DVR will continue to store the show.

Fast-forwarding live TV.

Press the Fast-Forward button to skip past a previously viewed portion of a live TV show. Then press “Play” to resume watching.

Watching in slow motion

Want to see if the receiver really caught the ball and stayed inbounds? Want to catch something you missed in the background? Press Pause then Skip Back or Skip Forward to see the action in slo-mo, frame by frame.

Instant replay

Why should the sports broadcasters have all the fun? With Fios TV, you can do your own instant replay. Press the Skip button to view the previous 10 seconds of a show you're watching live or have recorded.

Resume watching live TV

If you're watching a live program delayed by pausing or rewinding live TV, press the Fios TV button and you'll jump forward to the point in the show currently being broadcast.

Status bar

Whenever you pause, fast-forward or rewind a live or recorded program, this helpful feature appears. It shows you how much of a current show is stored in memory, what point of the show you're watching now and how far behind the live broadcast you are.

Multi-room DVR

Consider it the ultimate upgrade.

The Multi-Room DVR allows you the freedom to enjoy everything that you record. It's simple, flexible and convenient.

Multi-room DVR.

This has all the features of our standard DVR but lets you view what you've recorded in multiple rooms. With the Multi-Room DVR, you can:

- Watch what you've recorded on up to 2 additional set-top boxes at the same time.
- Watch the same program in 3 different rooms.
- Watch different programs in 3 different rooms.

Accessing what you've recorded from set-top boxes.

It's easy to spread the fun and entertainment around. After you've recorded on your Multi-Room DVR, simply:

- Use a remote Set-top Box (a box in another room of the business).
- Choose DVR from the Menu.
- Select a program using the arrow keys.
- Press OK.

You'll be able to use your normal DVD playback controls (Pause, Rewind, Fast-Forward) on your remote. When you're done watching a recorded program, just press the Stop button.

Multi-Room DVR blocking controls

Blocking controls for remote set-top boxes only manage live TV viewing. Blocking controls for watching recorded programs on remote set-top boxes are set up on the DVR by creating a PIN.

A PIN must be set up for each set-top box.

Good to remember.

- Your Multi-Room DVR will support up to 6 additional set-top boxes.
- Remote set-top boxes cannot pause or rewind live TV. Program recordings cannot be set from remote set-top boxes, only from the DVR.
- Two set-top boxes at most can access recorded content from the DVR at the same time. An error message will flash if 3 or more try.
- You cannot delete content from the DVR while another Set-top Box is accessing that content.

Need Help? Press the Main Menu and select Customer Support.

Favorite channels

You can easily create and use a list of your Favorite Channels:

- Select Menu on your remote.
- Select Settings from the Main Menu, then System.
- Select Favorite Channels.
- Highlight them using the  and  buttons.
- Press OK to add or remove channels.

To access your favorite channels, press the  button. Scroll using the  and  buttons and click OK after highlighting the channel you want to watch.

Get a current list of all Fios TV channels at verizon.com/bizfiostvchannels.

Troubleshoot

Quick Tips

You can always find help by visiting verizon.com/bizsupport. Here are some Quick Tips to get the help you need.

Most Fios hardware issues can be solved by rebooting your router.

- Unplug the power cord to your router, plug it back into the electrical outlet and wait 30 seconds. Check to see if this resolves the trouble. If the problem was missing guide information, it may take about 5 minutes for the guide to download. Always reset your router first and check to see if that fixes the problem. Resetting the router may be all that is required to correct the problem.

Fios TV not responding?

- If you have a frozen picture, stuttering audio, can't change channels, are unable to display video or are missing the Guide, try rebooting the set-top box by holding in the power button for 15 seconds and then releasing it.

Where do I go for on-screen TV Help?

- For on-screen help, look at the TV Help Videos — just press Menu on the remote and scroll down to Customer Support. Also, check out Channel 131 for how-to videos, setup wizards and to see what's new.

No display on your TV?

- Check to make sure your TV and Set-top box are powered on. Check TV for proper input settings (e.g., Video 1 or channel 3 or 4). Your installation technician determined the proper input or channel your TV should be tuned to when the service was installed. If those settings were changed, they must be restored. Also, check to be sure the batteries in your Fios TV remote are good.

If you are seeing a blue screen.

Change your Home Theater or VCR's channel to 3 or 4. If changing the channel did not change your TV screen, make sure the TV is not in Video mode.

Try one of the following to correct:

- Press the "Input" button.
- Toggle through the options and select "TV".
- Press the "Video" button to change your TV's mode from Video to TV.
- Or press the "Menu" and locate the mode for Audio/Video setup and select the TV option.
- Be sure the Set-top Box is plugged in and turned on.

Remote not working?

Your remote needs a clear visual path to the sensor on the business entertainment equipment you are trying to operate.

- Make sure there are no obstacles between you and the remote.
- Make sure you are trying to use the remote from within 25 feet of the device.
- Make sure you are pointing the device directly at the sensor on your entertainment device.
- Make sure that your batteries are good.

How do I set up my Fios TV remote?

The instructions in this user guide will work on either of our current remote controls — the P265 or the P144.

1. Get started by turning on your TV manually.
2. Using your Fios TV Remote, press and hold the “TV” button.
3. While holding down the “TV” button, press “OK”.
4. Release both buttons. The Device Buttons will blink twice.
5. Press “922” (or appropriate code for your TV)*.
6. Point the remote at the TV.
7. Press and hold the top half of the PLAY/PAUSE button: .
8. When the TV turns off, release the  button. You have found the right code. Press “OK” to store this code.

*For additional information on device codes, refer to the Fios TV Remote Control User Guide that came with your remote.

If you can't power on and off your TV and set-top box using the remote after you've programmed it.

It may be because either your TV or Set-top Box isn't receiving the infrared signal from the remote. See which of the following describes your problem and follow the tips.

If the power button on the remote only turns the set-top box on and off, but not your TV:

Try the following steps:

- Make sure there is a clear line of sight between the infrared light of your remote and your TV.
- Press the "Power" button.
- If the TV does not respond, the remote is not programmed with the correct code. (See "How to set up your Fios TV remote" on page 15).

If the power button on the remote doesn't always turn the TV on and off:

Try the following steps:

- Make sure the TV and Set-top Box are near each other.
- Make sure nothing is blocking the front of either device.
- If your TV is plugged into the power outlet on the back of the Settop Box, try plugging your TV directly into a wall outlet.
- Press the "TV" button, then the "Power" button, to control the TV alone.

Fios equipment

fios[✓]

Fios equipment

The brains and power behind Fios.

Our equipment helps direct and keep Fios working continuously for your business. Here we'll explain what it does, and what you need to do to ensure it operates at its best.

Optical network terminal (ONT)

Think of this as a kind of electronic translator. Verizon Fios sends signals over our state-of-the-art network using laser-generated pulses of light. The Optical Network Terminal, installed either outside or inside your business, converts those pulses into electric signals.

Optical network terminal power supply unit

This unit connects the Optical Network Terminal directly to a 3-pronged grounded electrical outlet in your business or building(s). The Optical Network Terminal Power Supply Unit's green indicator light tells you it's receiving power. Make sure it's plugged in at all times and that the green light is on. The Optical Network Terminal requires very little power to operate. In fact, it's as little as what it would take to operate a couple of night-lights.

Battery backup unit

In case the Optical Network Terminal Power Supply Unit is accidentally unplugged or there's a commercial power failure, an optional battery backup unit is here to help. It will give you power for voice service (not internet or TV) for up to 8 hours. It's installed in a location in your business where you can easily monitor it. Its audible alarms and indicator lights tell you whether your service is being powered by your business's electricity or the battery.

Note: The optional battery backup unit does not supply backup power to all voice services. VoIP and Business Digital Voice cannot not be powered by the battery backup.

Good to remember

- When your battery backup unit needs its batteries replaced, please visit verizon.com/bizbatterybackup to review replacement information and directions for your particular unit. Verizon is not responsible for damages which result from use of an improper battery.
- Old batteries in the battery backup unit are sealed lead acid, and old batteries need to be disposed of properly. Visit epa.gov/osw or call the EPA at 1.202.272.0167 for instructions.
- For additional battery backup information, please visit verizon.com/bizbatterybackup.
- Replacement batteries can be purchased by visiting verizon.com/smallbusiness/accessories/

PowerReserve device

If your ONT is configured with a Power Adapter, you may utilize the PowerReserve device by maintaining 12 D-Cell batteries in the device. With 12 fresh batteries, the PowerReserve will provide backup power for your basic voice services, including emergency 911 dialing, for up to 20 hours in the event of a power failure. Please note that you may be responsible for purchasing the PowerReserve device and the initial set of batteries, and will be responsible for purchasing any replacement batteries. The PowerReserve device must be purchased from Verizon. D-Cell batteries may be purchased from a variety of retailers.

Note: The optional battery backup unit does not supply backup power to all voice services. VoIP and Business Digital Voice cannot not be powered by the battery backup.

Battery backup unit indicator signals

These are the sights and sounds you should know.

Buttons:

Alarm Silence:

Press to silence audible alarm.

Battery Emergency Use:

Press once to reboot ONT and get up to 1 hour of battery life for phone calls. All remaining battery life will be used.

Lights:

Auxiliary Power Source:

Green — auxiliary power available
Red — auxiliary power not available

Replace Battery:

Red — battery needs to be replaced

Battery Power:

Red — ONT is operating off battery power; no AC power available
Blinking Red — low battery power

System Status:

Green — normal operation
Blinking Green — system fault

Note: The optional battery backup unit does not supply backup power to all voice services. VoIP and Business Digital Voice cannot be powered by the battery backup. Not all battery backup units look identical to the image shown above.

Battery backup unit audible alarms

If there's a problem with your battery backup unit, an alarm will sound for 2 seconds and be silent for 58 seconds. This will be repeated until you press the alarm silence button. Once you do, be sure to check the lights on the battery backup unit to find the issue. Below are two of the most common reasons for the alarm to sound — and how you'll know.

Low battery — the alarm is silenced after electrical power returns, the battery is fully discharged or removed from the battery backup unit.

Replace battery — the alarm is silenced when the battery is removed.

Verizon Fios router

This unit enables more than one computer in your business to be online at the same time. It's been designed specifically to work with the Fios Network. Using a 3rd party router may impact the performance of your Fios services.

Returning equipment

Need to return equipment? Returns are easy.

Visit verizon.com/bizfiostvreturnequipment and follow the provided instructions. As always feel free to call 1.800.Verizon (1.800.837.4966) for additional questions or support.

Getting started – Verizon’s My Business Account

My Business is the one place to manage all your Verizon phone, internet, TV and application services, as well as get rewards, discounts, and support.

Think of it as a one-stop resource where you can:

- View, print and pay your bills.
- View and manage your Verizon online account and applications from any PC, any time.
- Manage one or more accounts.
- Enjoy special members-only offers, get discounts and join our free rewards program created only for Verizon business customers.
- Get business tips and best practices to grow your business on the Verizon Business Markets Blog and get updates on the next live webinar featuring small business experts.
- Find support FAQs and troubleshooting tips and tools.
- Download mobile apps.
 - The My Fios app is your mobile management platform for paying your bill, managing your Wi-Fi information and connected devices, getting help and support, and much more.*
 - The Fios TV app allows you to watch live Fios TV content* and other select content while on the go.
 - For more details on both apps go to verizon.com/bizapps or visit us at your app store.

Go to verizon.com/bizapps to get started now.

*Customers must be connected to internet using a BHR4 (Quantum Gateway router) or higher in order to manage Wi-Fi information and connected devices through the My Fios app. Some live Fios TV content available through Fios TV app may also require connection to BHR4 router.

Verizon Small Biz Rewards – a free program developed for businesses like yours.

Earn and redeem points for great rewards you can use for your business, your employees or your best customers.

How it works.

- Every month you'll earn 1 point for every dollar of qualifying charges spent on Landline Phone, Long Distance, Business Internet, Fios® by Verizon Internet or Fios TV - up to 500 points per month.
- Earn additional points by taking an online survey, telling us more about your business and signing up for new Verizon services.
- When you join, you'll earn 250 points.*

It's all about rewards.

- Use your points for great gift cards from popular retailers and restaurants like Staples® and Starbucks.
- Order the reloadable Small Biz Rewards prepaid MasterCard®† with the points you've earned. Then use your points to reload the card balance again and again.

Signing up is easy.

Log into your My Business Account at verizon.com/mybusiness to join. Or call 1.866.576.7595, Mon. – Fri. 8:00 am – 6:00 pm ET. A customer service representative will be happy to assist you.

*Small Biz Rewards program members earn 1 point per \$1 spent on their qualified monthly Verizon charges for landline Phone, Business Digital Voice, Business Internet, Fios Internet and/or Fios TV, and select XO services (excluding website hosting, domain name and other related services), up to 500 points per month. Reward program is only available to business customers who sign up for eligible services in select states. Program terms apply.

Verizon Small Biz Rewards is a program provided by Verizon. Staples is neither a sponsor of Verizon Small Biz Rewards nor an affiliate of Verizon. See Staples Gift Card for complete terms and conditions of use.

† Prepaid cards are issued in connection with a loyalty, award or promotion program. Prepaid card is issued by MetaBank®, Member FDIC, pursuant to license by MasterCard International Incorporated. MasterCard is a registered trademark of MasterCard International Incorporated. No cash access or recurring payments. Card valid for up to 36 months, funds do not expire and may be available after card expiration date, monthly card account management and post-expiration card re-issuance fees may apply. Card terms and conditions apply, see MyPrepaidCenter.com/site/mastercard-univ.

The Starbucks word mark and the Starbucks Logo are trademarks of Starbucks Corporation. Starbucks is also the owner of the Copyrights in the Starbucks Logo and the Starbucks Card designs. All rights reserved. Starbucks is not a participating partner or sponsor in this offer.

The listed merchants are in no way affiliated with Verizon, nor are they to be considered sponsors or co-sponsors of this program. Retailers are not liable for any actual or alleged claims related to this offer. Please visit smallbizrewards.verizon.com for complete merchant terms and conditions.

Verizon Cloud

Verizon Cloud gives you a safe place to automatically back up your data.

With it you can:

- Keep your business connected and help protect your business files from system crashes, known viruses and physical damage.
- Back up and sync your business contacts, documents, photos and more.
- Access your data anytime, anyplace, from a PC, Mac, smartphone or tablet with an internet connection.
- Transfer content between devices, share photos and documents or print as needed directly from the Verizon Cloud.

Verizon Security and Privacy Multi-Device powered by McAfee

Help protect against today's online threats.

Unlimited cross-device protection for all your eligible devices.* For PCs, Macs, Android and iOS smartphones and tablets.

The more you work online, the more vulnerable you are to viruses, malware and hackers. All the more reason you need the everyday protection of Verizon Security and Privacy. It's simple to download and easy to manage right from your desktop. Verizon Security and Privacy Multi-Device protects your data, identity and all your eligible devices. It also enables you to search, transact, access the web and share your digital files with confidence. You live and work in a digital world. We help to keep it secure.

Two-way firewall protection.

Help keep unauthorized users out of your network and business with desktop firewall tools. Desktop firewall monitors, controls and logs your PC network activity to help you maximize your PC security solution.

- Notifies you anytime an application tries to access the internet.
- Rejects inbound intrusions before they touch vital PC functions or data.

*Subject to limitations on reasonable use and purpose of the product.
