

**The Internet of
Things is now
enterprise-grade.
So what's holding
you back?**

**2016 was the year
IoT picked up speed.
In 2017, there's no
turning back.**

**73% of executives are
either researching or
currently deploying IoT*.**

verizon✓

*Based on 2017 survey commissioned by Verizon.

**But adoption
has been
cautious
so far.**

**Enterprises have
focused on simple use
cases to track data and
send status alerts.**

verizon

Some familiar hurdles have slowed the pace.

Security, interoperability, costs and a lack of standards account for over 50% of executive concerns around IoT*.

verizon

*Based on 2017 survey commissioned by Verizon.

**But these barriers
are eroding.**

verizon

IoT platforms are taking the headache out of interoperability.

**Full-stack IoT platforms now
provide a single environment for
enterprises to develop
applications, manage endpoints
and utilize vast volumes of data.**

verizon

Category-M1 technologies are enabling rapid deployment of IoT — and helping lower costs.

Organizations can develop, deploy
and then scale applications fast
on low-cost, highly secure
Cat-M1 networks.

verizon[✓]

And security is being baked in from the start.

**Whether it's on the
platform, network or
device, security is being
integrated at every level.
And innovations like
Security Credentialing
services help protect the
links between each element.**

verizon✓

**These changes have
helped IoT become
enterprise-grade.**

**And that's fueling exciting
new applications.**

verizon

IoT-enabled track and trace is helping pharmaceutical enterprises cut counterfeiting.

**And it's helping them address
the requirements of the US
Drug Supply Chain Security
Act (DSCSA).**

verizon✓

Smart platforms are helping utilities companies monitor consumption more accurately and detect outages more quickly.

verizon✓

Unmanned aerial vehicles are revolutionizing the insurance industry.

70% of Fortune 500 property and casualty companies are utilizing drones to perform inspections and other claims-related work*.

verizon[✓]

*CB Insights, The Insurance Industry Is Poised to Lead the Way in Drone Adoption, June 28, 2016

**And IoT is helping
reduce traffic
congestion, smooth
wayfinding and
bring communities
together.**

verizon^v

But where is IoT going next?

Here are our predictions...

verizonThe Verizon logo, featuring the word "verizon" in white lowercase letters, followed by a red checkmark symbol.

1

The biggest growth will be in B2B applications.

B2B can generate nearly 70% of potential value enabled by IoT*.

*The Internet of Things: Mapping the Value Beyond the Hype, McKinsey & Co. Global Institute, June 2015

2 IoT platforms will become more seamless and simplify the development of apps.

**3 5G will massively
expand IoT applications
and drive innovation
across all industries.**

**5G will be 100x faster than existing networks,
and promises to be more efficient and have
lower latency rates.**

verizon

4 IoT will continue to gain traction in the enterprise—and fast.

Regulatory compliance, cost reduction and technological innovations will drive IoT adoption.

verizon

5 Organizations will move on from pilots to full deployment—and begin to realize the full value of IoT in the process.
