Implementation Date:  February 15, 2011 (or later)

Planned Network Change(s) Will Occur at the Following Location(s):

Location
Verizon Operating Telephone Company Service Areas in New York, Connecticut, Rhode Island, and Massachusetts

Description of the Planned Network Change(s):

Verizon will retire the Line Information Database (LIDB) database platform in the Northeast region (Cambridge and Brockton, MA) and move the LIDB and Calling Name (CNAM) data for the above-referenced carriers to Verizon’s database platform in Ft. Washington/Jenkintown, PA. Verizon will send Calling Name Access Routing Guide (CNARG) and LIDB Access Routing Guide (LARG) updates to Telcordia to consolidate the Northeast and MidAtlantic codes under the “VZ” ID and eliminate the “NY” ID and “SN01” SNCC no earlier than the February 2011 publication with an effective date of February 15, 2011.

Current Northeast Region LIDB database platform:

<td>246-012-021</td>
</tr>
</tbody>
</table>

Description of Reasonably Foreseeable Impact(s) of the Planned Change(s):

Service Providers connected to Verizon in Cambridge and Brockton, MA for Northeast region LIDB and CNAM data will be required to redirect the Northeast region LIDB and CNAM traffic to Verizon's LIDB database platform in Ft. Washington and Jenkintown, PA. Service Providers should verify that their links connected to the Ft. Washington and Jenkintown STPs (FTWSPAFW22W / JENKPAJK22W) have sufficient capacity to handle the additional LIDB and CNAM traffic for the Northeast region.
