PUBLIC NOTICE OF NETWORK CHANGE UNDER RULE 51.329(a)

July 29, 2015

Carriers:
Verizon South Inc., 22001 Loudoun County Parkway, Ashburn, VA 20147
Verizon California Inc., 2535 W. Hillcrest Drive, CAM21LB, Newbury Park, CA 91320
Verizon Florida LLC, 610 Zack Street, Tampa, FL 33602
GTE Southwest Incorporated (d/b/a Verizon Southwest), 600 Hidden Ridge, Irving, TX 75038

Contact: For additional information on these planned network changes, please contact:
Peter J. D’Amico
Sr. Consultant – Product Management/Product Development
416 7th Ave., 19th Floor
Pittsburgh, PA 15219
peter.j.damico@verizon.com
412-633-8424

Implementation Date: On or after January 31, 2016

Description of the Planned Network Change(s):
On February 10, 2016, Verizon South Inc. will no longer offer Signaling System 7 (SS7) Transport Service between the Signaling Transfer Points (STPs) listed in the tables below. All SS7 links between Verizon South Inc.’s Signaling Transfer Points (STPs) in Virginia identified in the table below, and the Verizon Signaling Transfer Points (STPs) in California, Florida, and Texas identified in the table below will be removed no later than February 10, 2016 in preparation for the sale of Verizon ILEC operations in California, Florida, and Texas to Frontier Communications Corporation.

Description of Reasonably Foreseeable Impact(s) of the Planned Change(s):
Service providers and any other affected carriers will need to alter their routing of SS7 signaling traffic that currently uses Verizon South Inc.’s STP pairs located in Manassas, VA/Occoquan, VA for SS7 Transport Service. Network elements that use SS7 Transport Service via the Manassas, VA/Occoquan, VA Primary/Gateway STP pair to any of the Verizon STPs in California, Florida and Texas identified in the table below must be modified to use a different signaling arrangement that does not utilize SS7 Transport service through the Primary/Gateway STP pair in Manassas, VA/Occoquan, VA. Verizon South Inc.’s STP pair in Manassas, VA/Occoquan, VA will continue to be used for SS7 traffic terminating to Verizon South Inc.’s network elements in Virginia.

Affected carriers will be contacted by Verizon to coordinate the change with Verizon on any impacted SS7 signaling via the Manassas, VA/Occoquan, VA Primary/Gateway STP pair.
Planned network change(s) will occur at the following Verizon South Inc. location(s):

<table>
<thead>
<tr>
<th>LATA</th>
<th>State</th>
<th>Location</th>
<th>CLLI</th>
<th>Point Code</th>
<th>Affiliated Carrier</th>
</tr>
</thead>
<tbody>
<tr>
<td>Washington (236)</td>
