3rd Quarter 2010
Earnings Conference Call

October 22, 2010
“Safe Harbor” Statement

NOTE: This presentation contains statements about expected future events and financial results that are forward-looking and subject to risks and uncertainties. For those statements, we claim the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995. The following important factors could affect future results and could cause those results to differ materially from those expressed in the forward-looking statements: the effects of adverse conditions in the U.S. and international economies; the effects of competition in our markets; materially adverse changes in labor matters, including workforce levels and labor negotiations, and any resulting financial and/or operational impact, in the markets served by us or by companies in which we have substantial investments; the effect of material changes in available technology; any disruption of our suppliers’ provisioning of critical products or services; significant increases in benefit plan costs or lower investment returns on plan assets; the impact of natural or man-made disasters or existing or future litigation and any resulting financial impact not covered by insurance; technology substitution; an adverse change in the ratings afforded our debt securities by nationally accredited ratings organizations or adverse conditions in the credit markets impacting the cost, including interest rates, and/or availability of financing; any changes in the regulatory environments in which we operate, including any loss of or inability to renew wireless licenses, and the final results of federal and state regulatory proceedings and judicial review of those results; the timing, scope and financial impact of our deployment of fiber-to-the-premises broadband technology; changes in our accounting assumptions that regulatory agencies, including the SEC, may require or that result from changes in the accounting rules or their application, which could result in an impact on earnings; our ability to complete acquisitions and dispositions; our ability to successfully integrate Alltel Corporation into Verizon Wireless’s business and achieve anticipated benefits of the acquisition; and the inability to implement our business strategies.

Throughout this presentation, financial information shown excludes the results associated with the divested Wireless trust properties, the Frontier transaction and, where noted, other non-operational or one-time items. As required by SEC rules, we have provided a reconciliation of the non-GAAP financial measures included in this presentation to the most directly comparable GAAP measures in materials on our website at www.verizon.com/investor.
• EPS showing strong sequential improvement
• Accelerated Wireless revenue growth, higher postpaid ARPU, and industry-leading profitability
• Strong FiOS net adds; data & video each over 200K
• Stabilized Wireline profitability
• Strong cash flows with improving metrics
• Announced dividend increase

Note: Results above are adjusted for non-operational/one-time items
