SECTION IX – LINE EXTENSION POLICY:

VERIZON NJ LINE EXTENSION POLICY

As required by *N.J.S.A. 48:5A-28(h)(1)*, Verizon NJ has a line extension policy (“LEP”) applicable to customers in areas where cable service is being provided. The system-wide LEP is based upon a household density of 30 homes per linear mile (“HPM”). However, for municipalities where incumbent cable providers have implemented a line extension policy of less than 30 HPM, Verizon matches the incumbent’s existing policy. Under no circumstance, however, will the LEP be applied where home density is less than 35 homes per square mile.

Although a uniform LEP applies throughout each municipality (based upon 30 HPM or the incumbent’s policy), the policy does not apply until cable service is being provided in the wire center area that serves the customer requesting the service extension.

In accordance with *N.J.S.A. 48:5A-28(h)(2)*, the proposed LEP supersedes the Board of Public Utilities’ Smart Growth regulations adopted as *N.J.A.C. 14:3-8.1 et seq.*

Verizon NJ’s LEP cost sharing formula, based upon a density of 30 HPM, is attached as Attachment 1. The formula will be adjusted for municipalities where the density requirement is less than 30 HPM. As reflected in the Attachment, the LEP does not apply to these municipalities because their household densities exceed the applicable density requirements. System engineering has not been completed for all of the towns. Until engineering plans are completed, Verizon NJ cannot determine the linear density for each area of each municipality. Prior to activating service in a municipality, however, Verizon NJ will provide specific information regarding the streets in each municipality that are subject to the LEP.

Attachment 1

Verizon New Jersey Inc.
Cable Television Line Extension Policy

Verizon NJ will absorb the cost of extensions to the system in the same proportion that the extension is to the remainder of the system, based upon a household density assumption of 30 homes per linear mile (“HPM”). In the event that an incumbent cable provider has a line extension policy within a municipality less than 30 HPM, Verizon NJ shall match those household density requirement subject to the requirements of *N.J.S.A. 48:5A-28h(1)*.

The share of subscribers cost for the extension of service shall be determined as follows:

1. $\frac{\text{\# of homes in extension}}{\text{mileage of extension}} = \text{homes per mile (HPM) of extension}$
2. $\frac{\text{HPM of extension}}{\text{Minimum HPM that company actually constructs in the system (30 HPM or less)}} = \text{ratio of the density of the extension to the minimum density which the company constructs in the system (“A”)}$
3. $\text{Total cost of building the extension times “A”} = \text{company’s share of extension cost}$
4. $\text{Total cost of building extension less company’s share of extension cost} = \text{total amount to be recovered from subscribers}$
5. $\frac{\text{Total amount to be recovered from subs}}{\text{Total subscribers in extension}} = \text{each subscriber’s share}$

TERMS & CONDITIONS

1. A potential subscriber (or collective group of potential subscribers) must pay an upfront initial engineering evaluation fee to cover the preliminary design and development of the cost estimate related to the requested extension. The fee shall be based upon the actual cost of the engineering evaluation. Thereafter, Verizon NJ will provide the estimate of costs for the line extension to the potential subscriber (or the pro-rata cost estimate to each member of a group of potential subscribers). If subscribers decide to order service, Verizon NJ may require each

Exhibit I
Page 3 of 3

- subscriber to execute an agreement(s) reflecting each party's responsibilities for costs related to extension of facilities.
2. If sufficient payments are made to cover the subscribers' portion of the total costs of providing the line extension and all necessary agreements are returned to the Company, then the Company will proceed to construct the extension.
 3. Notwithstanding the above requirements, the Company may deny extension requests where significant technical or legal limitations make a line extension impracticable or unreasonably expensive, including, but not limited to, the company's technology, access to right-of-ways, the ability to extend the FTTP network or lack of facilities.
 4. If, during the first 12 months following the commencement of service using the constructed line extension, Verizon NJ acquires new subscribers subsequent to the initial calculation above, the formula will be adjusted and those who have previously paid for the extension will be entitled to an appropriate rebate. In no event shall the amount of the rebate exceed a subscriber's contribution, and any new customer requesting service will be charged a pro-rata fee based on the original cost estimate before service is initiated. At the end of 12 months, any overpayment of the original costs will be equitably refunded to subscribers who made a pro-rata contribution. Installations after 12 months shall be at the company's standard rate.
 5. All necessary payments related to the network line extension are required to be made by potential subscribers, property developers or property owners prior to the start of construction by the Company.
 6. The Company shall own and maintain any and all facilities added, constructed or extended as a result of a request for construction pursuant to this line extension policy.
 7. If new subscribers are added to the extension, the cost is adjusted and those who previously paid receive an appropriate rebate.
 8. Detailed accounting and/or financial information to support the minimum HPM shall be supplied to the OCTV for its approval in such form as is required. The minimum HPM shall be updated as appropriate.
