PLEASE NOTE:

- All references to the Bay Shore NY DMS switch are associated with CLLI code BYSHNYBYDS0 and will not be repeated throughout this notice.

**Description of the Planned Network Change(s):**

The Verizon Bay Shore NY DMS switch, located at 35 Fourth Ave, Bay Shore, NY 11706, will be retired and removed from the network after all traffic served by this switch is migrated to the Verizon Deerpark NY CS2k switch, located at 85 W. Second Street, Deer Park, NY 11729. All traffic to be migrated includes, but is not limited to, Inter-LATA (ACCESS/FG-B-D/CLEC/IXC), wireless, and paging traffic.

**Description of Reasonably Foreseeable Impact(s) of the Planned Change(s):**

Competitive local exchange carriers (CLECs), interexchange carriers (IXCs, IECs), wireless carriers, and paging carriers will need to secure new trunk groups built to the Deerpark NY CS2k switch or have existing trunk groups to that switch augmented. Carriers that are code holders for access connectivity in the Bay Shore NY DMS switch will be required to reposition the codes to the Deerpark NY CS2k switch.

All ASRs for the Deerpark NY CS2k switch must be received no later than June 1, 2020 in order to provide sufficient time to migrate the traffic described above. These direct end office trunk (DEOT) interconnections will support traffic migration for the Bay Shore NY DMS switch prior to its eventual decommissioning. Local Exchange Routing Guide (LERG) change effective dates will be posted prior to decommissioning of the Bay Shore NY DMS switch (**on or after August 8, 2020**). This will serve to guide interconnect re-routes of traffic for the nine (9) native codes currently served by the Bay Shore NY DMS switch to reflect the Deerpark NY CS2k switch as the new home switch. All ASRs for the Deerpark NY CS2k switch must carry the project code of BYSHNYBYDS0.
