**Description of the Planned Network Change(s):**

The Verizon Marlton NJ EWSD switch, located at 10 Maple Avenue, Marlton, NJ 08053, will be retired and removed from the network after all traffic served by this switch is migrated to the Verizon Camden CS2K switch, located at 12 North 7th Street, Camden, NJ 08104. All traffic to be migrated includes, but is not limited to, Inter-LATA (ACCESS/FG-B-D/CLEC/IXC), wireless, and paging traffic.

**Description of Reasonably Foreseeable Impact(s) of the Planned Change(s):**

Competitive local exchange carriers (CLECs), interexchange carriers (IXCs, IECs), wireless carriers, and paging carriers will need to secure new trunk groups built to the Camden NJ CS2K switch or have existing trunk groups to that switch augmented. Carriers that are code holders for access connectivity in the Marlton NJ EWSD switch will be required to reposition the codes to the Camden NJ CS2K switch.

All ASRs for the Camden NJ CS2K switch must be received no later than **June 24, 2021** in order to provide sufficient time to migrate the traffic described above. These direct end office trunk (DEOT) interconnections will support traffic migration for the Marlton NJ EWSD switch prior to its eventual decommissioning. Local Exchange Routing Guide (LERG) change effective dates will be posted prior to decommissioning of the Marlton NJ EWSD switch (**on or after August 1, 2022**). This will serve to guide interconnect re-routes of traffic for the eleven (11) native codes currently served by the Marlton NJ EWSD switch to reflect the Camden NJ CS2K switch as the new home switch. All ASRs for the Camden NJ CS2K switch must carry the project code of **MARLNMADS5**.
