**Description of the Planned Network Change(s):**

Verizon will make changes to its Signaling System 7 (SS7) network and services resulting from its consolidation plan. The Verizon Syracuse NY Oracle STP switch, located at 210 South State Street, Syracuse, NY 13202, will be retired and removed from the network after all SS7 traffic served by this switch is migrated to the Verizon Garden City NY Oracle EAGLE STP switch, located at 714 Zeckendorf Blvd., Garden City, NY 11530. Also, the Verizon Utica NY Oracle STP switch, located at 280 Genesee Street, Utica, NY 13502, will be retired and removed from the network after all SS7 traffic served by this switch is migrated to the Verizon White Plains NY Oracle EAGLE STP switch, located at 111 Main Street, White Plains, NY 10601. All SS7 traffic to be migrated includes, but is not limited to, InterLata (Access/FG/CLEC/IXC), wireless traffic and paging traffic.

**Description of Reasonably Foreseeable Impact(s) of the Planned Change(s):**

SS7 Service providers with SS7 link terminations in Verizon's Syracuse NY and Utica NY Oracle STP switches will be contacted prior to the rehome to confirm new route set to the Garden City NY and White Plains NY Oracle EAGLE STP switches, respectively.

Due to Multi Point Code feature in these STPs, the 'older' Point code continues to exist in the Garden City NY and White Plains NY Oracle EAGLE STP switches. All necessary changes will be completed by Verizon.

SS7 service providers and any other affected carriers may need to alter their SS7 transport, OffNet services arrangements (services obtained from third parties) and/or Gateway services in order to access or continue serving customers served by offices currently homed to the Syracuse NY and Utica NY Oracle STP switches.
