**Description of the Planned Network Change(s):**

The Verizon East 37th St. 3 NY 5E switch, located at 221 East 37th Street, New York, NY 10016, will be retired and removed from the network after all traffic served by this switch is migrated to the Verizon Pearl St. NY C20 switch, located at 375 Pearl Street, New York, NY 10038. All traffic to be migrated includes, but is not limited to, Inter-LATA (ACCESS/FG-B-D/CLEC/IXC), wireless, and paging traffic.

**Description of Reasonably Foreseeable Impact(s) of the Planned Change(s):**

Competitive local exchange carriers (CLECs), interexchange carriers (IXCs, IECs), wireless carriers, and paging carriers will need to secure new trunk groups built to the Pearl St. NY C20 switch or have existing trunk groups to that switch augmented. Carriers that are code holders for access connectivity in the East 37th St. 3 NY 5E switch will be required to reposition the codes to the Pearl St. NY C20 switch.

All ASRs for the Pearl St. NY C20 switch must be received no later than September 1, 2025, to provide sufficient time to migrate the traffic described above. These direct end office trunk (DEOT) interconnections will support traffic migration for the East 37th St. 3 NY 5E switch prior to its eventual decommissioning. Local Exchange Routing Guide (LERG) change effective dates will be posted prior to decommissioning of the East 37th St. 3 NY 5E switch (**on or after November 1, 2025**). This will serve to guide interconnect re-routes of traffic for the thirteen (13) native codes currently served by the East 37th St. 3 NY 5E switch to reflect the Pearl St. NY C20 switch as the new home switch.
