Non-GAAP Reconciliations

As of September 30, 2026

verizon

Definitions - Non-GAAP Measures

Non-GAAP Measures

Verizon's Financial and Operating Information includes financial information prepared in conformity with generally accepted accounting principles in the United States (GAAP) as well as non-GAAP financial information. It is management's intent to provide non-GAAP financial information to enhance the understanding of Verizon's GAAP financial information, and it should be considered by the reader in addition to, but not instead of, the financial statements prepared in accordance with GAAP. Each non-GAAP financial measure is presented along with the corresponding GAAP measure so as not to imply that more emphasis should be placed on the non-GAAP measure. We believe that providing these non-GAAP measures in addition to the GAAP measures allows management, investors and other users of our financial information to more fully and accurately assess both consolidated and segment performance. The non-GAAP financial information presented may be determined or calculated differently by other companies and may not be directly comparable to that of other companies.

EBITDA and EBITDA Margin Related Non-GAAP Measures

Consolidated earnings before interest, taxes, depreciation and amortization (Consolidated EBITDA), Segment EBITDA and Segment EBITDA Margin are non-GAAP financial measures that we believe are useful to management, investors and other users of our financial information in evaluating operating profitability on a more variable cost basis as they exclude the depreciation and amortization expense related primarily to capital expenditures and acquisitions, as well as in evaluating operating performance in relation to Verizon's competitors.

Consolidated EBITDA is calculated by adding back interest, taxes, depreciation and amortization expense to net income.

Segment EBITDA is calculated by adding back segment depreciation and amortization expense to segment operating income. Segment EBITDA Margin is calculated by dividing Segment EBITDA by total segment operating revenues.

Consolidated Adjusted EBITDA and Consolidated Adjusted EBITDA Margin

Consolidated Adjusted EBITDA and Consolidated Adjusted EBITDA Margin are non-GAAP financial measures that we believe provide relevant and useful information to management, investors and other users of our financial information in evaluating the effectiveness of our operations and underlying business trends. We believe that Consolidated Adjusted EBITDA and Consolidated Adjusted EBITDA Margin are widely used by investors to compare a company's operating performance to its competitors by minimizing impacts caused by differences in capital structure, taxes, and depreciation and amortization policies. Further, the exclusion of non-operational items and special items enables comparability to prior period performance and trend analysis.

Consolidated Adjusted EBITDA is calculated by excluding from Consolidated EBITDA the effect of the following non-operational items: equity in earnings and losses of unconsolidated businesses and other income and expense, net, and the following special items: severance charges, acquisition and integration related charges, asset and business rationalization and loss on disposition of business. Severance charges recorded during 2026 and 2025 relate to separations in connection with workforce reduction initiatives. Acquisition and integration related charges recorded during 2026 and 2025 primarily relate to transaction and integration expenses associated with the acquisition of Frontier Communications Parent, Inc. completed in January 2026. Asset rationalization recorded during 2026 relates to the decision to cease use of certain real estate and network assets as part of our transformation initiatives. Asset and business rationalization recorded during 2025 predominately relates to the decision to cease use of certain real estate assets and exit non-strategic portions of certain businesses as part of our transformation initiatives. Loss on disposition of business recorded during 2026 relates to the classification of the assets and liabilities representing Verizon's international wireline connectivity and managed network services business as assets and liabilities held for sale.

Consolidated Adjusted EBITDA Margin is calculated by dividing Consolidated Adjusted EBITDA by consolidated operating revenues.

Net Unsecured Debt and Net Unsecured Debt to Consolidated Adjusted EBITDA Ratio

Net Unsecured Debt and Net Unsecured Debt to Consolidated Adjusted EBITDA Ratio are non-GAAP financial measures that we believe are useful to management, investors and other users of our financial information in evaluating Verizon's ability to service its unsecured debt from continuing operations.

Net Unsecured Debt is calculated by subtracting secured debt, a fifty percent equity credit related to junior subordinated notes, and cash and cash equivalents, from the sum of debt maturing within one year and long-term debt. Net Unsecured Debt to Consolidated Adjusted EBITDA Ratio is calculated by dividing Net Unsecured Debt by Consolidated Adjusted EBITDA. For purposes of Net Unsecured Debt to Consolidated Adjusted EBITDA Ratio, Consolidated Adjusted EBITDA is calculated for the last twelve months. We have not provided a reconciliation for our Net Unsecured Debt to Consolidated Adjusted EBITDA Ratio target because we cannot, without unreasonable effort, predict the special items that could arise in future periods.

Adjusted Earnings per Common Share (Adjusted EPS) and Adjusted EPS Forecast

Adjusted EPS and Adjusted EPS Forecast are non-GAAP financial measures that we believe are useful to management, investors and other users of our financial information in evaluating our operating results and understanding our operating trends without the effect of special items which could vary from period to period. We believe excluding special items provides more comparable assessment of our financial results from period to period.

Adjusted EPS is calculated by excluding from the calculation of reported EPS the effect of the following special items: amortization of acquisition-related intangible assets and acquisition and integration related charges.

We exclude the amortization of acquisition-related intangible assets because the amount and timing of such charges are significantly impacted by the timing, size, number and nature of the acquisitions we consummate. While we have a history of significant acquisition activity, we do not acquire businesses on a predictable cycle, and the amount of an acquisition's purchase price allocated to intangible assets and related amortization term are unique to each acquisition and can vary significantly from acquisition to acquisition. Exclusion of this amortization expense facilitates more consistent comparisons of operating results over time between our newly acquired and long-held businesses, and with both acquisitive and non-acquisitive peer companies. We believe that it is important for investors to understand that our non-GAAP financial measure adjusts for the intangible asset amortization but does not adjust the revenue that is generated in part from the use of such intangible assets.

Definitions - Non-GAAP Measures

We exclude the acquisition and integration related charges because the amount and timing of such charges are significantly impacted by the timing, size, and nature of the acquisitions we consummate. While we have a history of significant acquisition activity, we do not acquire businesses on a predictable cycle, and the related costs to integrate an acquired business into our operations are unique to each acquisition and can vary significantly from acquisition to acquisition. Exclusion of acquisition and integration related charges facilitates more consistent comparisons of our operating results with historical periods, and with both acquisitive and non-acquisitive peer companies.

We have not provided a reconciliation for our Adjusted EPS Forecast because we cannot, without unreasonable effort, predict the special items that could arise during 2026.

Free Cash Flow and Free Cash Flow Forecast

Free cash flow and free cash flow forecast are non-GAAP financial measures that reflect an additional way of viewing our liquidity that, we believe, when viewed with our GAAP results, provide management, investors and other users of our financial information with a more complete understanding of factors and trends affecting our cash flows. We believe they are more conservative measures of cash flow since capital expenditures are necessary for ongoing operations. Free cash flow and free cash flow forecast have limitations due to the fact that they do not represent the residual cash flow available for discretionary expenditures. For example, free cash flow and free cash flow forecast do not incorporate payments made or expected to be made on finance lease obligations or cash payments for business acquisitions or wireless licenses. Therefore, we believe it is important to view free cash flow and free cash flow forecast as complements to our entire condensed consolidated statements of cash flows.

Free cash flow is calculated by subtracting capital expenditures (including capitalized software) from net cash provided by operating activities. Free cash flow forecast is calculated by subtracting capital expenditures forecast (including capitalized software) from forecasted net cash provided by operating activities.
