## **Spectrum Bill Will Aid Consumers, Wireless Innovation**

*WASHINGTON – Reps. Doris Matsui, D-Calif., and Brett Guthrie, R-KY, leaders of the House of Representatives’ Communications and Technology Subcommittee Federal Spectrum Working Group, introduced today (July 18) the Efficient Use of Government Spectrum Act of 2013. The bill would require the FCC to pair for commercial auction the 1755-1780 MHz band with the 2155-2180 MHz band. The following statement should be attributed to Peter Davidson, Verizon senior vice president of federal government relations:*

“Consumers are continually demanding more wireless bandwidth to run a host of spectrum-intensive devices, services and applications. This legislation aims to supply the critical resource that serves as the rocket fuel for mobile broadband: spectrum.

“In combination with ongoing efforts by the administration, this bipartisan effort marks an important step to ensure wireless networks have the capacity to serve consumers who depend on their performance, while also maintaining important safeguards to protect the Department of Defense and other federal agencies in the spectrum-reallocation efforts.

“Verizon applauds Representatives Matsui and Guthrie for their leadership and looks forward to working with them, other members of Congress, and the administration to see this legislation passed into law in time to meet the auction deadlines established in the last Congress and to ensure the timely repurposing of federal spectrum and deployment of services to meet ever-increasing consumer demand.”

Verizon Communications Inc. (NYSE, Nasdaq: VZ), headquartered in New York, is a global leader in delivering broadband and other wireless and wireline communications services to consumer, business, government and wholesale customers. Verizon Wireless operates America’s most reliable wireless network, with more than 100 million retail connections nationwide. Verizon also provides converged communications, information and entertainment services over America’s most advanced fiber-optic network, and delivers integrated business solutions to customers in more than 150 countries, including all of the Fortune 500. A Dow 30 company with nearly \$116 billion in 2012 revenues, Verizon employs a diverse workforce of 180,900. For more information, visit [about.verizon.com](http://about.verizon.com).
