# State COVID-19 Vaccine Registration Portals

As of 4.19.2021

Some U.S. states have launched websites where individuals can enter their information for use by the state in developing its distribution plan. Those states that have launched registration websites open to V Teamers (or that have otherwise issued guidance that V Teamers may be currently eligible) are listed below. We are monitoring these platforms, including registration websites being launched at a county level instead of at a state-wide level, and will update this chart as more information becomes available.
