Fact sheet.

First to tomorrow.

At Verizon, we don't wait for the future. We build it.

Our purpose is to deliver the promise of the digital world by enabling people, businesses and society to innovate and drive positive change. We create business value by earning customers’ trust, minimizing our environmental impact, and maximizing customer growth while creating social benefit through our products and services.

One example: Verizon is far and away the established leader in 4G LTE wireless networks. But “established leadership” isn’t enough. So we’re surging ahead to build game-changing 5G networks more powerful than anything that has come before.
