Description of the Planned Network Changes: Verizon will install Digital Subscriber Line Access Multiplexer ("DSLAM") facilities in the above-referenced Remote Terminals.

Description of Reasonably Foreseeable Impact of the Planned Changes: After the planned network changes are implemented, xDSL-compatible copper (metallic) loops leased by a wholesale carrier customer from Verizon and attached to a wholesale carrier customer's DSLAM collocated within the above-referenced Central Offices could encounter spectral interference as a result of the aforementioned network change.
