Short Term Public Notice of Network Change Under Rule 51.333(a)

Verizon VoIP Interconnection Service
Dated August 31, 2004

Notice of Network Change Rescinded

January 21, 2005

Network Change

This letter is to inform you of that a notice of network change that Verizon mailed to your company in September 2004 (although not filed with the Federal Communications Commission) has been withdrawn. The service, entitled Verizon VoIP Interconnection Service was described in the notice as providing an IP interface for service providers to terminate calls in an IP format without protocol conversion to Time Division Multiplexing in Verizon service areas.

The previous notice indicated that the interface would be phased-in beginning in February and throughout 2005 in locations across the Verizon footprint where IP/VPN service is offered. The service may be reinstated at a later date. If so, you will be advised accordingly.
