**Description of the Planned Network Change(s):**

New York City has informed Verizon that existing Verizon copper cables in the West Staten Island, New York central office are in the path of pending sewer-related construction and must be moved. In connection with that move, Verizon is replacing those copper facilities with fiber facilities and retiring a number of copper facilities serving the locations listed on the attached Exhibit A. Verizon has deployed its fiber-to-the-home network in these locations and will continue to provide services over a fiber network infrastructure.

**Description of reasonably foreseeable impact(s) of the planned change(s):**

After the retirement of the copper facilities, Verizon will: (1) no longer offer services over copper facilities; and (2) cease maintaining the copper facilities. However, to the extent required by applicable agreements and federal law, Verizon will offer to requesting carriers a 64 Kbps voice-grade channel.

## Exhibit A
