Network Changes and Trunk Rearrangements:

The Williamsburg NY C20 switch will be the recipient office of traffic migrated from the Franklin NY 5E switch. Traffic bound for the code listed in Table B will be delivered via the Deerpark 03T Tandem (DRPKNYDP03T intra-lata and inter-lata FG Access SHA).

After all traffic is migrated off of the Franklin NY 5E switch, this switch will be retired and removed from the network.

CLECs, IXCs, IECs, wireless carriers and paging carriers will need to secure new trunk groups built to the Williamsburg NY C20 switch or have existing trunk groups to that switch augmented. Carriers that have direct end office trunk (DEOT) with access connectivity in the Franklin NY 5E switch will be required to reposition the codes to the Williamsburg NY C20 switch.

All ASRs for the Williamsburg NY C20 switch must be received no later than May 1, 2024 to provide sufficient time to migrate the traffic described above. All traffic must be moved by July 1, 2024. All ASRs for the Williamsburg NY C20 switch must carry the project code of **WDMRNYFRDS0**.

Please adhere to industry standards using normal procedures that pertain to updates and changes to the LERG for all NXXs subject to the retirement of the Franklin NY 5E switch.
