<p>Contractor's Description of Service, include required service description, features and additional features offered by Contractor: DS1 service includes DS1 digital data circuits. DS1 service supports point-to-point digital data circuits up to 1.544 Mbps providing full duplex, four-wire, synchronous serial digital data transport.</p>
<p>Geographic Availability: Based upon availability of facilities including Sacramento and Los Angeles.</p>
<p>Service Limitations and Restrictions: Service availability including CLLI Codes FROKCA11W12 and LSAACA03.</p>
<p>State Associated Administrative Fee (SAAF) Charge: Services identified below with "Yes" in the SAAF Applied column will have a 2.5% fee applied to the Monthly Recurring Charge or usage. Charges below do not include the SAAF. The SAAF will appear as a separate line on the customer's invoice.</p>

<p>Telecommunications Service Priority (TSP) Emergency Provisioning or Essential Provisioning are available on a per circuit one time charge with (e.g. customer location access circuit) or without (e.g. carrier backbone circuit connection) Local Exchange Carrier (LEC) terminations.</p> <p>TSP Emergency Provisioning is provided in response to an emergency, when the Customers need for a service is critical and must be provisioned at the earliest possible time, without regard to the cost to the Customer. In Emergency Provisioning Verizon will take immediate action to allocate the resources necessary to provision circuit(s) assigned an Emergency Provisioning priority level as soon as possible, including dispatching personnel outside normal Company business hours.</p> <p>TSP Essential Provisioning is provided for new essential National Security (NS)/Emergency Preparedness (EP) service that must be installed by a specific date that cannot be met using normal Company business procedures. In Essential Provisioning, Verizon will adjust its resources to make its best effort to provision the circuit(s) assigned an Essential Provisioning priority level, by the requested service due date, based on the priority level assigned. This requires a TSP Local Access Channel Charge for Provisioning or Restoration.</p>

<p>TSP Priority Restoration are available on a per circuit one time and monthly charge with (e.g. customer location access circuit) or without (e.g. carrier backbone circuit connection) Local Exchange Carrier (LEC) terminations by state.</p> <p>TSP Priority Restoration designation establishes priorities for restoring NS/EP service in the event of an outage or failure of multiple services. Verizon will dispatch personnel outside normal business hours if necessary to restore circuit(s) construction assigned a Priority Restoration level of 1, 2, or 3. Verizon will dispatch personnel outside normal business hours to restore circuits a Priority Restoration Level of 4 or 5 only when the next business day is more than 24 hours away. This requires a TSP Local Access Channel Charge for Provisioning or Restoration.</p>
