

Dedicated E-Line | Point to Multi Point

Quote Job Aid

Dedicated Ethernet service between a new end point and an existing NNI.

Things to Know

- The existing contract ID field is being renamed to Pricing ID. This field indicates whether the pricing is standard contractual or promotional. It is not specific to promotions. When a promotion drives the pricing, it will contain the value of the Promo, but it does not just indicate pricing related to promotions.
- An additional value of "New" will be available in the Pricing ID field. Selecting the value of "New" enables a quote to be created without an existing contract. Existing contract IDs will continue to appear as selections in the Pricing ID drop down as applicable.

Getting Started

There are **three** ways to create a Quote

Option 1: From **Shop**

Option 2: From **Quick Links**

Option 3: From **Quote Worklist**

Quoting Tips

1. A quote must be submitted in order for it to be converted to an order
2. Quotes in Submitted, Pricing Requested or Pricing Review status cannot be edited
3. In order to generate an additional quote, add a new row to the group and populate the requested information
4. Co-location addresses will default to Off Net pricing (Co-location override must be selected via Additional Features during the quote journey)
5. From the Quote Summary page, the group quote information can be downloaded into a csv file
6. You can manually add up to 250 locations
