

Endpoint Security powered by Check Point

Available through the Verizon Business Marketplace.

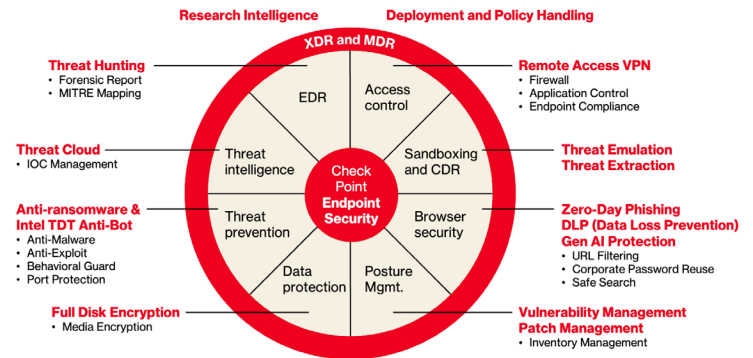

Why Verizon Business Marketplace?

A smarter way to buy endpoint security solutions. Helps streamline your tech stack with a platform designed for modern business needs.

- **The all-in-one advantage:** A true one-stop destination for quick, reliable and secure networking solutions designed to help your essential daily operations.
- **Seamless compatibility:** Curated network solutions to help ensure smooth integration across your network.
- **Administrative ease:** Help reduce overhead with unified network vendor management and a single bill.
- **Effortless procurement:** Help simplify how you find, buy and deploy the networking tools your team needs to get work done.

360° Endpoint Security

What is Check Point's Endpoint Security?

Check Point's Endpoint Security is an AI powered sophisticated endpoint security solution designed to protect laptops, desktops and servers against the most imminent cyber threats, including ransomware, malware and phishing attacks. Check Point's Endpoint Security integrates seamlessly with Check Point's broader security architecture, including network, cloud and mobile security solutions, enabling unified policy management and threat intelligence sharing across all environments. Check Point Endpoint Security can operate independently without constant cloud connectivity, while still offering cloud-based management options for centralized visibility and control, and can be installed and managed. Check Point's Endpoint Security has been recognized as a leader by both Frost & Sullivan¹ and GigaOm.²

Features

Ransomware and Malware Protection: Fortifying organization data against sophisticated ransomware attacks.

Zero-Phishing and Browser Protection: Blocks the most sophisticated phishing attacks with zero impact on end users.

Extensive OS Support: With wide range of supported Operating Systems, including Windows, Mac, Linux, Servers, VDI, browsers and mobile devices.

Threat Intelligence: Check Point's Big Data Threat Intelligence AI provides zero-day protection with more than 60 AI engines.

Data Protection and GenAI Security: Safeguarding Sensitive Data Loss with Full Disc Encryption, advanced DLP Capabilities and innovative GenAI Security, to keep valuable data safe and maintain compliance and regulation.

Posture Management: Vulnerabilities are automatically detected and the weaknesses are remediated enterprise-wide, with a single click.
