Staying competitive in a tech-driven world isn’t easy. You need to move fast but also take careful measures to protect sensitive company and customer data. With the right partner, you can focus on growing your business without compromising your most valuable assets. Start with a secure dedicated internet connection. The latest Meraki hardware can help mitigate cybersecurity threats while 4G LTE backup prepares you for when the unexpected comes your way.

Customer benefits
- Self-Managed Cloud-Controlled Security and SDN capability built into Meraki devices
- Verizon Care concierge service desk takes the first call for network equipment and Verizon-provided network issues
- Business continuity over Verizon 4G LTE Wireless backup service with auto-failover (up to 10Mbps)

Top business challenges
- Ensuring business connectivity and customer satisfaction
- New security standards and concerns are often combined with the need to upgrade aging or dispersed hardware
- Control over networking and security policies
- Invest in solutions that are known and proven in the market to minimize risk of upgrade barriers

Wireless backup
- Fully configured 4G LTE backup with automatic failover (speeds up to 10MB)
- SIM activated on a world class network
- 1G of data included (additional plans available for an additional cost)**

The Latest Self-Managed Routing Hardware
- A self-managed cloud controlled security appliance that is an intuitive, all-in-one, enterprise-grade firewall providing a robust suite of advanced technologies.
- Site-to-Site and Remote Access VPN capabilities including WAN balancing, failover, and high availability
- Intelligent Path Control
- Monthly recurring payments (MRP) with no upfront fees*
- Verizon Care support / concierge "white glove" service
- Optional WiFi / Wireless LAN

Why this bundle is a no-brainer
- Integrated self-managed network and security solution by two market leaders, Verizon and Cisco Meraki
- Helps increase business continuity with 4G LTE backup
- Dedicated bandwidth up to 400Mbps and consistent speed with internet vs. Broadband Services which can be variable and latency prone when business velocity is needed most
- Strong integrated layers of security
- Robust, world-class SLAs

Why Verizon
- Fast, reliable connections with dedicated bandwidth to support the performance needed by critical applications
- Our Dedicated Internet Access is backed by stringent SLAs and flexible quality-of-service (QoS) options
- Our current promotion provides affordable pricing for Dedicated Internet Access
- Our single-provider Dedicated Internet Access is supported by an extensive global IP backbone
- With our 4G LTE backup, you can maintain critical communications in the event of a wireline outage over the largest 4G LTE network in the U.S.

** Internet Dedicated pricing varies based on speed. Shipping and handling covered separately.
