

Simply deliver multi-cloud application experiences.

Fact sheet

Reliable and secure application connectivity located anywhere.

Your workforce and customers deserve access to applications like any other fast and secure SaaS application. With Multi-Cloud App Access Manager, cloud architects can deliver exceptional user experience and provide secure access to enterprise applications for users, both internally and externally, in your organization.

Slow user to application problems? Not sure if all applications are secure? We help you deliver the optimal application experience - and keep you on track with your Digital transformation journey – with our application experience solution.

The productivity of your workforce needs fast, reliable and secure access to mission-critical applications.

Multi-Cloud App Access Manager enables enterprises to modernize application access by allowing them to:

1. Quickly onboard applications across multiple clouds and regions
 2. Determine the application experience level
 3. Make data-driven cloud infrastructure decisions
- ...and all this with just a few clicks

With Multi-Cloud App Access Manager, Verizon can provide customers with the ability to deliver optimized application experiences using customer integrated connectivity and multi-cloud services.

Key outcomes:

Focus on the experience

Forget about stitching together an application experience manually. Deliver a consistent application experience that you control regardless of the underlying connectivity. And make infrastructure transparent and simple while providing a secure and fast application experience across multi-cloud solutions

Cloud native

Go all in on the cloud and harvest the benefits of a truly elastic cloud native architecture with services that can help with performance, increase visibility, control and agility.

Single enterprise application ecosystem

Deliver and access applications across cloud environments using Verizon or third party Internet solutions and Multi-Cloud App Access Manager, with administrative control that allows you to enforce enterprise policies per user, per app or per region.

Why Verizon

It's amazing the things technology can do. When companies take advantage of technology, they don't just drive business, they can change the world. Discover how Verizon can help your organization increase productivity, improve the efficiency of your communications and control costs.
