Secure internet connectivity that you control.

Verizon Internet Dedicated with Cisco Meraki and 4G LTE Wireless Backup

Your business is unique. Your internet service should be too.

Staying competitive in a tech-driven world isn’t easy. You need to move fast but also take careful measures to protect sensitive company and customer data. With the right partner, you can focus on growing your business without compromising your most valuable assets. Start with a reliable dedicated internet connection. This solution with the latest Cisco Meraki hardware and 4G LTE Wireless Backup can help mitigate cybersecurity threats, so you can stay prepared when the unexpected comes your way.

Verizon Internet Dedicated with Cisco Meraki and 4G LTE Wireless Backup does just that. You’ll experience bandwidth options up to 400 Mbps and a Cisco Meraki self-managed cloud controlled security appliance that is an intuitive, all-in-one, enterprise-grade firewall with Verizon 4G LTE Wireless Backup to meet your networking needs.

The services also deliver:

- Robust security features including built-in stateful firewall and next-generation security and Malware protection
- Simple to deploy, operate, and maintain with automatic software and security updates delivered from the cloud.
- Cost effective Cisco Meraki solution complete with intuitive dashboard
- Fully configured 4G LTE Wireless Backup with automatic failover (speeds up to 10MB)
- Additional features include wifi and security cameras
