

Keep large field teams connected with Mobile Command Center 2.0.

Flyer

A rugged and reliable mobile communication solution, built for tough conditions

Your teams need reliable ways to communicate, especially when they're on the go and at the edge of wireless networks. Harsh conditions require weatherproof, rugged mobile solutions that you can easily move and quickly deploy to provide those critical voice and data communications.

That's why Verizon has partnered with VPP CSG to offer Mobile Command Center 2.0. This on-demand mobile network and call center is designed to support teams of more than 25 with rapid deployment and reliable mobile communications. MCC 2.0 harnesses the Verizon Wireless network for fast, reliable connectivity, even in the most remote locations and the harshest conditions.

MCC 2.0 harnesses the Verizon Wireless network for fast, reliable connectivity, even in the most remote locations and the harshest conditions.

Power and connectivity in any configuration you need.

The Mobile Command 2.0 is equipped with a suite of modular components to deliver power, connectivity and VoIP phones in any configuration you need to fulfill your mission.
