

The background of the advertisement is a photograph of the United States Supreme Court building. The building is a large, white, neoclassical structure with a prominent portico supported by tall columns. The pediment above the columns is filled with a relief sculpture. The words "EQUAL JUSTICE UNDER LAW" are inscribed on the frieze. The sky is blue with some white clouds. In the foreground, there are some green bushes and a black lamppost on the left.

Meet the mission with a
wiser WAN.

**Verizon Government Cloud
Managed Software Defined
Wide Area Network SaaS for
US Federal Government**

Managed SD WAN enables better use of network capacity by providing more intelligent control over network services.

Application-aware routing

Our Managed SD WAN solutions use application-aware routing to guide your data along the right path to its destination.

Network optimization

With Managed SD WAN, you can keep private networks clear for more demanding apps and send less-critical data over public networks.

Business focused

Now, your IT can stay focused on core projects instead of managing networks.

Benefits

- Automation
- Efficiency
- Rest easy
- Innovation

Features

- Networking expertise
- Automated monitoring
- Multi-vendor support

Managed SD WAN Drivers

Agency re-organizations

- Reduce asset segmentation
- Manage incremental/additional costs
- Increase applications visibility
- Accommodate limited execution window

Digital experience enhancement

- Improve customer experience
- Enhanced role based access control
- Agency direct ordering via secure Verizon portal

Geographic expansion

- Rapidly deploy sites
- Increase site connectivity options
- Maintain consistent operations across sites
- Manage application and infrastructure performance

Network transformation effort

- Create structural-costs efficiencies
- Provide defense-in-depth security
- Deliver reliable application performance
- Enable business agility
- Offer a consumerized user experience
