Flexible internet for the way your business moves

Verizon Business Internet On-the-Go:
an agile way to stay connected

Secure, reliable internet wherever business happens

When your business is on the move, you need your internet to keep up. Business Internet On-the-Go provides a simple, flexible way to stay connected nearly anywhere you do business.

Set up a high-speed internet connection at your location, powered by the LTE or 5G network. Pair with a select Verizon-provided data device that's portable and battery-powered to get connected at unpowered sites, so your team can get the job done.

Fast internet plan

Predictable monthly cost

Select portable device

Simple and predictable plan pricing

\$45 per line/month¹
unlimited data²

200 GB/line/mo of high-speed data, then unlimited lower-speed data

More than a connection

With Business Internet On-the-Go, you can add features to enhance security and control – for simple, flexible solutions designed to help keep your business moving.

Available add-on solutions³ include:

- **Verizon Business Internet Security:** Help protect data and operations from cyberthreats.
- **Verizon Mobile Private Network:** Get secure, reliable access to critical applications.
- **Verizon Persistent DNS:** Help keep your network traffic moving smoothly.

Why Verizon?

We bring the strength of America's most reliable 5G network⁴ along with the scale and expertise to help keep you connected where your work takes you.

Contact your Account Representative or visit [verizon.com/business/products/internet/portable-internet](https://www.verizon.com/business/products/internet/portable-internet) to learn more about Business Internet On-the-Go.

1. Plus taxes, fees and device cost

2. Business Internet On-The-Go Plan available to business customers with month-to-month or device payment agreement and with select Verizon-provided device; plan may not be activated on customer-provided device. Unlimited 4G LTE & 5G Ultra Wideband (UWB) data with download speeds up to 50 Mbps. After 200 GB/line/mo, data speeds reduced to up to 600 Kbps. 5G access requires a 5G-capable device. No domestic or international roaming. Plan reflects maximum available download speeds, which may vary. Upload speeds also vary & will be lower than download speeds. In times of network congestion, data speeds may be temporarily slower than other traffic. Taxes, fees and add'l terms apply.

3. Verizon Business Internet Security (VBIS) is not compatible with Mobile Private Network, Verizon Persistent DNS (PDNS) and Public Static IP. Customers with these solutions will lose them if VBIS is added to the line. PDNS: Available when lines are provisioned on the 5G Core; not available in all locations. Add'l terms apply for each solution.

4. Based on RootMetrics® United States RootScore® Report: 1H 2026. Tested with best commercially available smartphones on three national mobile networks across all available network types. Your experiences may vary. RootMetrics rankings are not an endorsement of Verizon.
