

# Help protect what matters most with GenAI-enabled threat detection

**Verizon's Managed Extended Detection and Response with Accenture combines expert-led protection, automation and deep threat intelligence to help keep your business secure with a 24/7 solution.**

**Security threats are growing in both volume and sophistication, often outpacing businesses and rendering traditional security models incomplete. Managed XDR with Accenture can help you offload security operations without losing control—delivering near real-time visibility, automated response and expert support—each tailored to your unique environment.**

Building a sophisticated Security Operations Center (SOC) can be a massive undertaking—often requiring deep expertise, dedicated personnel, significant time investment and a near-limitless budget. Managed XDR with Accenture provides always-on monitoring, detection, threat intelligence and incident response, under one offering.

Managed XDR with Accenture can help you reduce complexity, cut alert noise and streamline investigations, so your team can focus on what matters most.

Supported by Google's and Accenture's GenAI, Managed XDR with Accenture continuously learns and adapts to your environment. With prebuilt detection content, response playbooks, curated threat intel and ongoing tuning, we can help you strengthen defenses without overloading your internal resources.

Whether you're just getting started or looking to mature your security program, Managed XDR with Accenture can meet you where you are—and helps scale with you as you grow.

This offering brings a sophisticated and purpose-built Fortune 100 proven solution to Verizon's broad network of customers.

## Benefits

Discover how the Managed XDR with Accenture offering can help protect your business with these core benefits:

**24/7 expert-led coverage:** Gain around-the-clock detection and response from Accenture's global Cyber Fusion Centers without hiring a full-time team.

**Automated threat response:** Triage, SOAR integration and built-in playbooks can help your team act quickly, minimize impact and reduce manual effort.

**Broad visibility across your environment:** Monitor key aspects of your organization, including, but not limited to cloud, endpoint, SaaS and identities through a centralized platform that can work with the tools you already use.

**Intelligence that helps drive outcomes:** Over 60 sources of intelligence, which will include Mandiant and Virus Total curated and applied 24x7 and ongoing detection tuning and insights drawn from real-world attacks—helping you improve over time.

## Why Verizon

For nearly 25 years, Verizon has been helping security leaders and their teams achieve and maintain that elusive balance between tactical excellence and strategic influence. We offer a robust and proven portfolio of managed and professional services that can help enable security teams to improve their operations, from threat identification and detection to response and recovery. The experience of the Verizon and Accenture teams can help you reduce the need to recruit, hire and retain the right people to build & scale critical security capabilities.

From complex multinational enterprises and small and medium businesses to local, state and federal agencies, every organization has their own unique threat profile, risk tolerances and strategic business objectives. So a one-size-fits-all approach to security is simply not enough. At Verizon, we can meet your security program where it is, and we can help you get it where you want it to be.
