# 7 benefits of migrating from an on-premises PBX to the cloud.

**81** of organizations are currently using or plan to migrate to cloud calling solutions in the next 2 years.

**82%** of IT decision-makers somewhat agree, agree, or strongly agree that a cloud strategy is essential to remaining competitive.
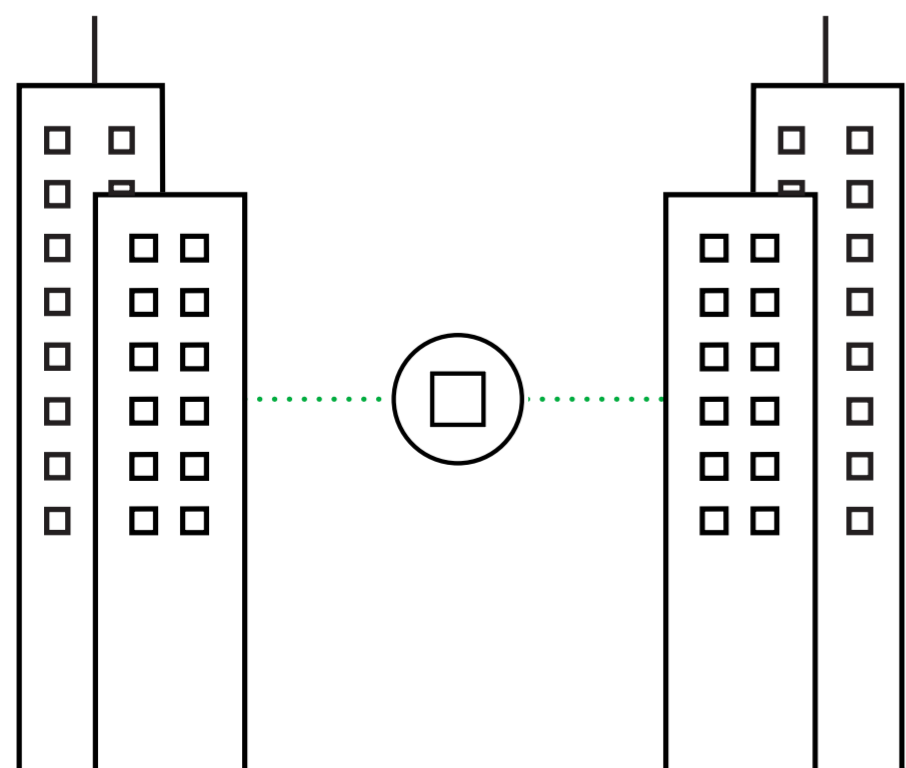

## Cloud calling and collaboration solutions offer dramatic advantages over on-premises systems:

**1 Unify business communications**
A unified cloud solution offers enterprise-grade calling, video meetings, team collaboration and messaging all on one platform so users don't need to navigate multiple disparate programs or applications.

**2 Boost flexibility for your business**
Cloud solutions are flexible, scalable, and easy to set up, allowing you to easily add services or remove users at any time. Providers offering 99.999% uptime SLA ensure your business never halts.

**3 Reduce infrastructure and management costs**
Best-in-class cloud solutions are hosted in top-tier, redundant data centers. No capital investments, on-site hardware or maintenance contracts.

All aspects of the infrastructure are managed and monitored 24/7/365 by the cloud provider.

**4 Ensure security and compliance needs are met**
Cloud solutions offer robust, in-depth security and assistance with compliance needs (CCPA, GDPR, HIPAA, FINRA), protecting your business and customers from outages and breaches.

**5 Benefit from constant innovation**
Continuous, automatic delivery of new features and software updates means no downtime, no impact to users or disruption to your business, and access to leading edge enhancements.

**6 Simplify multi-location management**
A single solution with global availability is faster to implement and easier to manage, and can be administered from a single interface using a desktop or mobile phone.

**7 Support mobile and remote workers**
Users can securely access their business phone number and other features like team messaging and video meetings anytime, anywhere on their preferred device – mobile phone, tablet or PC.

## Move to the cloud

**Legacy, on-premises systems can significantly hinder collaboration.**

**With cloud communications, your teams are fully prepared to overcome the challenges of the modern workplace.**
