Make your devices mission-ready

Get access to resources for dedicated, secure and high-speed connectivity on the mobile devices you use most with Verizon Frontline Network Slice.

Your communications aren't just important. **They're mission critical.**

Fast, reliable connectivity is nonnegotiable in the field. But on shared networks, first responder communications and data might face delays, especially during periods of high network congestion or in population-dense environments.

78% of surveyed first responders say access to a reliable and resilient network delivers better communications in the field.[1]

63% of surveyed first responders want a stronger connection in the field.[2]

Get dedicated resources for communications and data.

Verizon Frontline Network Slice for mobile devices equips first responders with dedicated 5G Ultra Wideband network resources on certified laptops, tablets and smartphones.

Tailored performance
Optimizes data traffic for the operational needs of first responders

Enhanced reliability
Reduces risk of disruption to mission-critical applications, even during periods of high network congestion

Security
Helps protect data with built-in security on a 5G standalone core

Prioritization
Delivers always-on priority, preemption[3] and quality of service

Flexible scalability
Automatically adjusts network resources across applications and users based on real-time needs

Peak performance, **device by device**

With Verizon Frontline Network Slice available on certified laptops, tablets and smartphones, you can help ensure that life-saving applications perform at their best, even when the network is crowded.

Mission control in the field
Verizon Frontline Network Slice - Laptops

- **Access computer-aided dispatch (CAD) systems.**
- **Run record checks.**
- **View digital floor plans.**

Dedicated 5G resources on laptops allows first responders to run mission-critical applications without being tethered to an office or vehicle.

Built for real-time visuals
Verizon Frontline Network Slice - Tablets

- **Stream video from drones and bodycams.**
- **Access CAD maps.**
- **Analyze visual data.**

Help improve situational awareness with dedicated connectivity that's designed to handle data feeds fast, even in congested network environments.

Response-ready and reachable
Verizon Frontline Network Slice - Smartphones

- **Communicate across teams.**
- **Send and receive critical updates.**
- **Pull data in near real time.**

Smartphones are essential, always-on devices for first responders. Verizon Frontline Network Slice - Smartphones can help keep them connected from the station to the vehicle to the incident.

Why Verizon Frontline?

Verizon Frontline is the advanced network and technology for first responders. We're committed to providing the support, solutions and proven expertise you need to stay connected and in control.

#1
network choice in public safety[4]

30+
years working with first responders

45K+
agencies choose us[5]

Built on America's most reliable 5G network[6]
