

Boost your video calls

Help prioritize your most important conversations with Verizon 5G Mobile Network Slice - Enhanced Video Calling.

Key takeaways

- Sidestep network congestion to avoid lag and jitter on high-stakes video calls
- Maintain video quality with an easy, affordable add-on to a Verizon Enterprise Choice Unlimited plan
- Get a stable connection with 5G Mobile Network Slice - Enhanced Video Calling

Communication that drives momentum

Communication is the currency of your business – and important conversations often happen on the go. In those moments, an unreliable video connection is the last thing you need. When calls drop or buffer, decision-making can stall, momentum can falter and the impression your organization leaves can take a hit.

In today's world of business, missed communication equates to missed opportunities. That's why you need a network that can help keep the conversation and collaboration going when it matters most.

Where standard 5G falls short

On public 5G networks, your video calls are competing for bandwidth, which means video quality can drop during peak hours and in congested areas. Instead of getting things done, you get buffering, jitter, delays and disruption.

Video that sets the standard

Built to help you overcome the limitations of public networks, 5G Mobile Network Slice - Enhanced Video Calling maintains your video calls on the go during network congestion.

Clear video and audio

Help stay on top of critical conversations during congestion with video powered by a low-latency connection.

Uninterrupted collaboration

Help streamline working sessions with connectivity you can rely on even during peak times and in crowded areas.

Stable connection

Get a network slice that works like a private office, preserving your connection from congestion, competing devices and peak-hour demand.

Zero-threshold performance

Our consistent network quality doesn't degrade after you hit a data threshold – because there is no threshold. 5G Mobile Network Slice - Enhanced Video Calling maintains your video traffic, without compromise.

Connecting your team your way

Get access to uncapped connectivity with your Enterprise Choice Unlimited plan, compatible with many of the latest devices and essential videoconferencing applications.

An easy, affordable add-on

Add 5G Mobile Network Slice - Enhanced Video Calling to your Enterprise Choice Unlimited plan, which gives you the flexibility to choose from a range of devices and contract terms to fit your needs.

5G standalone-capable devices

- Apple iPhone 14 and newer
- Google Pixel 9 and newer (excluding 9a)
