

When lives are on the line, you need to be able to collaborate instantly.

Push to Talk Plus

Whether you're up against a project deadline or responding to an emergency, instant communication is critical when every second counts. That's why we built Verizon Frontline, the advanced network and technology to help public safety and first responders on the front line communicate when they need it most. With Verizon Push to Talk Plus (PTT+), you can talk to a single field employee or with groups of up to 250 people with just the push of a button.

PTT+ runs on America's most reliable network,¹ or over Wi-Fi. With one-second call setup and exceptional voice quality, PTT+ helps your business do more, faster.

More speed, more devices and more efficiency

Verizon PTT+ gives you advanced communication capabilities, including:

- **Reliable networks**—PTT+ works over our nationwide 4G LTE and 5G networks or over Wi-Fi, giving you the extensive and reliable coverage your dispersed workforce needs to stay connected
- **Push to Connect**—Simply and easily share texts, alerts, photos, videos, location info, voice messages and documents
- **Interoperability with land mobile radio (LMR)**—LMR interoperability allows employees with radios to communicate with those without radios to help control costs, expands system capacity and extends the coverage area
- **A wide selection of devices**—Choose from basic devices; ruggedized and nonruggedized smartphones, including Android® and Apple® platforms; and select tablets
- **Fast connections**—Approximately one-second call setup and low latency allow you to easily select your contact or group name and start speaking right after you push the talk button
- **Large groups**—Instantly connect with up to 250 people simultaneously, eliminating the need to reserve conference numbers and wait for participants to join
- **Dispatch Console**—Make and receive calls, monitor groups,

get near real-time workforce information, record calls and access activity logs

- **Group management**—Create up to 1,000 groups with up to 250 members each and manage settings, such as allowing for sending and receiving, or send or receive only
- **Group broadcasting**—Reach up to 500 people at once when you create a broadcast group
- **Cross-carrier collaboration**—The PTT+ application works on devices connected to other carrier networks, helping to keep everyone on your team connected
- **Late join/rejoin capabilities**—Participants can conveniently join or rejoin a group call, even after the meeting has started or if they accidentally drop
- **Robust online contact management tools**—When you make modifications, contact lists on all assigned PTT+ devices are automatically updated in near real time to your entire organization
- **Talker priority**—PTT+ group functionality allows a participant to be assigned the role of “supervisor” to keep group calls on task and productive
- **One Touch devices available**—Assign a specific contact or group to a push-to-talk (PTT) key

Enhance your Push to Talk Plus experience.

To give you greater flexibility to customize how you collaborate, PTT+ now comes with Group Advanced and Group Command, our two new, optional add-on feature bundles.

Group Advanced includes:

- **Urgent calling**—With the highest priority on the PTT+ platform, this call has a new tone and will interrupt any ongoing PTT+ call
- **Large groups**—Increase group size up to 3,000 members

Group command includes:

- **Group Advanced**—Urgent calling, large groups and more
- **User check**—Allow authorized PTT+ clients and dispatchers to obtain helpful user information such as presence and location, device signal strength and device battery level
- **Discreet listening**—Enable authorized users to remotely listen to any PTT+ call

We create connections.

Advanced technology is at the core of everything we do. With a proven track record of fast and reliable connectivity, Verizon has the tools and capabilities to help your workforce.

Connectivity

We provide connections over the nation's most reliable network.¹

Speed

PTT+ gives you fast call setup – approximately one second – and low latency.

Quality

Get high-quality voice communications for rugged, mission-dependent, covert and high-risk environments.
