

RingCentral with Verizon

Solution brief

Message Video Phone for the connected enterprise offers all-in-one business communications.

Now you can streamline communications and collaboration on one platform while seamlessly integrating all your essential business applications. Empower your enterprise with messaging, video meetings and calls from anywhere, on any device.

Seamless, real-time communication is more critical than ever. Enterprises need agile communication solutions that can keep pace with rapidly changing workplace dynamics. In this new distributed workplace, it's essential to keep your employees productive and connected wherever they are.

RingCentral with Verizon is an easy-to-use, reliable, all-in-one cloud-based platform that gives your workforce the flexibility it needs to collaborate and be productive from anywhere, freeing you to focus on growing the business and delivering exceptional experiences to customers and employees alike.

The way we work has changed forever.

Percentage of business leaders who will allow employees to work remotely at least part of the time¹

Achieve more with cloud-based tools and enterprise-grade reliability.

RingCentral with Verizon harnesses the power of the cloud to help today's modern, mobile enterprises communicate faster, smarter and more effectively than ever before. Built on a secure and reliable cloud communications and collaboration platform, RingCentral with Verizon goes beyond cloud PBX—combining voice, team messaging, collaboration, video conferencing and online meetings.

Available across multiple devices—from smartphones, tablets and computers to desk phones—RingCentral with Verizon is a unified communications and collaboration as a service (UCCaaS) solution that scales with your business, making it easy to use and manage from a single platform.

With a robust set of open application programming interfaces (APIs), RingCentral with Verizon enables businesses to seamlessly embed communications into business applications, improving workflow productivity. Enterprises rely on RingCentral with Verizon to connect their workforces, build relationships with customers, share knowledge and get work done—how they want, wherever they want.

Modern, seamless, reliable

RingCentral with Verizon delivers industry-leading cloud Message Video Phone™ applications integrated across Verizon's ecosystem of connectivity, mobility and industry-specific solutions. It brings the power of an enterprise-grade PBX with modern apps and open APIs, delivered with end-to-end quality of service and ongoing innovation.

Customize or design your system with the RingCentral Connect Platform.

Analytics that matter

Quality-of-service reports monitor your phone system's health and diagnose call quality issues.

Analytics portal provides essential insights into how your company uses your phone system.

Simplified IT administration

Manage users and locations—anytime, anywhere, on any device. Robust reporting and management tools offer a holistic view across all your sites.

As your business scales and grows, your growing network locations create more complex operations with unique management challenges. RingCentral's multisite support feature gives you the flexibility to manage and support your branch offices based on their unique operational needs.

World-class security and reliability

Seven layers of security protect your data and communications. Enterprise-grade reliability and a fully redundant global network ensure service remains at the highest standard with a 99.99% available uptime SLA.

Quality of service

Access a real-time dashboard to proactively monitor call quality and reactively troubleshoot issues for all users. Pinpoint quality issues down to the exact location, ISP, network and endpoint. Get easy-to-understand quality scores and underlying data, including jitter, latency, packet loss and codecs.

The right partner for your advanced communications

RingCentral with Verizon delivers calling, collaboration and messaging that is integrated across Verizon's ecosystem of connectivity, mobility and industry-specific solutions, delivered with end-to-end quality of service.
