

Wireless business internet

Solution brief

The future of wireless business internet is here, and it's fast, affordable, reliable and built for demanding businesses.

What if you could get simple, flexible connectivity where you do business without all the messy wires and long-term contracts? It's easier – and more affordable – than you may think.

Benefits beyond connectivity

There are many circumstances where choosing a wireless business internet solution could be right for your organization, such as when you are:

- Working in an area where a wired connection isn't available
- Facing limited internet choices and service is poor
- Looking for a way to provide business-grade connectivity at your remote and temporary job sites
- Needing to deploy new locations quickly
- Seeking fast performance to support your data-intensive needs
- Wanting to strengthen your business continuity strategy with a failover alternative

Whatever the case, we have wireless business internet solutions with reliable service to meet your needs. Plus, you can connect all your critical devices, applications and more to keep your business running. Wireless business internet solutions can give you access on the go or in the office, so you can do more in more places.

You can also get Verizon's fastest speeds available to you in no time. With self-setup or professionally installed options, there are no messy wires and business disruptions to deal with. And with no long-term contracts or inconsistent pricing, you can control and predict service costs.

What you can do with wireless business internet

While there are many business types and needs that wireless business internet solutions can help address, here are a few of the common useful applications (note: specific use cases depend on internet solution and service availability):

Small businesses or branch offices

Add new locations quickly to help your business grow.

Rural worksites

Access reliable internet that is fast enough for your day-to-day business needs in these areas.

Kiosks and stores within stores

The flexibility to help you put your business where your customers are

Temporary and mobile sites

Get added flexibility with a connection that can go nearly anywhere your business takes you.

Mobile command centers

Provide reliable connections when and where workers need them most.

Home office

Help your remote and home-based workers stay connected and productive.

Backup and failover

Ensure business continuity and minimize potential impact if an internet disruption occurs.

Finding the right fit

We have two wireless business internet solutions (subject to availability at your location) with multiple speed and data options, so you can choose the right one for your specific business needs.

You'll experience near-ubiquitous coverage on our award-winning 4G LTE network and transformational connectivity as our 5G network expands to more U.S. locations.

LTE Business Internet

LTE Business Internet is a fixed wireless internet connection with a plug-and-play router that makes it easy to install virtually anywhere the work takes you. With nationwide coverage, no annual service contract and no early termination fee, you can choose between three bandwidth options* to support basic business needs:

- 10 Mbps
- 25 Mbps
- 50 Mbps

5G Business Internet

Powered by 5G Ultra Wideband, 5G Business Internet gives you the reliable, ultrapowerful network performance and speed you need with none of the messy wires. Available in select areas, the three bandwidth options* available are:

- 100 Mbps
- 200 Mbps
- 400 Mbps

*Bandwidth options reflect max available download speeds, which may vary. Upload speeds also vary and will be lower than download speeds.

5G Ultra Wideband available in select areas.

How wireless business internet works

Our LTE Business Internet and 5G Business Internet options are built on different underlying technology to help tackle different business needs. Understanding how each works will help you determine which is right for you.

LTE Business Internet

Delivering expansive coverage and enabling key business use cases

10, 25 and 50 Mbps

Expansive coverage
(LTE network)

5G Business Internet

Available in select areas to enable advanced connectivity that supports innovative 5G use cases, scaling data needs and quick setup

100 and 200 Mbps

Performance
(C-Band)

100, 200 and 400 Mbps

Performance + innovation
(millimeter wave)

Why Verizon

Whether you're a one-person operation or an enterprise of thousands, at Verizon, we are in the business of keeping you in business. Especially when it comes to your critical connectivity needs. You'll get service on America's most reliable 5G network.¹ In addition, 99% of the U.S. population is covered by our 4G LTE network.² And when it comes to our wireless business offerings, we were named #1 in Customer Satisfaction with Small Business Wireless Service by J.D. Power.³ Plus, when you work with a single nationwide provider, you get the benefit of one bill and simplified IT management.

LTE Business Internet is available within the U.S. on Verizon's 4G LTE network. No domestic or international roaming. Cannot be used for certain applications, including audio/video streaming, web hosting, public/guest Wi-Fi, voice and texts. Compatible equipment required. Terms apply.

5G Business Internet is available in select areas. Self-setup and professional installation options are available and may vary by location. Compatible equipment required. Terms apply.

1 Most reliable 5G network based on more first-place rankings in RootMetrics® 5G data reliability assessments of 125 metro markets conducted in 2H 2021.

Tested with best commercially available smartphones on three national mobile networks across all available network types, excluding C-Band.

Your experiences may vary. RootMetrics rankings are not an endorsement of Verizon.

2 Based on 9.25.2019 U.S. Census population data.

3 Verizon Wireless received the highest score among small business wireless providers in the J.D. Power 2021 U.S. Business Wireless Satisfaction Study of business customers' perceptions with their current wireless carrier.
