

# Enhance your constituent experiences

**It's more than a connection. It's everything Verizon Wireless Business Internet can do for your community.**

A strong network foundation can optimize state and local governments' digital journey and help improve the way constituents interact with their services.

With government agencies constantly working to improve their constituent experiences, keeping pace with rapidly changing technologies can be a challenge. Modernization is key to helping state and local agencies control operating expenses and improve their ability to share sensitive information and connect with constituents more securely.

Verizon is a trusted technology solution provider for state and local agencies across the country. Our robust portfolio of services and solutions, including our 5G\* and 4G LTE wireless networks, have the connectivity and scale to match your agencies' needs.

## 4 Wireless Business Internet use cases to help state and local agencies

Adopting new digital technologies can help your agency operate more efficiently and effectively. Our advanced wireless technologies can boost field communications and collaboration capabilities. Here are a few relevant state and local use cases:

### Modernize traffic systems with digital signage

Traffic congestion, safety concerns and aging infrastructure present significant challenges for transportation agencies. As technology evolves, so do the opportunities to modernize traffic systems to achieve greater efficiency, safety and sustainability. Verizon Wireless Business Internet can help provide reliable, secure connectivity to highway digital signage with real-time notifications to help improve driver awareness, ease traffic congestion, make intersections safer, and help reduce CO<sup>2</sup> emissions related to engine idling.

### A better DMV kiosk experience

Having the right connectivity solutions to provide a reliable, highly secure internet connection is important for an agency looking to deliver more efficient services. Verizon can help you create a reliable, security-rich wireless network that helps keep department of motor vehicles (DMV) kiosks online and operational to help improve your constituents' self-service experience.

### Enhanced redundancy and security for state lottery machines

Having primary and secondary connectivity services helps to ensure data security and service continuity for state lottery machines. Verizon Wireless Business Internet can help provide agencies with a reliable, security-rich, purpose-built internet platform that can be deployed quickly at permanent or temporary machine locations.

### Improved public safety vehicle connectivity

Real-time communications with public safety vehicles can be key to staying on top of developing situations. Our business internet solutions can optimize connectivity for public safety vehicles, laptops and tablets to keep officers and other personnel connected and operational. Verizon Wireless Business Internet provides a highly secure solution for mobile terminals, which can enable emergency personnel to access critical information

## The benefits of Wireless Business Internet

### Brings your internet into the future, quickly

Where implementation once took months or weeks, Verizon Business Internet can be up and running within days, helping negate the traditional stress and hassle of deployment with best-in-class flexibility, ease and speed.

### Boosts agility and capabilities across your community

You can count on enhanced efficiency, productivity and digital proficiency with the power of our 5G and 4G LTE wireless technology. Verizon Business Internet offers a foundation for reliable, secure connectivity and strengthens and modernizes your infrastructure to deliver a safe, scalable and always-on environment.

### Delivers speed where it counts

Whether it's day-to-day efficiency or a time of crisis, you need a connectivity solution that has the high bandwidth and low latency to keep your agencies operational in a time of need.

## Why Verizon?

Verizon offers decades of experience in providing security-rich, reliable communications to agencies such as yours. Our Wireless Business Internet is a fixed wireless access solution providing a reliable, highly secure and easily installed primary or backup internet broadband service. It offers a variety of equipment options tailored to your specific needs.

The result is more than fast connectivity implemented in a simple, hassle-free way. It's a foundational network designed to scale easily and evolve as your agency's needs grow.
