

Meet the needs of
your K–12 students,
faculty and staff, now
and in the future

**Graduate from traditional
broadband to the power of Verizon
Wireless Business Internet**

Having the right technology and resources is important for students' learning and development. A network that supports innovative learning tools and connectivity solutions is indispensable to promote students' success.

Whether it's interacting with advanced technologies to bring a lesson to life or personalizing learning to meet an individual student's needs, a strong network foundation is necessary to provide a secure and engaged learning environment. We can partner with you to deliver a reliable, fast and highly secure connection virtually anywhere on campus—even with many devices connected to your network.

Verizon is a trusted technology solution provider for schools across the country. Our robust portfolio of services and solutions, including our 5G* and 4G LTE Business Internet, have the connectivity and scale to match your campus needs.

4 Wireless Business Internet use cases to help transform a school

A backup network for uninterrupted learning

Schools today are facing constantly evolving challenges—whether managing temporary locations or new building additions, or ensuring there is enough bandwidth and a backup network to keep student data

safe and accessible. We can help you overcome these challenges with the help of Wireless Business Internet. It can bring new buildings online quickly and can act as a backup connection that enables continuity of operations whenever wireline connectivity is down.

Better remote-learning connectivity

Supporting digital inclusion can help overcome challenges that can get in the way of how students interact and learn. We can help you engage with remote learners through a highly secure network that allows them to get the same engaging and effective experience as their peers inside the classroom. We've helped school districts address the digital divide by deploying a fixed wireless access solution that provides wireless internet coverage for the surrounding area—enabling students to switch from in-class learning to doing research and homework at home in a security-rich and seamless way.

Enhanced campus safety and efficiency

Verizon Business Internet supports Internet of Things (IoT) solutions that can run third-party sensors and devices. By providing the connectivity to support intelligent security cameras, smoke and vaping detectors, and other safety and utility monitoring applications, we can help improve campus safety without intruding on student and staff privacy.

Boosted mobile connectivity and productivity

Students no longer have to wait to get to class or home to be able to have an internet connection. Our fixed wireless access solution can be deployed on bus fleets to enable students to do homework or prepare for class while on their way to and from school. This solution can also provide increased connectivity for enhanced communications during emergency situations.

The benefits of Wireless Business Internet

Brings your internet into the future, quickly

Where implementation once took months or weeks, Verizon Business Internet can be up and running within days, helping negate the traditional stress and hassle of deployment with best-in-class flexibility, ease and speed.

Boosts agility and capabilities across your community

You can count on enhanced efficiency, productivity and digital proficiency with the power of our 5G and 4G LTE wireless technology. Verizon Business Internet offers a foundation for digital learning and strengthens and modernizes your infrastructure to deliver a safe, scalable and always-on environment.

Delivers speed where it counts

With high bandwidth and low latency, our Wireless Business Internet delivers outstanding connectivity with a highly secure platform that helps students and teachers access advanced, immersive learning tools that help keep students focused and engaged.

Why Verizon?

Verizon offers decades of experience in providing security-rich, reliable communications to school districts such as yours. Verizon Business Internet is a fixed wireless access solution providing a reliable, highly secure and easily installed primary or backup internet broadband service with a variety of equipment options tailored to your specific needs.

The result is more than fast connectivity implemented in a simple, hassle-free way. It's a foundational network designed to scale easily and evolve with the needs of your school.
