Subject : Verizon Partner Solutions Industry Letter: Providence Washington Street RI DMS100 Switch Retirement

PLEASE NOTE:

All references to the Providence Washington Street RI DMS100 switch are associated with the CLLI code PRVDRIWADS2 and will not be repeated throughout this letter.

All references to the Providence RI C20 switch are associated with CLLI code PRVDRIWAPS1 and will not be repeated throughout this letter.

As set out in the Verizon New England Inc. Short Term Public Notice Under Rule 51.333(a), dated June 12, 2026, on or after August 1, 2026, the Providence Washington Street RI DMS100 switch will be retired and removed from the Verizon network as part of ongoing efforts to modernize the network.

General Information: The Exchange Codes (NXXs) in Numbering Plan Area (NPA) 401 currently residing in the Providence Washington Street RI DMS100 switch (see list in Table B below) will be moved to the Providence RI C20 switch (see details in Table A below).

The native NPA NXXs belonging to the Providence Washington Street RI DMS100 switch will be rehomed upon decommissioning of the switch and reflected in the Local Exchange Routing Guide (LERG) for the Providence RI C20 switch. This will occur on or after **August 1, 2026**.

Network Changes and Trunk Rearrangements:

The Providence RI C20 switch will be the recipient office of traffic migrated from the Providence Washington Street RI DMS100 switch. Traffic bound for the codes listed in Table B will be delivered via the Providence, RI Tandem (PRVDRIWA06T intra-lata SHA / PRVDRIWA06T inter-lata FG Access SHA).

After all traffic is migrated off of the Providence Washington Street RI DMS100 switch, it will be retired and removed from the network.

CLECs, IXCs, IECs, wireless carriers and paging carriers will need to secure new trunk groups built to the Providence RI C20 switch or have existing trunk groups to that switch augmented. Carriers that have direct end office trunks (DEOT) with access connectivity in the Providence Washington Street RI DMS100 switch will be required to reposition the codes to the Providence RI C20 switch.

All ASRs for the Providence RI C20 switch must be received no later than July 6, 2026, to provide sufficient time to migrate the traffic described above. All traffic must be moved by August 1, 2026. Please adhere to industry standards using normal procedures that pertain to updates and changes to the LERG for all NXXs subject to the retirement of the Providence Washington Street RI DMS100 switch.

For inquiries related to the proposed network reconfiguration, or to arrange a meeting with Verizon Network Engineering and Planning personnel, please contact your Verizon Account Manager.

We look forward to working with your team to enable uninterrupted service during the network redesign and transitioning of your traffic.
