Network Changes and Trunk Rearrangements:

The Albany NY PEO switch will be the recipient office of traffic migrated from the Albany Washington NY 5ESS switch. Traffic bound for the codes listed in Table B will be delivered via the Albany NY Tandem (ALBYNYSS5GT intra-lata SHA/ALBYNYSS5GT inter-lata FG Access SHA).

After all traffic is migrated off of the Albany Washington NY 5ESS switch, it will be retired and removed from the network. CLECs, IXC's, IEC's, wireless carriers and paging carriers will need to secure new trunk groups built to the Albany NY PEO switch or have existing trunk groups to that switch augmented. Carriers that have direct end office trunks (DEOT) with access connectivity in the Albany Washington NY 5ESS switch will be required to reposition the codes to the Albany NY PEO switch.

All ASRs for the Albany NY PEO switch must be received no later than October 30, 2026, to provide sufficient time to migrate the traffic described above. All traffic must be moved by November 30, 2026.

Please adhere to industry standards using normal procedures that pertain to updates and changes to the LERG for all NXXs subject to the retirement of the Albany Washington NY 5ESS switch.

For inquiries related to the proposed network reconfiguration, or to arrange a meeting with Verizon Network Engineering and Planning personnel, please contact your Verizon Account Manager.
