<http://www.verizon.com/about/terms-conditions/network-disclosures>

Description of the Planned Network Change(s):

Citizens Telecommunications Company of Illinois, Frontier Communications of Wisconsin LLC, and Frontier North Inc., all Verizon companies (“Verizon”), intend to retire the copper facilities at all remaining locations in the one hundred and thirty-six (136) wire centers listed above. The copper facilities being retired support services that depend on obsolete time-division multiplexing and also use SS7 signaling. Verizon will discontinue services offered over these copper facilities pursuant to FCC rules before retiring the facilities. Locations affected by this copper retirement will have access to fixed or mobile wireless service from multiple providers including Verizon Wireless, or from another wireline option, including VoIP service from Verizon or a cable company.

Description of Reasonably Foreseeable Impact(s) of the Planned Change(s):

After the retirement of the copper facilities, Verizon will: (1) no longer offer services over copper facilities; and (2) cease maintaining the copper facilities. To help ensure an orderly transition, Verizon may require customers and interconnecting entities to migrate services off of copper facilities well before the copper retirement implementation date.
