Missouri Local Exchange Services Catalog Schedule No. 1
(Enterprise Non-Current Services)

This Catalog Schedule No. 1 applies to the non-current services pertaining to enterprise business customers (i.e., non-mass markets) previously offered in Missouri by MCImetro Access Transmission Services Corp. d/b/a Verizon Access Transmission Services which are not set forth in other sections of the Guide. Unless otherwise indicated, the material below was previously described in Missouri Tariff No. 9 of MCImetro Access Transmission Services LLC d/b/a Verizon Access Transmission Services. For ease of reference, where applicable, the prior section numbers contained in the prior tariff have been retained.

All of these non-current services are subject to the Terms and Conditions applicable to the other Local Services as set forth in the Guide. The product descriptions, rates and charges for the non-current services previously offered in Missouri that were in effect at the time that the Missouri Local Exchange Services were added to the Guide and which are not set forth in other portions of the guide nor set forth below, will continue to remain in effect for a Customer previously subscribed to these services until the Customer no longer subscribes to such service(s), or changes are made to the product descriptions, rates or charges in the Guide.

Any questions regarding this Catalog Schedule, please call 1-888-215-5680.

CHANGE SHEET

This sheet details the most recent revisions made to this Catalog Schedule.
Any questions regarding this Catalog Schedule, please call 1-888-215-5680.

Revisions to Local Exchange Services Catalog Schedule No. 1, Effective October 1, 2018

Subsection A, Sections 3.1.2.3.2 and Section 3.1.7.4, and Subsection D, Section 13.11

- **Increase of Local Line flat rate monthly recurring charge (Plan 1 – Springfield) and Local Plus Program Local Line monthly recurring charges (Plan 1 and Plan 2).**

VIII. GRANDFATHERED SERVICES

The following provides services and pricing programs which are no longer available to new enterprise business customers (i.e., non-mass markets) and are not otherwise described in other portions of this tariff. All of these grandfathered services are subject to the same terms and conditions applicable to the other Local services as set forth in this tariff.

Gaps in the numbering of sections indicate sections which are intentionally left blank. To a large extent, this is due to the desire to have the sections below match the section numbers to the grandfathered services which previously were in Verizon Access Transmission Services No. 1 to the extent applicable. The material in Subsection A of the Grandfathered Services section was previously in Company tariff No. 1. The material in Subsection B was previously in Company tariff No. 6, and the material in Subsection C was previously in Company tariff No. 8. And, the material in Subsection D was previously in tariff No. 4 of MCI WorldCom Communications, Inc.

Subsection A – Material previously in Company Tariff No. 1

Effective on or after October 1, 2016, MCImetro Access Transmission Services Corp. d/b/a Verizon Access Transmission Services will no longer offer the following Operator Services features in the United States and internationally: Busy Line Verification or Interrupt, Person-to-Person, 3rd Number Billing, and Collect Call services.

3.1.5 Local ISDN-Primary Rate Interface (Local ISDN-PRI)

Local ISDN-PRI is an alternative arrangement for individual local exchange services such as Local Trunk Basic and Local Trunk DID. Local ISDN-PRI is provisioned at the 1.544 Mbps rate via the Primary rate Interface standard of the Integrated Services Digital Network (ISDN). Local ISDN-PRI provides the Customer with the capabilities of simultaneous access, transmission and switching of voice, data and imaging services via channelized transport.

3.1.5.1. Local ISDN-PRI Service Arrangement - One or more Service Configurations can be combined to create an Local ISDN-PRI Service Arrangement. Customers may have multiple Intellispan PRI Service Arrangements per location, however for each Service Arrangement one Service Configuration 1 must be included. The controlling D channel will always reside on Service Configuration 1.

The ISDN Digital Facility is ordered separately and not Included as part of the Service Configuration.

The D channel is a 64 Kbps channel that carries signaling and control for the B channels. The capabilities of the D channel are contained within the customers Service Configuration.

3.1.5.1.1 Service Configuration 1 - The first Service Configuration for any PRI Local Service Arrangement must be a Service Configuration 1. Service Configuration 1 provides twenty-three (23) 64 Kbps B channels and one (1) primary 64 Kbps D signaling channel. The primary D channel is an-out-of band signaling channel used to control and route all of the B channel traffic within the PRI Local Service Arrangement.

3.1.5.1.2 Service Configuration 2 - This configuration is only available in conjunction with Service Configuration 1. It provides an additional twenty-four (24) 64 Kbps B channels which are controlled by the D channel on Service Configuration 1. Multiple Service Configuration 2s may be associated with a Service Configuration 1 subject to switching equipment limitations.

3.1.5.1.3 Service Configuration 3 - This configuration is also only available to subscribers who have Service Configuration 1. It provides a backup 64 Kbps D channel and twenty-three (23) additional 64 Kbps B channels. The backup D channel will control and route all of the B channel traffic of a single PRI Service Arrangement in the event the D channel on the primary configuration (Service Configuration 1) fails. A maximum of one Service Configuration 3 may be included with each Local ISDN-PRI Service Arrangement. Service Configuration 3 is available subject to switching equipment capabilities.

The bearer (or B) channels are used for information transfer between users. B channels provide the same features as Local Trunk Basic and Local Trunk DID. To receive the DID capability, customers must order separately DID telephone numbers, as found in Section 3.1.3.2 preceding.

3.1.5.2 Optional Features: In addition to providing Local Exchange Services specified above, Local ISDN-PRI can be configured to support the following optional advanced ISDN features:

Call-by-Call Service Selection: Allows B channels to be shared between multiple services carried over a single Local ISDN-PRI Serving Arrangement.

Calling Number Delivery: Allows the customer to receive the originating caller's working telephone number provided this information is forwarded to the Company by the caller's Local Exchange and/or Long Distance Carrier.

Remote Call Forwarding (RCF)

Feature Package 1 includes call by call Feature and Calling number Delivery.

3.1.5.3 Local ISDN-Primary Rate Interfaced (Local ISDN-PRI) Rates and Charges:

Non-Recurring and Monthly Recurring Charges as specified below, apply per T-1 unless otherwise noted. The Local ISDN PRI T-1 non-recurring and recurring charges include Service Configuration and B Channel Service charges. Customers subscribing to DID capability will be assessed DID number charges as specified in Sections 3.1.3.2.3.1 and 3.1.3.2.3.2, respectively.

Term Commitment and Renewal Options: A customer must commit to service for a term of either one, two, three, four, or five years. The term of service will commence no earlier than the first day of the next billing month in which the customer subscribes to the plan. A plan will automatically renew for an equivalent term and volume commitment upon expiration of its term unless the customer provides written notification to cancel the Local On-Net Term Plan, which must be received by the Company no more than 30 days after expiration of the existing term. If the customer cancels the existing term plan within 30 days after expiration of the existing term, the customer will receive the discounts for which the customer qualifies during the 30-day period following the expiration of the existing term of service.

Volume commitment: A customer may elect a Local On-Net Term Plan monthly volume commitment of one of the following amounts, calculated after the application of promotional and other discounts: \$100; \$250; \$500; \$1,000; \$2,000; \$3,000; \$4,000; \$5,000; \$7,000, or an annual volume commitment of one of the following amounts, calculated after the application of promotional and other discounts: \$1,200, \$3,000, \$6,000, \$12,000, \$24,000, \$36,000, \$48,000, \$60,000, \$84,000, \$120,000; \$180,000; \$300,000; \$600,000, \$900,000, \$1.2M, \$1.8M, and \$2.4M. The customer's volume commitment will be based upon the customer's Qualifying Volume. At any time during the term of service, a customer may elect a higher equivalent Annualized volume commitment. If a customer so elects, the term of service expiration date will not change. The new volume commitment will apply beginning in the following month for monthly commitments and as of the beginning of the commitment year in which the new volume commitment is elected for annual commitments. The discounts associated with the new commitment volume level apply to charges and usage only from the new election date forward.

Underutilization Charges: If at the end of any year of the term of service, a customer fails to satisfy its annual volume commitment, the customer must pay the difference between the customer's actual Qualifying Volume in that year and the annual volume commitment. If at the end of any month of the term of service, a customer fails to satisfy its monthly volume commitment, the customer must pay the difference between the customer's actual Qualifying Volume in that month and the monthly volume commitment.

Early Termination Charges:

Cancellation of Discontinuance without Liability: If: (i) the customer's use of Local Exchange Service under a Local On-Net Term Plan equals or exceeds the Customer's equivalent annualized minimum volume commitment or monthly volume commitment and (ii) at the time of termination the customer is enrolled in a new Local On-Net Term Plan with a volume commitment which equals or exceeds the Customer's existing volume commitment, the customer may terminate service under Term Plan without liability as follows: (i) the customer may terminate service at any time during the last three months of the term of service if the customer's Local On-Net Term Plan's term commitment is one year; or (ii) the customer may terminate service at any time during the last six months of the term of service if the customer's new Local On-Net Term Plan's term commitment is equal to or greater than two years.

Cancellation or Discontinuance with Liability: Discontinuance of all services furnished under the Local On-Net Term Plan prior to the expiration of the committed term of service constitutes discontinuance of the plan and the customer will be billed and required to pay an early termination charge equal to the Underutilization Charge for the year of termination plus 50% of all of each annual or monthly volume commitment for each year remaining in the unfulfilled term of service.

Discounts: Customers will receive the following discounts applied to Eligible Volume charges and usage.

4. RATES (Cont'd)

4.2 Transmission Services

4.2.1 General

Rates are composed of two elements which may apply to a Customer's service, depending upon the specific service requested and its location

4.2.1.1 The channel termination rate element provides for the termination of the communications at the Customer designated location. One channel termination charge applies for each Customer designated location at which a channel is terminated.

4.2.1.2 The Channel Mileage rate element is determined by the Vertical ("V") and Horizontal ("H") Coordinates method, as set forth in AT&T's Tariff F.C.C. No. 10 for private line service. To determine the rate mileage between any two locations, V and H coordinates for each location will be determined by reference to National Exchange Carrier Association Tariff, F.C.C. No. 4, using the appropriate serving wire center(s) for the service being provided and the following formula:

$$\frac{(V_1 - V_2)^2 + H_1 - H_2)^2}{10}$$

4.2.2 Voice grade Service

There are two types of Voice Grade Services. The service is compatible with either 2-wire ground start and loop start equipment or 4-wire E/M signalling equipment. 4-wire supports analog data transmission speeds of up to 19.2 Kbps. The rates for Voice Grade channels as described in 4.2.2 preceding are as follows:

4.2.2.1 This service consists of making Voice Grade capacity available on a 24-hour per day, 7 days per week basis.

GATEWAY SA SERVICE

8.1 Description

Gateway SA service is offered to other telecommunications carriers desiring directtrunk side access to the Company's network in order to originate or terminate calls only to the analog voice grade channels corresponding to company provided access lines. Gateway SA service will support Inter Machine and Feature Group D protocols.

8.2 General Repulations

8.2.1 Carrier Access Orders for Gateway SA Service will be placed on Standard Bellcore Access Service Requests (ASR).

8.2.2 Gateway SA service is provided via a dedicated trunk side port on the Company's switched network at the digital DS 1 and DS 3 levels.

8.2.3 Gateway SA Ports are only available at the Primary Distribution Nodes provided by the Company. The customer is responsible for providing digital DS 1 and DS 3 transmission links between its premises and the Company's Primary Distribution Node, and a DSX 1 Panel Terminal interface at the Company's Node. The DS 1 and DS 3 transmission links may be obtained from any other telephone company which terminates transmission facilities at the Company's Primary Distribution Node, or may be provided over the Customer's own transmission facilities.

8.3 Rates

8.3.1 Rate Elements

This tariff includes services for which the following rate elements apply:

- a) Non-Recurring Charges
 Non-recurring charges are applied as a one time fee normally at the time the circuit is initiated.
- b) Monthly Recurring Channel Termination Charge
 The monthly recurring charge is billed monthly in advance and is assessed on each channel termination based on the terms and conditions of this tariff, the customer service agreement, or a master service agreement.
- c) Fixed Mileage Charge
 The fixed mileage charge is a recurring monthly fee which is applied to a circuit for which the LEC would charge a comparable fee in association with an interoffice channel.
- d) Variable Mileage Charge
 Variable mileage charge is a recurring monthly fee which is applied to a circuit for which the LEC would charge a comparable fee in association with an interoffice channel. In general, the variable mileage charge is calculated using V&H tables.

MESSAGE TOLL SERVICE

9. Toll Service

9.1 Description

Toll service is furnished for telephone communication between telephones in different local calling areas within the state in accordance with the regulations and schedules of charges specified in this tariff. The toll service charges specified in this section are in payment for all service furnished between the calling and called telephone, except as otherwise provided in this Tariff. Services include outbound (switched and dedicated access), inbound (switched and dedicated access), and travel card services. Toll service is an optional service available to customers obtaining dial tone from the company,

Outbound toll service offers customers an outbound, " I+" dialed long distance service for calls originating and terminating in the State of Missouri, and is available using either switched access or dedicated origination.

Inbound toll service offers customers an inbound toll service for calls originating and terminating in the State of Missouri, and is available using either switched access or dedicated access termination. This service enables the caller to contact the inbound toll service customer without the caller incurring toll charges. Calls are placed by dialing a toll free "800 or 888 number."

Travel Card service is a service which allows the customer to place calls from lines other than the customer's presubscribed location and charge the call to the presubscribed location. The customer may place calls from any touch tone Telephone in the U.S. by dialing a toll free "800 or 898 number" and entering a personal identification code, followed by the desired telephone number. Travel Card calls are billed at the Company's rates and appear on the customer's monthly long distance bill.

9.2 Timing of Messages

9.2.1 Outbound and inbound toll service calls are timed in 6 (six) second increments with an 18 (eighteen) second minimum. Travel Card service calls are timed in 1 (one) minute increments.

- 9.2.2 For station to station calls, call timing begins when a connection is established between the calling telephone and the called telephone station.
- 9.2.3 For person to person calls, call timing begins when connection is established between the calling person and the particular person, station or mobile unit specified or an agree alternate.⁽¹⁾
 [(1) The rates specified under Section 14, Operator Services, may apply.]
- 9.2.4 Call timing ends when the calling station "hangs up", thereby releasing the network connection. If the called station "hangs up" but the calling station does not, chargeable time ends when the network connection is released either by automatic timing equipment in the telephone network or by the Company operator.
- 9.2.5 Calls originating in one time period as defined under 9.3 and terminating in another will be billed the rates in effect at the beginning of six second increments.

For multi location customers, the attendants can be located in only one location.

Flexible night service

Provides the ability to forward each listed directory number to a unique customer changeable night directory number.

Automatic Station Message Detail Recording ASMDR

Provides a record (via printout) of call details (date, time, etc.) on outgoing calls.

10.3.2 Enhanced Control System Feature Package

Auto Route Selection

directs outgoing calls to the customer's most preferred available route. If the primary route is busy, the ARS, feature automatically tries alternate routes. The customer will preselect a sequence of routes which may include private or public carrier services. A warning tone is provided to indicate the selection of the least preferred route.

Account Code

Permits CES stations and attendants to dial in account code number of eight digits. For use when placing calls over facilities arranged for Automatic Message Accounting (AMA) recording. The account or project number must be input prior to dialing the called number.

Authorization Code

Allows different station users to have different calling privileges. Dialing capabilities can be defined and restricted to authorized personnel

Time of Day Do Not Disturb

Activates Do Not Disturb at particular times. Allows for setting both the time and day for a particular action to occur (for example, the customer wants to have feature "do not disturb" activated at noon on Tues. through Wed.).

Time of Day Routing

Changes routing by time of day.

Dial Call Waiting

Provides the ability for originating CES stations to invoke a Call Waiting service on selected intragroup calls.

Priority Ringing

Differentiates incoming calls by signaling the customer with a distinctive ringing pattern.

10.3.3 Optional System Features

Access Circuit - Music on Hold

Allows customers to optionally provide music, or any other type of customer-provided audio source, to calls on hold.

Access Circuit - Loudspeaker Paging

Allows dial access to subscriber-owned loudspeaker paging equipment. The paged party can be connected to the calling party by dialing an answering code from any station within the subscriber group.

Access Circuit - Pollable SMDR

Provides a record of call details (date, time, etc.) on outgoing calls placed over a customer's private or public facilities on an interactive basis.

Access Circuit - Private Facilities

Allows the customer to have dial access to various types of public and private switching arrangements (i.e. 800-Service Simulated Facility Group, Tie Trunk Access, Common Control Switching Arrangement Access, etc.), provided by a subscriber dialed access code.

Six Way Conference Circuit

Allows a station user to initiate a conference call. A total of five conferees can be added to the conference in addition to the originator. The customer may order more than one conference circuit.

- B. The following features are available with each CES I line located at a designated customer primary location. Where facilities and operating conditions exist, features of a CES I system may be extended to stations of the same system located at customer secondary locations.

10.3.1 Standard Features

Individual Telephone Number

Each station line has its own telephone number.

Individual Access Screening

Each station is assigned its own access treatment code for call screening,

To add a third party to the call, the 3 Way Calling subscriber flashes the switchhook once to place the other party on hold, receives a dial tone, dials the telephone number of the third party, and then flashes the switchhook again to establish the three way connection.

Call Forwarding Variable

(1) (Limited)

When this feature is activated by a station line user or the attendant incoming calls to the activated station line or attendant position will be automatically routed to any other selected station line, within the same CES system. or to the attendant position. The attendant may also activate this feature for a station line user.

(2) (Unlimited)

The same as Call Forwarding Variable Limited except that incoming calls may be automatically routed to a telephone number outside the CES system or to station lines within the same CES system. The attendant may not activate this feature to a telephone number outside the CES system for a station line user. Calls forwarded outside the CES system are subject to the appropriate clarifies for local and toll messages.

Call Forwarding Busy

Allows incoming calls to a busy station to be routed to a preselected station line, attendant, or voice mail system within the same system or outside the system. Intercom calls can be arranged to be forwarded to a number different from DID calls.

Call Forwarding Don't Answer

Allows incoming calls to be automatically routed to a preselected station line, attendant, or voice mail system in the same svstem or outside the system, when the called station is not answered after a preset number of rings. Intercom calls can be arranged to be forwarded to a number different from DID calls.

Remote Activation of Call Forwarding

Allows the user to activate and/or deactivate the Call Forwarding feature from any remote location, using a Touch-Tone Phone.

Hunting

Routes a call to an idle station line in a prearranged group when the called station line is busy.

Call Park

Allows a station line to park a call against its own line number. The parked call can be retrieved from any station line by dialing the feature code and the line number against which the call is parked.

Call Pickup

Allows a station line to answer incoming calls to another station line within a defined pickup group. Call pickup is provided on individual station lines within a customer group.

Call Transfer

Allows a station line user to transfer any established call to another station line inside or outside the customer group without the assistance of the attendant.

Auto Recall (intra group)

Permits the station user to have calls automatically redialed , within a defined group within the CES system, when the first attempt reaches a busy

INTELENET EXCHANGE ACCESS SERVICE

20.1 GENERAL

Intelenet Exchange Access Service provides a Customer with a telephonic connection and a unique telephone number address on the public switched telecommunications network. Intelenet Exchange Access Service enables users to:

- A) receive calls from other stations on the public switched telecommunications network;
- B) access other services offered by the Company as set forth in this tariff;
- C) access certain interstate and international calling services provided by the Company;

- D) access (at no additional charge) the Company's operators and business office for service related assistance;
- E) access (at no additional charge) emergency services by dialing 0 or 9-1-1; and
- F) access services provided by other common carriers which purchase the Company's Switched Access services as provided under the Company's Federal and State tariffs, or which maintain other types of traffic exchange arrangements with the Company.

Intelnet Exchange Access Service cannot be used to originate calls to other telephone companies' caller-paid information services (e.g. NPA 900, NXX 970, 540, etc.). Calls to those numbers and other numbers used for caller-paid information services will be blocked. Calls to numbers "NXX 976" will also be blocked unless otherwise specified by the Customer at the time service is ordered. Should a customer request unblocking for access to a caller-paid information service, the Company will bill and collect on behalf of the telephone companies' information provider holding the customer fully liable for all charges incurred for use of the information provider's service.

Intelnet Exchange Access Service is available on a "Full" service basis, whereby service is delivered to a demarcation/connection block at the Customer's premise.

The following Exchange Access Services are offered:

- Single Line Service
- Multi Line Service
- Analog PBX Trunk Service
- Intelnet Full Service T-1
- Direct Inward Dialing Service

20.5 INTELENET FULL SERVICE T-1

20.5.1 Service Description

Intelenet (Digital PBX Trunk) Service provides a Customer with a digital connection operating at 1.544 Mbps which is time division multiplexed into 24 individual voice-grade telephonic communications channels, each of which can be used to place or receive one call at a time. Digital Trunks are provided for connection of compatible Customer-provided private branch exchanges (PBX) to the public switched telecommunications network. Each Digital Trunk is provided with dual tone multi-frequency (DTMF) or multi-frequency (MF) signaling, as specified by the Customer. Digital Trunks may be configured into hunt groups with other Company-provided Digital Trunks. The terminal interface for each Digital Trunk Service is a DSX-1 panel.

20.5.2 Direct Inward Dial Service (DID)

DID Service can be purchased as an optional feature in conjunction with Full Service T-1. DID service transmits the dialed digits for all incoming calls allowing the Customer's PBX to route incoming calls directly to individual stations corresponding to each individual DID number.

The Customer is required to purchase at least one DID number block for each DID-equipped trunk or trunk group, or DID-equipped channel or channel group. ^{1/} The Company reserves the right to limit the amount of DID numbers that will constitute a block of telephone numbers. Currently, blocks of 20 and 100 DID numbers can be selected. The amount of DID numbers included in a telephone number group will be determined at the sole discretion of the Company, and will reflect the efficient management of the Company's resources. In addition, the Company reserves the right to review vacant DID stations or stations not in use to determine efficient telephone number utilization. Should the Company determine based on its own discretion that there is inefficient number utilization, the Company may either reassign the DID numbers or charge an Underutilization Telephone Number Assignment Fee.

[^{1/} A "group" is a set of Basic Trunks or Digital Trunk channels which have been configured a hunt group.]

The Customer has no property right to the telephone number or any other call number destination associated with DID service furnished by the Company, and no right to the continuance of service through any particular end office. The Company reserves the right to change such numbers, or end office designation associated with such numbers, or both, assigned to the Customer, whenever the Company deems it necessary to do so in the conduct of its business.

20.6 LOCAL CALLING SERVICE

20.6.1 Service Description

Local Calling Service provides the customer with the ability to originate calls from Company-provided access lines to all other stations on the public switched telephone network bearing the designation of any central office of the exchanges, areas, and zones included in the caller's local calling area as specified by laws and regulations established by the State of Missouri, in effect and as amended. Calls are measured in sixty (60) second increments, with a minimum charge of one minute per call.

20.7 INTRALATA TOLL SERVICE

20.7.1 Service Description

IntraLATA Toll calls originate and terminate outside the caller's exchange area, but within the caller's LATA and state. IntraLATA calls are billed per call according to the duration. IntraLATA calls are not eligible for term discounts. Calls are billed in six (6) second increments, with an eighteen (18) second call minimum.

20.8 DIRECTORY LISTING SERVICE

20.8.1 Service Description

The Company will provide a listing for each Intelenet Customer's main billing telephone number in the directory(s) published by the dominant Local Exchange Carrier in the area. At the Customer's option, the company will arrange for additional listings at an additional charge.

20.9 OPERATOR SERVICES

20.9.1 Service Description

Operator handled services and directory assistance services are provided to Customers and users of Company-provided Intelenet services.

Local exchange, IntraLATA, and InterLATA calls can be placed on an operator assisted basis. Usage charges for operator assisted calls are defined in Section 20.6. Busy Line Verification and Interrupt or Directory Assistance charges apply in addition to any applicable operator assistance charges.

Customers and Users of the Company's calling services (excluding Toll Free services), may obtain directory assistance in determining telephone numbers within the state by calling the directory assistance operator.

20.9.2 Additional Operator Services Regulations

Pursuant to the requirements of the Missouri Public Service Commission, the following additional regulations will apply to the Company's provision of intrastate operator services in the State of Missouri:

The Company will not knowingly bill for incomplete calls and will remove any charge(s) for incomplete calls upon subscriber notification or the Company's knowledge of the charge(s) for incomplete calls.

The Company will advise the caller and the billed party (if different from the caller) that MCImetro Access Transmission Services LLC is the operator services provider at the time of the initial contact.

The Company will provide rate quotes, including all rate components and any additional charges, upon request, at no charge.

6.10 Caller ID Blocking 1/

[1/ Effective April 1, 2001, this service will no longer be available to new subscribers.]

6.10.1 Description

Caller ID Blocking allows a caller to determine when they want to prevent the delivery of both the calling name (if applicable) and number to the called party for the duration of one call by entering a feature code prior to making the call. When the feature code is entered prior to making the call the name (if available) and number is blocked. If no feature is entered prior to initiating a call the name (if available) and number will be delivered to the calling party.

The following regulations apply:

- A. Any Company calling party may prevent the delivery of their calling name and/or number to the called party by dialing an access code (*67 on their Touchtone pad or 1167 from a rotary telephone) immediately prior to placing a call. The access code will activate per call blocking, which is available at no charge.
- B. If the calling party activates blocking, the name and/or number will not be transmitted across the line to the called party. Instead, Caller ID customers will receive an anonymous indicator. This anonymous indicator notifies the Caller ID customer that the calling party has elected to block the delivery of their name and telephone number.
- C. Line blocking for the delivery of the calling name and/or number is available upon request, at no charge, to the following entities and their employees/volunteers, for lines over which the official business of the agency is conducted including those at the residences of employees/ volunteers where an executive officer of the agency registers with the Company a need for blocking: (a) private, nonprofit, tax-exempt, domestic violence intervention agencies and (b) federal, state and local law enforcement agencies.
- D. Line blocking customers can unblock their calling name and/or number information on a per call basis, at no charge, by dialing an access code (*82 on their Touch-Tone pad or 1182 from a rotary phone) immediately prior to placing a call. The calling name and/or number will not be transmitted from a line equipped with this capability.

- E. The blocking of the calling name and/or number will not be provided on calls originating from Public, Semi-Public and Customer-Owned Pay Telephone Services.

6.11 Caller ID (Continued)

6.11.1 Regulations Applicable to Caller ID 1/

[1/ Effective April 1, 2001, this service will no longer be available to new subscribers.]

- A. Caller ID Service will be provided in connection with individual and multi-line residence and business lines, where facilities permit. Party Line, PBX trunk, Inteletrex, Public and Semi-Public Telephone Services are excluded from subscribing to this tariff offering.
- B. Caller ID Service is offered on a subscription basis that requires the customer to order the service. Where Caller ID Service is available, any calling party, whether they subscribe to Caller ID Service or not, has per call blocking capability.
- C. Caller ID Service will not be displayed under the following conditions:
 - (1) If the called party is off-hook (i.e., when Customer is on line).
 - (2) If the called party answers during the first ring interval.
 - (3) If the calling party has activated blocking capability.
- D. Caller ID Service is not available with distinctive ringing services having a silent interval length insufficient for calling name and/or number transmission.
- E. Identification of specific stations or extensions served by CPE is not possible. The main directory number will be displayed.
- F. Caller ID Service will be transmitted and displayed for calls made from another central office only if it is linked by appropriate facilities.
- G. Caller ID Service information may not be sold or given to another party without the caller's consent. Calling name and number information may only be used for: (a) routing or completion of calls, (b) billing of calls, (c) account management purposes, (d) services directly related to the call or transaction, (e) verification of calling party identity and (f) marketing products or services that are directly related to those previously acquired by the customer from the name and number delivery services subscriber. This applies if the name and number delivery service subscriber has an existing relationship with the customer. Caller ID customers failing to comply with any of these conditions will have their service terminated.
- H. In addition to the other provisions specified in this section, the Company shall not be liable for any claims for damages caused or claimed to have been caused, directly or indirectly, by the transmission to a Caller ID customer of a name or telephone number which the calling party or the Caller ID customer finds erroneous, offensive, embarrassing, or misleading for any reason, including but not limited to the way in which the calling party's name has been abbreviated.

6.13 Direct Inward Dial (DID) Service 1/
 [1/ Effective April 1, 2001, this service will no longer be available to new subscribers.]

6.13.1 Description

DID service is an optional feature which can be purchased in conjunction with Company-provided DID Trunks or Digital Trunks. DID service transmits the dialed digits for all incoming calls allowing the Customer's PBX to route incoming calls directly to individual stations corresponding to each individual DID number. Charges for DID number blocks apply in addition to charges specified for DID Trunks or Digital Trunks in Sections 5.5 and 5.6, respectively.

Customer is required to purchase at least one DID number block for each DID-equipped trunk or trunk group, or DID-equipped channel or channel group. The Company reserves the right to limit the amount of DID numbers that will constitute a block of telephone numbers. The amount of DID numbers included in a telephone number group will be determined at the sole discretion of the Company, and will reflect the efficient management of the Company's resources.

The Customer has no property right to the telephone number or any other call number destination associated with DID service furnished by the Company, and no right to the continuance of service through any particular end office. The Company reserves the right to change such numbers, or end office designation associated with such numbers, or both, assigned to the Customer, whenever the Company deems it necessary to do so in the conduct of its business.

6.16 Virtual Foreign Exchange (VFX) Service 1/
 [1/ Beginning June 11, 1999, this service will no longer be available to new subscribers.]

6.16.1 Description

VFX Service enables a Customer to receive Company-provided Exchange Access Service at a point outside the Local Exchange Service Area that normally serves the customer's location. VFX service can be used to receive inward calls only. VFX service has a minimum requirement of at least 48 lines.

The Local Exchange Calling Area and all Usage Service rates which apply to a VFX Exchange Access Service are the same as those which regularly apply to other Company-provided Exchange Access Services bearing the same NPA-NXX designation.

Customers are prohibited from using VFX service to place outbound calls including, but not limited to "911" emergency numbers. This restriction is required in order to assure that emergency calls are routed to the Public Safety Answering Point serving the geographical area associated with the Customer's telephone number. The Company strongly recommends that each Customer maintain at least one telephone exchange service access line bearing an NPA-NXX designation associated with the Customer's actual geographic location for emergency use.

6.16.2 Rates

VFX service charges are calculated on a either a line or trunk group basis dependent upon the type of Exchange Access Service facility being utilized.

Charges for each VFX Exchange Access Service apply in addition to the service rates which would regularly apply for such Exchange Access Service. Additional costs may be incurred by the VFX Customer when the Company rearranges existing facilities as set forth in Section 10.1. The following charges apply for each VFX service:

13.4 Term Plan

13.4.1 MCI WorldCom On-Net Term Plan

The MCI WorldCom On-Net Term Plan is a term plan, in lieu of all other tariffed Local Exchange Service term plans for customers who subscribe to MCI WorldCom On-Net interstate service. Customers who enroll in this term plan must have their facilities based Company Local Exchange service usage billed to a single MCI WorldCom On-Net invoice.

Customers subscribing to this term plan will receive discounts as set forth below, in lieu of all other tariffed term plans. The discounts will be applied to the following recurring charges: Local Line Charge, Local Trunk-Basic Charge, Local Trunk-DID Charge, Local Trunk-2 Way Direct Charge, DID/2 Way Direct Number Charge, Local ISDN PRI T-1 charge, as well as local service usage charges.

The Volume Commitment will be determined based upon the Qualifying Volume received by the Company, or any affiliate of the Company, from customer's facilities based Local Exchange service, as defined in Section 13.4.2 and the Qualifying Volume of customer's other telecommunications services.

Discounts: Customers will receive the following discounts applied to Eligible Volume charges and usage.

13.4.2 Local MCI WorldCom On-Net Term Plan

The Local MCI WorldCom On-Net Term Plan is a term plan, in lieu of all other tariffed term plans, available to facilities based standalone local exchange service customers. Customers who subscribe to Local MCI WorldCom On-Net Term Plan are subject to the following conditions:

A. Definition of Terms

Qualifying Volume is the customer's total monthly recurring charges and usage of the following, after the application of promotional and other discounts: Local Line Charge, Local Trunk-Basic Charge, Local Trunk-DID Charge, Local Trunk-2 Way Direct Charge, DID/2 Way Direct Number Charges, Local ISDN PRI T-1 charge, recurring and non-recurring charges for Standard and Optional Features, as well as local service usage charges. Charges for the following are not included as Qualifying Volume and are not calculated in satisfaction of the Local MCI WorldCom On-Net Term Plan volume commitment: Non-Recurring charges for Local Line, Local Trunk-Basic, Local Trunk-DID, and Local Trunk-2 Way Direct; Directory Assistance usage; non-recurring and recurring charges for Directory Listings; Operator Assisted Surcharges (including Busy Line Verification and Busy Line Interrupt), and taxes.

Eligible Volume is the customer's total monthly recurring charges and usage of the following, after the application of promotional and other discounts: Local Line Charge, Local Trunk-Basic Charge, Local Trunk-DID Charge, Local Trunk-2 Way Direct Charge, DID/2 Way Direct Number Charges, Local ISDN PRI T-1 charge, as well as local service usage charges. Charges for the following are not included as Eligible Volume and will not receive Local MCI WorldCom On-Net Term Plan volume discounts: Non-Recurring charges for Local Line, Local Trunk-Basic, Local Trunk-DID, and Local Trunk-2 Way Direct; recurring and non-recurring charges for Standard and Optional Features; Directory Assistance usage; non-recurring and recurring charges for Directory Listings; Operator Assisted Surcharges (including Busy Line Verification and Busy Line Interrupt), and taxes.

B. Term Commitment and Renewal Options

A customer must commit to service for a term of either one, two, three, four, or five years. The term of service will commence no earlier than the first day of the next billing month in which the customer subscribes to the plan. A plan will automatically renew for an equivalent term and volume commitment upon expiration of its term unless the customer provides written notification to cancel the Local MCI WorldCom On-Net Term Plan, which must be received by the Company no more than 30 days after expiration of the existing term. If the customer cancels the existing term plan within 30 days after expiration of the existing term, the customer will receive the discounts for which the customer qualifies during the 30-day period following the expiration of the existing term of service.

C. Volume commitment

A customer may elect a Local MCI WorldCom On-Net Term Plan monthly volume commitment of one of the following amounts, calculated after the application of promotional and other discounts: \$100; \$250; \$500; \$1,000; \$2,000; \$3,000; \$4,000; \$5,000; \$7,000, or an annual volume commitment of one of the following amounts, calculated after the application of promotional and other discounts: \$1,200, \$3,000, \$6,000, \$12,000, \$24,000, \$36,000, \$48,000, \$60,000, \$84,000, \$120,000; \$180,000; \$300,000; \$600,000, \$900,000, \$1.2M, \$1.8M, and \$2.4M.

The customer's volume commitment will be based upon the customer's Qualifying Volume. At any time during the term of service, a customer may elect a higher equivalent annualized volume commitment. If a customer so elects, the term of service expiration date will not change. The new volume commitment will apply beginning in the following month for monthly commitments and as of the beginning of the commitment year in which the new volume commitment is elected for annual commitments. The discounts associated with the new commitment volume level apply to charges and usage only from the new election date forward.

13.7 Virtual Foreign Exchange (VFX) Service

13.7.1 Description

VFX Service enables a Customer to receive Company-provided Exchange Access Service at a point outside the Local Exchange Service Area that normally serves the customer’s location. VFX service can be used to receive one-way inbound digital traffic only. Customers subscribing to VFX service must purchase an entire T-1 and meet the following conditions: 1) 100 percent of the traffic carried must be inbound local; and 2) the average off-hook time per call is more than ten minutes.

The Local Exchange Calling Area and all Usage Services rates which apply to a VFX Exchange Access Service are the same as those which regularly apply to other Company-provided Exchange Access Services bearing the same NPA-NXX designation.

Customers are prohibited from using VFX service to place outbound calls including, but not limited to “911” emergency numbers. This restriction is required in order to assure that emergency calls are routed to the Public Safety Answering Point serving the geographical area associated with the Customer’s telephone number. The Company strongly recommends that each Customer maintain at least one telephone exchange service access line bearing an NPA-NXX designation associated with the Customer’s actual geographic location for emergency use.

VFX Service customers are not eligible to enroll in the On-Net Term Plan or Local On-Net Term Plan discount programs.

C. Term Plans

The VFX Service Term Plan is a term plan, in lieu of all other tariffed term plans, available to VFX Service customers. Customers who subscribe to VFX Service Term Plan are subject to the following conditions:

Definition of Terms:

Qualifying Volume is the customer's total monthly recurring VFX Service Digital Per Trunk charge, monthly recurring VFX charge, monthly recurring charges for VFX Service Optional Features and monthly recurring charges for Local ISDN-PRI Optional Features, after the application of promotional and other discounts. Charges for the following are not included as Qualifying Volume and are not calculated in satisfaction of the FX Service Term Plan volume commitment: Non-recurring charges for VFX Service; non-recurring charges for FX Service Optional Features; non-recurring charges for Local ISDN-PRI, and taxes.

Eligible Volume is the customer's total monthly recurring VFX Service Digital Per Trunk charge and VFX charge, after the application of promotional and other discounts. Charges for following are not included as Eligible Volume and will not receive VFX Service Term Plan volume discounts: Non-recurring charges for VFX Service; non-recurring and monthly recurring charges for VFX Service Optional Features; non-recurring and monthly recurring charges for Local ISDN-PRI Optional Features, and taxes.

Term Commitment and Renewal Options: A customer must commit to a service for a term of either one, two, three, four, or five years. The term of service will commence no earlier than the first day of the next billing month in which the customer subscribes to the plan. A plan will automatically renew for an equivalent term and volume commitment upon expiration of its term unless the customer provides written notification to cancel the VFX Service Term Plan, which must be received by the Company no more than 30 days after expiration of the existing term. If the customer cancels the existing term plan within 30 days after expiration of the existing term, the customer will receive the discounts for which the customer qualifies during the 30-day period following the expiration of the existing term of service.

Volume Commitment: A customer may elect a VFX Service Term Plan monthly volume commitment of one of the following amounts, calculated after the application of promotional and other discounts: \$100; \$250; \$500; \$1,000; \$2,000; \$3,000; \$4,000; \$5,000; \$7,000, or an annual volume commitment of the following amounts, calculated after the application of promotional and other discounts: \$120,000; \$180,000; \$300,000; \$600,000; \$900,000; \$1.2 million; \$1.8 million, \$2.4 million. The customer's volume commitment will be based upon the customer's Qualifying Volume. At any time during the term of service, a customer may elect a higher equivalent Annualized volume commitment. If a customer so elects, the term of service expiration date will not change. The new volume commitment will apply beginning in the following month for monthly commitments and as of the beginning of the commitment year in which the new volume commitment is elected for annual commitments. The discounts associated with the new commitment volume level apply to charges and usage only from the new election date forward.

Underutilization Charges: If at the end of any year of the term of service, a customer fails to satisfy its annual volume commitment, the customer must pay the difference between the customer's actual Qualifying Volume in that year and the annual volume commitment. If at the end of any month of the term of service, a customer fails to satisfy its monthly volume commitment, the customer must pay the difference between the customer's actual Qualifying Volume in that month and the monthly volume commitment.

Early Termination Charges:

Cancellation of Discontinuance without Liability: If; (I) the customer's use of VFX Service under a VFX Service Term Plan equals or exceeds the customer's equivalent annualized minimum volume commitment or monthly volume commitment and (II) at the time of termination the customer is enrolled in a new VFX Service Term Plan with a volume commitment which equals or exceeds the customer's existing volume commitment, the customer may terminate service under Term Plan without liability as follows: (I) the customer may terminate service at any time during the last three months of the term of service if the customer's VFX Service Term Plan's term commitment is one year: or, (II) the customer may terminate service at any time during the last six months of the term of service if the customer's new VFX Service Term Plan's term commitment is equal to or greater than two years.

Cancellation or Discontinuance with Liability: Discontinuance of all services furnished under the VFX Service Term Plan prior to the expiration of the committed term of service constitutes discontinuance of the plan and the customer will be billed and required to pay an early termination charge equal to the Underutilization Charge for the year of termination plus 50% of all of each annual or monthly volume commitment for each year remaining in the unfulfilled term of service.

Discounts: Customer will receive the following discounts applied to Eligible Volume charges and usage.

13.8 Local ISDN Primary Rate Interface (Local ISDN PRI)

Local ISDN-PRI is an alternative arrangement for individual local exchange services such as Local Trunk Basic and Local Trunk DID. Local ISDN-PRI is provisioned at the 1.544 Mbps rate via the Primary Rate Interface standard of the Integrated Services Digital Network (ISDN). Local ISDN-PRI provides the Customer with the capabilities of simultaneous access, transmission and switching of voice, data and imaging services via channelized transport.

13.8.1 Local ISDN-PRI Service Arrangement - One or more Service Configurations can be combined to create a Local ISDN-PRI Service Arrangement. Customers may have multiple Local ISDN-PRI Service Arrangements per location, however for each Service Arrangement one Service Configuration 1 must be included. The controlling D channel will always reside on Service Configuration 1.

The D channel is a 64 Kbps channel that carries signaling and control for the B channels. The capabilities of the D channel are contained within the customer's Service Configuration.

The ISDN Digital Facility is ordered separately and not included as part of the Service Configuration.

13.8.1.1 Service Configuration 1 - The first Service Configuration for any Local ISDN-PRI Service Arrangement must be a Service Configuration 1. Service Configuration 1 provides twenty-three (23) 64 Kbps B channels and one (1) primary 64 Kbps D signaling channel. The primary D channel is an-out-of band signaling channel used to control and route all of the B channel traffic within the Local ISDN-PRI Service Arrangement.

13.8.1.2 Service Configuration 2 - This configuration is only available in conjunction with Service Configuration 1. It provides an additional twenty-four (24) 64 Kbps B channels which are controlled by the D channel on Service Configuration 1. Multiple Service Configuration 2s may be associated with a Service Configuration 1 subject to switching equipment limitations.

The bearer (or B) channels are used for information transfer between users. B channels provide the same features as Local Trunk Basic and Local Trunk DID. To receive the DID capability, customers must order separately DID telephone numbers, as found in Section 13.2.2 preceding.

13.8.1.3 Service Configuration 3 - This configuration is also only available to subscribers who have a Service Configuration 1. It provides a backup 64 Kbps D channel and twenty-three (23) additional 64 Kbps B channels. The backup D channel will control and route all of the B channel traffic of a single PRI Service Arrangement in the event the D channel on the primary configuration (Service Configuration 1) fails. A maximum of one Service Configuration 3 may be included with each Local ISDN-PRI Service Arrangement. Service Configuration 3 is available subject to switching equipment capabilities.

The bearer (or B) channels are used for information transfer between users. B channels provide the same features as Local Trunk Basic and Local Trunk DID. To receive the DID capability, customers must order separate DID telephone numbers, as found in Section 13.2.2 preceding.

13.8.2 Optional Features: In addition to providing Local Exchange Services specified above, Local ISDN-PRI can be configured to support the following optional advanced ISDN features:

Call-by-Call Service Selection: Allows B channels to be shared between multiple services carried over a single PRI Local Serving Arrangement.

Calling Number Delivery: Allows the customer to receive the originating caller's working telephone number provided this information is forwarded to the Company by the caller's Local Exchange and/or Long Distance Carrier.

Remote Call Forwarding (RCF)
 Overflow Routing

Feature Package 1 includes call by Feature and Calling number Delivery.
