4.27 Direct Inward Dial (DID) Service

4.27.1 Description

DID service is an optional feature which can be purchased in conjunction with Company-provided DID Trunks or Digital Trunks. DID service transmit the dialed digits for all incoming calls allowing the Customer's PBX to route incoming calls directly to individual stations corresponding to each individual DID number. Charges for DID number blocks apply in addition to charges specified for DID Trunks in Section 4.24.

Customer is required to purchase at least one DID number block for each DID-equipped trunk or trunk group, or DID-equipped channel or channel group. The Company reserves the right to limit the amount of DID numbers that will constitute a block of telephone numbers. The amount of DID numbers included in a telephone number group will be determined at the sole discretion of the Company, and will reflect the efficient management of the Company's resources. In addition, the Company reserves the right to review vacant DID station or stations not in use to determine efficient telephone number utilization. Should the Company determine based on its own discretion that there is inefficient number utilization, the Company may either reassign the DID numbers or charge an Underutilization Telephone Number Assignment Fee.

The Customer has no property right to the telephone number or any other call number destination associated with DID service furnished by the Company, and no right to the continuance of service through any particular end office. The Company reserves the right to change such numbers, or end office designation associated with such numbers, or both, assigned to the Customer, whenever the Company deems it necessary to do so in the conduct of its business.

4.46 Local ISDN Primary Rate Interface (Local ISDN-PRI)

Local ISDN-PRI is an alternative arrangement for individual local exchange services such as Local Trunk - Basic and Local Trunk - DID. Local ISDN-PRI is provisioned at the 1.544 Mbps rate via the Primary Rate Interface standard of the Integrated Services Digital Network (ISDN). Local ISDN-PRI provides the Customer with the capabilities of simultaneous access, transmission and switching of voice, data and imaging services via channelized transport.

4.46.1 Local ISDN-PRI Service Arrangement - One or more Service Configurations can be combined to create a Local ISDN-PRI Service Arrangement. Customers may have multiple Local ISDN-PRI Service Arrangements per location, however for each Service Arrangement one Service Configuration 1 must be included. The controlling D channel will always reside on Service Configuration 1.

The D channel is a 64 Kbps channel that carries signaling and control for the B channels. The capabilities of the D channel are contained within the customer's Service Configuration.

4.46.1.1 Service Configuration 1 - The first Service Configuration for any Local ISDN-PRI Service Arrangement must be a Service Configuration 1. Service Configuration 1 provides twenty-three (23) 64 Kbps B channels and one (1) primary 64 Kbps D signaling channel. The primary D channel is an-out-of band signaling channel used to control and route all of the B channel traffic within the Local ISDN-PRI Service Arrangement.

4.46.1.2 Service Configuration 2 - This configuration is only available in conjunction with Service Configuration 1. It provides an additional twenty-four (24) 64 Kbps B channels which are controlled by the D channel on Service Configuration 1. Multiple Service Configuration

EFFECTIVE: OCTOBER 1, 2018

2s may be associated with a Service Configuration 1 subject to switching equipment limitations.

The bearer (or B) channels are used for information transfer between users. B channels provide the same features as Local Trunk Basic and Local Trunk DID. To receive the DID capability, customers must order separately DID telephone numbers, as found in Section 4.45.

4.46.1.3 Service Configuration 3 - This configuration is also only available to subscribers who have a Service Configuration 1. It provides a backup 64 Kbps D channel and twenty-three (23) additional 64 Kbps B channels. The backup D channel will control and route all of the B channel traffic of a single PRI Service Arrangement in the event the D channel on the primary configuration (Service Configuration 1) fails. A maximum of one Service Configuration 3 may be included with each Local ISDN-PRI Service Arrangement. Service Configuration 3 is available subject to switching equipment capabilities.

The bearer (or B) channels are used for information transfer between users. B channels provide the same features as Local Trunk Basic and Local Trunk DID. To receive the DID capability, customers must order separate DID telephone numbers, as found in Section 4.45.

4.46.2 Optional Features: Feature Package 1 includes Call-by-Call Service Selection and Calling Number Delivery:

Call-by-Call Service Selection: Allows B channels to be shared between multiple services carried over a single PRI Local Serving Arrangement.

Calling Number Delivery: Allows the customer to receive the originating caller's working telephone number provided this information is forwarded to the Company by the caller's Local Exchange and/or Long Distance Carrier.

These features can be ordered separately or combined in Feature Package 1.

Remote Call Forwarding  
Overflow Routing

4.46.3 Local ISDN-Primary Rate Interface (Local ISDN-PRI) Rates and Charges:

Non-Recurring and Monthly Recurring Charges as specified below apply per T-1 unless otherwise noted. The Local ISDN PRI T-1 Non-Recurring and Monthly Recurring T-1 charges include Service Configuration and B Channel Service charges. 4.53 Save Program

Definitions:

An existing customer is a customer who is receiving service under this Catalog Schedule for at least 12 months prior to enrollment in this program.

Eligibility: To be eligible for this program, the customer:

- must be an existing facilities based business customer;
- must be in good standing;
- must bill at least \$50 in current charges in any one month prior to enrollment in this program;
- represent to the Company's satisfaction, as determined with the Company's sole discretion, that it will enter into another carrier's offer in absence of any further inducement from the Company to remain subscribed to Company services.

Benefits: After enrollment in this program, the Company will provide a one-time credit, not to exceed \$5,000, equal to the net monthly recurring charges billed during the first full invoice after the Company receives notification from the Customer that it wishes to discontinue all service (Program Credit).

Other Conditions:

A Customer who discontinues all service within three months after receiving the Program Credit will be billed and required to repay the Program Credit. A customer will only be eligible to receive one Program Credit in any twelve-month period. Customer's receiving the benefits of this program is not eligible to receive the benefits of any promotional offering.

EFFECTIVE: OCTOBER 1, 2018

4.54 Local Nationwide One Program

The Local Nationwide One Program is available to existing facilities-based business customers who order a new T-1 of Digital Local Trunk-Basic, Digital Local Trunk-DID, Digital Local Trunk-2 Way Direct and/or Local ISDN-PRI service (Program Service). To be eligible for this program, an existing customer must be an existing subscriber to an On-Net Term Plan or Local On-Net Term Plan (Term Plan).

Benefits: Enrolled Customers may select a metered plan or flat rate plan per each location. The following monthly recurring charge (Program Charge) per T-1 will apply for the length of the customers term commitment based on the plan selected:

5.23 Verizon Loyalty Plus III Plan

Offer: Existing Company customers who simultaneously order a new eligible MCImetro Legacy Company service "unit" (see table below), excluding upgrades and conversions on existing service and enroll that unit in this plan will receive the following benefit: three credits in the amount indicated in the table below, applied to the monthly recurring charges for the new MCImetro Legacy Company service unit. The credits will be applied to the second full-month's, sixth full-month's, and twelfth full-month's invoice following activation of the new service unit. Customer may designate that the credit be applied either as an invoice credit or a deposit in Customer's Fund account. To receive the benefits of this plan, each eligible service unit must be active, with no pending cancellation request, at the time the credits are applied. Except for these three credits, this plan does not change the terms and conditions that apply to the new service unit.

Customers will also receive a waiver of the non-recurring Company-billed installation charges for installation following plan enrollment of all eligible service units identified below. Usage charges, monthly recurring charges, expedite charges, change charges, surcharges, any charges imposed by third parties (including access, egress, jack, or wiring charges), taxes or tax-like surcharges, or other Governmental Charges will not be waived.

This plan applies only with respect to new eligible MCImetro Legacy Company provided service units ordered for installation within 30 days of order (or by Company's quoted installation date if later), by a Customer with at least one MCImetro Legacy Company service which has been actively billing for at least 90 days prior to enrollment in this plan. Customer may enroll any eligible service unit, but any individual unit may be enrolled only once.
