Such contracts may require, among other things, that the customer submit to MCI a copy of all scripts of pre-recorded messages, to be placed on MCI's 900 Service, along with a copy of any advertising and promotional materials, which MCI in turn may furnish to those requested to perform the billing.

### SECTION C - SERVICE DESCRIPTIONS AND RATES

#### 3. METERED USE SERVICE (Cont.)

##### .04 Option C (MCI WATS)

Option C involves the provision of intercity communications channels. Option C is a one-way, multipoint service requiring the customer to originate calls via dedicated facilities between his premises and MCI's terminal location and allowing the termination of calls via a combination of MCI-provided intercity facilities and local business telephone lines, and the resold facilities of other carriers. All Option C calls are subject to a one minute average connect time (i.e. total monthly minutes of use divided by total monthly calls must equal at least one minute). All Option C calls are rounded to the next higher 6-second increment. <sup>1/</sup>  
[<sup>1/</sup> Beginning December 10, 1993, Option C (MCI WATS) will not be available to new subscribers.]

##### .041 Monthly Recurring Charges

.0411 Intercity Facilities Usage Charges: Option C is available on the basis of usage charges and is subject to a monthly Minimum Charge.

.04111 Minimum Charge: \$75 for all usage

.04112 Usage Charges: Usage Charges are determined by such variables as Rate Periods, Rate Schedules and Service Areas. The charges are billed according to the average monthly use for each rate period of each dedicated access line within a service group.\* (See definition of "Service Group" in Section A preceding.) The rate period is determined by the day and time at the Option C dedicated access line location.

[\* The average monthly minutes of use for each rate period per access line will be deemed to be the same as the average monthly minutes of total traffic (including traffic to Canada) for each rate period. The resulting effective per minute rate will then be applied to the customers Tier 1 and Tier 2 usage, respectively.]

a) RATE PERIODS:

Business Day Period

8:00 a.m. through 5:00 p.m. Monday through Friday

Evening Period

5:00 p.m. through 11:00 p.m. Sunday through Friday.

b) RATE SCHEDULES:

The Tier 1 hourly Usage Charges as set forth below under Section C-3.041122 shall apply to all calls terminating, via MCI-provided intercity facilities, in those cities set forth in Table IV, Section C-7.

The Tier 2 hourly Usage Charges as specified in Section C-3.041122 below apply to calls terminating, via resold intercity facilities of other carriers, in cities other than those set forth in Table IV, Section C-7.

c) SERVICE AREAS

Service Areas (S.A's) represent broad geographical areas which encompass specific locations to which the customer subscribes. The Service Areas are designated S.A one through S.A. five and each higher Service Area includes service to all lower numbered Service Areas. See Section C-7, Table IV, Part C, for complete geographical coverage of Service Areas.

.041121 Rate Step Table:

The following Rate Step Table is used to determine the usage rates that apply to Option C. To use the table, locate the number in the column under the selected service area. This number is referred to as the Rate Step. Then locate the same Rate Step number on the Monthly Usage Table (Section C-3.041122). The rates listed on that line will apply to the service provided for that Originating State and Service Area.

Method of Determining Usage Charges

Based upon the hourly rates set forth in Section C-3.041122, MCI WATS usage charges are calculated as described below:\*

- a) Determine the total minutes of monthly usage for each rate period over all dedicated access lines in a service group.
- b) Determine the total number of access lines in service during the month (access lines in service for a partial month will be pro-rated).
- c) Determine the average usage for each rate period per access line by dividing the minutes for each rate period from (a) above by the number of lines from (b) above.
- d) Determine the effective rate step for the desired service area from the appropriate originating state.
- e) Determine the effective Tier 1 hourly rate for each rate period by: 1) Multiplying the total hours in each tapered usage increment for that rate period by the associated hourly rate for that increment; 2) totaling these charges for each rate period; and 3) dividing the total by the average usage per line from (c) above.
- f) Repeat step (e) for Tier 2 usage.
- g) Determine the Tier 1 usage charge for each rate period by multiplying the effective Tier 1 hourly rate per rate period from (e) above by the total Tier 1 hours of monthly use in a service group for each rate period, respectively, and totaling these charges.
- h) Repeat step (g) for Tier 2 usage by using the effective Tier 2 hourly rate per rate period as determined in (f) above.
- i) Determine the total Tier 1 and Tier 2 usage charge for all rate periods in each service group by adding the results of (g) and (h) above.

.0412 Circuit Termination Charges

.04121 MCI-provided Dedicated Access Line \$100 each

.04122 Customer-provided Dedicated Access Line \$50 each

.0413 Directory Assistance

An undiscounted charge will be applied to each Directory Assistance call, in accordance with and subject to the provisions of Section B-6.04 herein.

\*Minutes used in the calculation include both intrastate and interstate minutes.

4. CCSA SERVICE

.01 General Description

.011 CCSA Service does not involve the provision of intercity communications channels, but rather is offered as a switching service interconnecting network trunks, including circuits and services provided either by MCI or by other Participating Carriers.<sup>1/</sup> Use of MCI's common control switching machines in connection with this offering may be shared with other customers or other offerings. [1/ Customers who elect to gain access to MCI's Metered Use Service Option C (MCI WATS) in connection with CCSA Service will be billed for monthly usage on the basis of the Tier 1, Service Area 5, hourly rates specified in Section C-3.041122 for their respective originating city. 6. RATE & MILEAGE TABLES

METHOD FOR CALCULATION FOR AIRLINE MILEAGE

.01 Method of Calculation

The airline mileage between two cities can be calculated using the Vertical (V) and Horizontal (H) Coordinates as obtained by reference to AT&T's Tariff F.C.C. No. 274 according to the following formula:

2. METERED USE SERVICE

To determine the mileage between any two cities proceed as follows:

1. Obtain the "V" and "H" coordinates for each city.
2. Obtain the difference between the "V" coordinates of the two cities. Obtain the difference between the "H" coordinates.

Note: The difference is always obtained by subtracting the smaller coordinate from the larger coordinate.

3. Divide each of the differences obtained in 2 by three, rounding each quotient to the nearer integer.
4. Square these two integers and add the two squares. If the sum of the squares is greater than 1,777, divide the integers obtained in 3 by three, and repeat step 4. Repeat this process until the sum of the squares obtained in 4 is less than 1778.
5. The number of successive divisions by three in steps 3 and 4 determines the value of "N". Multiply the final sum of the two squares obtained in step 4 by the multiplier specified in the following table for this value of "N" preceding:

<u>N</u>	<u>MULTIPLIER</u>	<u>MINIMUM RATE MILEAGE</u>
1	0.9	-
2	8.1	41
3	72.9	121
4	656.1	361
5	5,904.9	1,081
6	53,144.1	3,241

6. Obtain square root of product in 5 and with any resulting fraction, round up to next higher integer. This is the rate mileage except that when the mileage so obtained is less than the minimum rate mileage shown in 3. preceding, the minimum rate mileage corresponding to the "N" value is applicable.

Example:

The rate mileage between Atlanta and Savannah is calculated as follows:

	<u>V</u>	<u>H</u>
(a) Atlanta	7260	2083
Savannah	<u>7266</u>	<u>1379</u>
(b) difference	6	704

(c1) divide each difference by three and rounding to nearer integer = 2 and 235

(d1) square integer and add,	$2 \times 2 =$	4
sum of squared integers	$235 \times 235 =$	<u>55225</u> 55229

sum of squared integers is greater than 1,777, so divide integers in (c1) by three and repeat (d1)

(c2) divide integers in (c1) by three and rounding = 1 and 78

(d2) square integer and add,	$1 \times 1 =$	1
sum of squared integers	$78 \times 78 =$	<u>6084</u> 6085

sum of squared integers is greater than 1,777, so divide integers in (c2) by three and repeat (d2)

(c3) divide integers in (c2) by three and rounding = 26

(d3) square integer and add,	$26 \times 26 =$	<u>676</u>
sum of squared integers		676

This sum of squared integers is less than 1778 and was obtained after four successive divisions by three, therefore, "N" = 3

(e) Multiply final sum of squared integers factor (corresponding to "N" = 3)	676 <u>x 72.9</u>	49280
--	----------------------	-------

(f) Square root of 49,280 = 222 and a fraction, which is rounded to 222 miles (fractional miles are considered full miles). The 222 miles is larger than the minimum of 121 miles applicable when "N" = 3 so the rate mileage is 222 miles.

The customer can define two or more originating routing groups and to arrange that calls to a single toll-free service number placed from different routing groups will terminate at different locations.

C. Area Code Blocking

If the call originates from a non-equal access end office, only the NPA will be delivered to the toll-free service customer. Real Time ANI is available with or without DNIS (refer to D. above) and is available only with dedicated toll-free service.

Rates for PhonePass Service may vary depending on the commitment term, total purchase commitment, card printing or packaging and collector purchase rights. All units purchased for the sole purpose of resale, must be purchased with a generic PhonePass Card. If a customer purchases units from the Company for promotion and not resale, the customer may be entitled to a custom PhonePass card printed by the Company. The Outbound Calling Service arrangement is a long distance switch-based service, which is available on either a shared or dedicated access basis. The usage is billed on a flat rated basis. Outbound Calling Service calls are billed in 6 second increments, with an initial billing period of 18 seconds per call.

The Inbound Calling Service arrangement is a toll free switched access service that permits calls to be completed at the Customer's location without charge to the calling party. This service is available on either a shared or dedicated basis. Access to the service is gained by an end user dialing a 10 digit telephone number (e.g., 800+NXX-XXXX) which will terminate at the Customer's location. The usage is billed on a flat rated basis. Toll Free Service calls are billed in 6 second

increments, with an initial billing period of 18 seconds per call. In addition, there is a non-recurring and monthly recurring Toll Free Service number charge, which will be applied either on a "per Toll Free Service number" basis for shared access or on a "per routing arrangement" basis for dedicated access (reference rates in Section 4.4.4.D.3(c)) for Toll Free Service Option rates).

B. Service Arrangements

1. Commitment Levels and Term Plans

Total Solution Series 100\_ Service is available on a month to month basis or on an optional 1 or 2 year Term Plan. Discounts off the base rates are available to the Customer according to the commitment level and Term Plan selected by the Customer.

Total Solution Series 100\_ Service is subject to a minimum monthly usage commitment (after the third full month following the initial installation of service for new Customers) based on the Customer's selected commitment level. The commitment level is calculated from the monthly total of usage generated from the following Company products: shared and dedicated domestic interstate and intrastate outbound and inbound service, international outbound, intraLATA, local service, and calling card. Charges such as taxes, late payment fees or other service non-recurring and monthly recurring charges will not be included in the total usage amount calculation, as well as usage charges from Directory Assistance, Operator Service, voice mail and conference calling.

Should the Customer's actual usage fall below the monthly minimum usage commitment, the Customer is required to pay the Company a fee equal to the difference between the Customer's actual usage and the Customer's minimum monthly commitment. A Customer who terminates a Term Plan prior to the term's expiration will be required to pay in one lump sum an amount equaling the selected monthly commitment level times the number of months remaining in the term, plus an amount equal to any promotional credit, or discount, or waiver, if applicable, that was provided to the Customer.

A Customer may terminate their Term Plan without liability under the following conditions:

- (a) The Customer requests, and remains on, a new Term Plan for a term and commitment level equal to or greater than their current Company Term Plan and commitment level.
- (b) A new Customer (who was not receiving services through the Company prior to execution of the Term Plan) provides written notification to cancel the Term Plan to the Company postmarked within 90 days of the commencement of the Term Plan. The Customer is responsible for payment of services used during this period.

Term Plans will be automatically renewed unless the Customer notifies the Company in writing to cancel the renewal within 30 days of expiration of the current Term Plan.
