 (Beginning December 15, 1998, this plan will no longer be available to new customers subscribing to new SCAs.)

Customers who subscribe to facilities based Local Exchange Service and enroll in a Local Service Term Plan are eligible to receive the discounts described below on specific monthly recurring and usage charges based on the customer's term commitment. The customer must commit to service for a term of either one, two, three, four, or five years. The term of the

Local Service Term Plan will commence no earlier than the first of the next billing month in which the customer subscribes to the plan. The customer will receive the following discounts in lieu of all other discounts or promotions except for the Local Customer Assurance Promotion on the following recurring charges: Local Line, Local Trunk-Basic, DID/2 Way Direct numbering charges, Local Trunk-DID, 2 Way Direct, Local ISDN Primary Rate Interface (Local ISDN-PRI), and usage charges.

2 years	15%
3 years	20%
4 years	20%
5 years	20%

A plan will automatically renew for an equivalent term unless the customer provides written notification to cancel the MCI Local Service Term Plan. This notice must be received by MCI no more than 30 days prior to the expiration of the term plan. A customer can terminate a term plan without liability if the customer enrolls in a new term plan with an expiration date later than the current term plans expiration date.

**Cancellation or Discontinuance with Liability:** Discontinuance of all Local Services furnished under the Local Service Term Plan prior to the expiration of the Committed term constitutes discontinuance of the plan and the customer will be billed and required to pay an early termination charge. The early termination charge will be equal to the customer's highest billed monthly charges incurred during the length of the term commitment multiplied by the number of months remaining in the customer's term plan.

Customers signing a networkMCI One term agreement and integrating their facilities based Local Exchange service can terminate their local term plans at any time without penalty.

For customers that have enrolled in a networkMCI One long distance term plan or special customer arrangement offered by MCI Telecommunications Corporation, the customer's term length may be coterminous with the networkMCI One or special customer arrangement term of service. Accordingly, the customer's actual term may be of a shorter duration than the term commitment selected above. If the customer selects a term commitment greater than the term of service of the networkMCI One or special customer arrangement, the cotermination provision shall not apply.

For those customers who subscribe to a networkMCI One term plan or special customer arrangement, the early termination charges associated with that term plan or special customer arrangement will apply in lieu of the charges specified above. In addition, customers will be required to repay any credits received as a result of enrolling in the term plan.

3.1.7 Local ISDN Primary Rate Interface Local (Local ISDN PRI): Local ISDN-PRI is an alternative arrangement for individual local exchange services such as Local Trunk Basic and Local Trunk DID. Local ISDN-PRI is provisioned at the 1.544 Mbps rate via the Primary Rate Interface standard of the Integrated Services Digital Network (ISDN). Local ISDN-PRI provides the Customer with the capabilities of simultaneous access, transmission and switching of voice, data and imaging services via channelized transport.

3.1.7.1 Local ISDN-PRI Service Arrangement - One or more Service Configurations can be combined to create a Local ISDN-PRI Service Arrangement. Customers may have multiple Local ISDN-PRI Service Arrangements per location, however for each Service Arrangement one Service Configuration 1 must be included. The controlling D channel will always reside on Service Configuration 1.

The ISDN Digital Facility is ordered separately and not included as part of the Service Configuration.

3.1.7.1.1 Service Configuration 1 - The first Service Configuration for any PRI Local Service Arrangement must be a Service Configuration 1. Service Configuration 1 provides twenty-three (23) 64 Kbps B channels and one (1) primary 64 Kbps D signaling channel. The primary D channel is an-out-of band signaling channel used to control and route all of the B channel traffic within the PRI Local Service Arrangement.

3.1.7.1.2 Service Configuration 2 - This configuration is only available in conjunction with Service Configuration 1. It provides an additional twenty-four (24) 64 Kbps B channels which are controlled by the D channel on Service Configuration 1. Multiple Service Configuration 2s may be associated with a Service Configuration 1 subject to switching equipment limitations.

3.1.7.1.3 Service Configuration 3 - This configuration is also only available to subscribers who have Service Configuration 1. It provides a backup 64 Kbps D channel and twenty-three (23) additional 64 Kbps B channels. The backup D channel will control and route all of the B channel traffic of a single PRI Service Arrangement in the event the D channel on the primary configuration (Service Configuration 1)

fails. A maximum of one Service Configuration 3 may be included with each Local ISDN-PRI Service Arrangement. Service Configuration 3 is available subject to switching equipment capabilities.

The bearer (or B) channels are used for information transfer between users. B channels provide the same features as Local Trunk Basic and Local Trunk DID. To receive the DID capability, customers must order separately DID telephone numbers, as found in Section 3.1.3.2 preceding.

The D channel is a 64 Kbps channel that carries signaling and control for the B channels. The capabilities of the D channel are contained within the customers Service Configuration.

3.1.7.2 Optional Features: In addition to providing Local Exchange Services specified above, Local ISDN-PRI can be configured to support the following optional advanced ISDN features:

Call-by-Call Service Selection: Allows B channels to be shared between multiple services carried over a single Local ISDN-PRI Serving Arrangement.

Call Number Delivery: Allows the customer to receive the originating caller's working telephone number provided this information is forwarded to the Company by the caller's Local Exchange and/or Long Distance Carrier.

These features can be ordered separately or combined in Feature Package 1.

Term Commitment and Renewal Options: A customer must commit to service for a term of either one, two, three, four, or five years. The term of service will commence no earlier than the first day of the next billing month in which the customer subscribes to the plan. A plan will automatically renew for an equivalent term and volume commitment upon expiration of its term unless the customer provides written notification to cancel the Local On-Net Term Plan, which must be received by the Company no more than 30 days after expiration of the existing term. If the customer cancels the existing term plan within 30 days after expiration of the existing term, the customer will receive the discounts for which the customer qualifies during the 30-day period following the expiration of the existing term of service.

Volume commitment: A customer may elect a Local On-Net Term Plan monthly volume commitment of one of the following amounts, calculated after the application of promotional and other discounts: \$100; \$250; \$500; \$1,000; \$2,000; \$3,000; \$4,000; \$5,000; \$7,000, or an annual volume commitment of one of the following amounts, calculated after the application of promotional and other discounts: \$120,000; \$180,000; \$300,000; \$600,000; \$900,000; \$1.2M; \$1.8M; 2.4M. The customer's volume commitment will be based upon the customer's Qualifying Volume. At any time during the term of service, a customer may elect a higher equivalent annualized volume commitment. If a customer so elects, the term of service expiration date will not change. The new volume commitment will apply beginning in the following month for monthly commitments and as of the beginning of the commitment year in which the new volume commitment is elected for annual commitments. The discounts associated with the new commitment volume level apply to charges and usage only from the new election date forward.

Underutilization Charges: If at the end of any year of the term of service, a customer fails to satisfy its annual volume commitment, the customer must pay the difference between the customer's actual Qualifying Volume in that year and the annual volume commitment. If at the end of any month of the term of service, a customer fails to satisfy its monthly volume commitment, the customer must pay the difference between the customer's actual Qualifying Volume in that month and the monthly volume commitment.

Early Termination Charges:

Cancellation of Discontinuance without Liability: If: (i) the customer's use of Local Exchange Service under a Local On-Net Term Plan equals or exceeds the Customer's equivalent annualized minimum volume commitment or monthly volume commitment and (ii) at the time of termination the customer is enrolled in a new Local On-Net Term Plan with a volume commitment which equals or exceeds the Customer's existing volume commitment, the customer may terminate service under Term Plan without liability as follows: (i) the customer may terminate service at any time during the last three months of the term of service if the customer's Local On-Net Term Plan's term commitment is one year; or (ii) the customer may terminate service at any time during the last six months of the term of service if the customer's new Local On-Net Term Plan's term commitment is equal to or greater than two years.

Cancellation or Discontinuance with Liability: Discontinuance of all services furnished under the Local On-Net Term Plan prior to the expiration of the committed term of service constitutes discontinuance of the plan and the customer will be billed and required to pay an early termination charge equal to the Underutilization Charge for the year of termination plus 50% of all of each annual or monthly volume commitment for each year remaining in the unfulfilled term of service.

7. Miscellaneous Services (Cont’d)

7.1 Selective Call Screening (SCS)

Selective Call Screening (SCS) is a call processing arrangement designed to restrict certain types of billing options from a line or trunk originating a call. The service is offered to provide customers with a choice of originating call screening options when an operator services system is involved with the call processing. The Selective Call Screening service provides information to the operator services platform (mechanized or live operator) to denote special originating call handling was requested. The following billing options are available: billing as collect, bill to a third party number or billed to a calling card.

The Company assumes no liability for calls completed by any other entity, carrier or operator services platform as long as the Selective Call Screening code accompanies the call sent to another entity, carrier or operator services platform.

SCS Customers are responsible for all toll charges billed to their line(s) for calls that are not carried solely over MCI network and facilities.

SCS is offered subject to switch availability on MCI Local Business facilities (lines and trunks).

Term Commitment and Renewal Options: A customer must commit to a service for a term of either one, two, three, four, or five years. The term of service will commence no earlier than the first day of the next billing month in which the customer subscribes to the plan. A plan will automatically renew for an equivalent term and volume commitment upon expiration of its term unless the customer provides written notification to cancel the FX Service Term Plan, which must be received by the Company no more than 30 days after expiration of the existing term. If the customer cancels the existing term plan within 30 days after expiration of the existing term, the customer will receive the discounts for which the customer qualifies during the 30-day period following the expiration of the existing term of service.

The new volume commitment will apply beginning in the following month for monthly commitments and as of the beginning of the commitment year in which the new volume commitment is elected for annual commitments. The discounts associated with the new commitment volume level apply to charges and usage only from the new election date forward.

Underutilization Charges: If at the end of any year of the term of service, a customer fails to satisfy its annual volume commitment, the customer must pay the difference between the customer's actual Qualifying Volume in that year and the annual volume commitment.
