Method of Determining Usage Charges

Based upon the hourly rates set forth in Section C-3.041122, MCI WATS usage charges are calculated as described below:<sup>1</sup>

[<sup>1</sup> Minutes used in the calculation include both intrastate and interstate minutes.]

- a) Determine the total minutes of monthly usage for each rate period over all dedicated access lines in a service group.
- b) Determine the total number of access lines in service during the month (access lines in service for a partial month will be pro-rated).
- c) Determine the average usage for each rate period per access line by dividing the minutes for each rate period from (a) above by the number of lines from (b) above.
- d) Determine the effective rate step for the desired service area from the appropriate originating state.
- e) Determine the effective Tier 1 hourly rate for each rate period by: 1) Multiplying the total hours in each tapered usage increment for that rate period by the associated hourly rate for that increment; 2) totaling these charges for each rate period; and 3) dividing the total by the average usage per line from (c) above.
- f) Repeat step (e) for Tier 2 usage.
- g) Determine the Tier 1 usage charge for each rate period by multiplying the effective Tier 1 hourly rate per rate period from (e) above by the total Tier 1 hours of monthly use in a service group for each rate period, respectively, and totaling these charges.

EFFECTIVE: OCTOBER 1, 2017

- h) Repeat step (g) for Tier 2 usage by using the effective Tier 2 hourly rate per rate period as determined in (f) above.
- i) Determine the total Tier 1 and Tier 2 usage charge for all rate periods in each service group by adding the results of (g) and (h) above.

4. CCSA SERVICE

.01 General Description

- .011 CCSA Service does not involve the provision of Interexchange communications channels, but rather is offered as a switching service interconnecting network trunks, including circuits and services provided either by the Company or by other Participating Carriers.<sup>1</sup> Use of the Company's common control switching machines in connection with this offering may be shared with other customers or other offerings.

[<sup>1</sup> Customers who elect to gain access to Company Metered Use Service Option C (MCI WATS) in connection with CCSA Service will be billed for monthly usage on the basis of the Tier 1, Service Area 5, hourly rates specified in Section C-3.041122 for their respective originating city. However, for such CCSA-related Metered Use Service Option C usage, the average monthly minutes of use for each rate period per access line will be calculated based upon the average monthly minutes of total traffic for each rate period per CCSA Dedicated Access Arrangement. The resulting effective per minute rate will then be applied to the customer's Metered Use Service Option C Tier 1 usage. The effective per minute rate for Tier 2 usage will remain unaffected by the above.]
