XIII. GRANDFATHERED SERVICES

Gaps in the numbering of sections indicate sections which are intentionally left blank. To a large extent, this is due to the desire to have the sections below match the section numbers to these services which were in Company Tariff No. 2 to the extent applicable.

Effective on or after August 8, 2016, MCI Communications Services, Inc. will no longer offer Person-to-Person, 3rd Number Billing, or Collect Call operator services throughout the United States to customers that MCI serves as an interexchange carrier or facility-based local carrier.

3. METERED USE SERVICE

.04 Option C (MCI WATS)

Beginning April 1, 1994, Option C (WATS) will not be available to new subscribers.

Option C involves the provision of intercity communications channels. Option C is a one-way, multipoint service requiring the customer to originate calls via dedicated facilities between his premises and MCI's terminal location and allowing the termination of calls via a combination of MCI-provided intercity facilities and local business telephone lines, and the resold facilities of other carriers. All Option C calls are subject to a one minute average connect time (i.e., total monthly minutes of use divided by total monthly calls must equal at least one minute). All Option C calls are rounded to the next higher 6-second increment. The Company does not invoice charges in fractions of a cent; the minimum charge for any charge element is \$0.01.

.041 Monthly Recurring Charges

.0411 Intercity Facilities Usage Charges: Option C is available on the basis of usage charges and is subject to a monthly Minimum Charge.

.04111 Minimum Charge: \$75 for all usage

.04112 Usage Charges: Usage Charges are determined by such variables as Rate Periods, Rate Schedules and Service Areas. The charges are billed according to the average monthly use* for each rate period of each dedicated access line within a service group. (See definition of "Service Group" in Section A preceding.) The rate period is determined by the day and time at the Option C dedicated access line location.

* The average monthly minutes of use for each rate period per access line will be deemed to be the same as the average monthly minutes of total traffic (including traffic to Canada) for each rate period. The resulting effective per minute rate will then be applied to the customer's Tier 1 and Tier 2 usage, respectively.

a) Rate Periods:

Business Day Period

8:00 a.m. through 5:00 p.m. Monday through Friday

Evening Period

5:00 p.m. through 11:00 p.m. Sunday through Friday and all day on MCI -recognized National Holidays except when a lower rate would normally apply.

Night and Weekend Period
 11:00 p.m. to 8:00 a.m. all days
 8:00 a.m. to 11:00 p.m. Saturday
 8:00 a.m. to 5:00 p.m. Sunday

b) Rate Schedules:

The Tier 1 hourly Usage Charges as set forth below under Section C-3.041122 shall apply to all calls terminating, via MCI- provided intercity facilities, in those cities set forth in Table IV, Section C-7.

The Tier 2 hourly Usage Charges as specified in Section C-3.041122 below apply to calls terminating, via resold intercity facilities of other carriers, in cities other than those set forth in Table IV, Section C-7.

c) Service Areas:

Service Areas (SAs) represent broad geographical areas which encompass specific locations to which the customer subscribes. The Service Areas are designated SA 1 through SA 5 and each higher Service Area includes service to all lower numbered Service Areas. See Section C-7, Table IV, Part C, for complete geographical coverage of Service Areas.

.041121 Rate Step Table:

The following Rate Step Table is used to determine the usage rates that apply to Option C. To use the table, locate the number in the column under the selected service area. This number is referred to as the Rate Step. Then locate the same Rate Step number on the Monthly Usage Table (Section C-3.041122). The rates listed on that line will apply to the service provided for that Originating State and Service Area.

Method of Determining Usage Charges

Based upon the hourly rates set forth in Section C-3.041122, MCI WATS usage charges are calculated as described below.*

- a) Determine the total minutes of monthly usage for each rate period over all dedicated access lines in a service group.
- b) Determine the total number of access lines in service during the month (access lines in service for a partial month will be pro-rated).
- c) Determine the average usage for each rate period per access line by dividing the minutes for each rate period from (a) above by the number of lines from (b) above.
- d) Determine the effective rate step for the desired service area from the appropriate originating state.
- e) Determine the effective Tier 1 hourly rate for each rate period by: 1) Multiplying the total hours in each tapered usage increment for that rate period by the associated hourly rate for that increment; 2) totaling these charges for each rate period; and 3) dividing the total by the average usage per line from (c) above.
- f) Repeat step (e) for Tier 2 usage.
- g) Determine the Tier 1 usage charge for each rate period by multiplying the effective Tier 1 hourly rate per rate period from (e) above by the total Tier

Effective October 1, 2017

1 hour of monthly use in a service group for each rate period, respectively, and totaling these charges.

- h) Repeat step (g) for Tier 2 usage by using the effective Tier 2 hourly rate per rate period as determined in (f) above.
- i) Determine the total Tier 1 and Tier 2 usage charge for all rate periods in each service group by adding the results of (g) and (h) above.

* Minutes used in the calculation include both intrastate and interstate minutes.

.0412 Circuit Termination Charges

.04121 MCI-provided Dedicated Access Line \$100.00 each

.041211 Special Access Surcharge*

* If applicable, a pass through Special Access Surcharge will be applied to each voice grade equivalent circuit end provided by a Local Exchange Carrier. Customers who use their access line for both intrastate and interstate calling pay only one Surcharge per access line a month. The Surcharge, however, will not apply to those customers who furnish MCI with an exemption certification (as defined herein).

.04122 Customer-provided Dedicated Access Line \$ 50.00 each

.0413 Directory Assistance

An undiscounted charge will be applied to each Directory Assistance call, subject to the provisions of Section B-6.04.

.05 Option F (MCI 800 Service)

MCI 800 Service is an inward WATS service that permits intrastate calls to a customer's station in one location from stations located in other exchanges and in which the MCI 800 customer is billed for the calls rather than the call originators. All Option F calls are subject to an 18-second minimum initial period and additional 6-second increments. All Option F calls are rounded to the next higher 6-second increment.

A call begins when call termination is received by or passes through customer premises equipment. It is the customer's responsibility to pass appropriate answer supervision back to the MCI point of connection. Unless otherwise indicated herein, the terms "MCI 800 Service", "888 Service", and/or "Toll Free Service"; and the terms "800 number", "888 number", and/or "Toll Free number", can be used interchangeably when used throughout this tariff.

The Company does not invoice charges in fractions of a cent; the minimum charge for any charge element is \$0.01.

.011 CCSA Service does not involve the provision of intercity communications channels, but rather is offered as a switching service interconnecting network trunks, including circuits and services provided either by MCI or by other Participating Carriers.* Use of MCI's common control switching machines in connection with this offering may be shared with other customers or other offerings.

* Customers who elect to gain access to MCI's Metered Use Service Option C (MCI WATS) in connection with CCSA Service will be billed for monthly usage on the basis of the Tier 1, Service Area 5, hourly rates specified in Section C-3.041122 for their respective originating city. However, for such CCSA-related Metered Use Service Option C usage, the average monthly minutes of use for each rate period per access line will be calculated based upon the average monthly minutes of total traffic for each rate period per CCSA Dedicated Access Arrangement. The resulting effective per minute rate will then be applied to the customer's Metered Use Service Option C Tier 1 usage. The effective per minute rate for Tier 2 usage will remain unaffected by the above.

.012 Two customer options are available under this service: A full service version, Option A (Telemanagement) and a limited service version, Option B (Least Cost Routing). Outlined below are the features available, at the customer's option, which are included under the basic monthly recurring charges, along with the limitations associated with each option.
