

## Virtual Communications Express

1. **Rates and Charges.** Current rates and charges for Virtual Comm are described below. Rates and charges for international calls, certain Local features, directory assistance, and related items are set forth in the Guide. Rates and charges for Virtual Comm that are designated as “fixed for the Service Term” are subject to change if Virtual Comm is subjected to regulation by any State, or if Federal regulation of Virtual Comm is expanded. In addition to the rates and charges specified in the Guide, selected Monthly Recurring Charges (MRCs), Non-Recurring Charges (NRCs), and other charges are set forth below.

1.1 **Virtual Comm Pricing Options – Service.** Virtual Comm is offered with either Standard or Premier pricing options as described below and selected per location by Customer:

- At “Standard” locations, Customer pays for each end user and then pays for trunk capacity separately to support the expected call volume for end users at that location.
- “Premier” locations include trunk capacity to complete calls to the public switched telephone network (PSTN) or to other Virtual Comm users for all user and bundle types ordered at the location.

Customer will pay for end user bundles and trunks at the following rates, which are fixed for the Service Term:

<b>End User Bundles and Trunks</b> Except as noted for the Standard Trunk Capacity pricing option, each Virtual Comm end user must be assigned to one (and only one) of the user bundles listed below.	<b>MRC</b>
<b>Standard User</b> – provides basic telephony features such as voicemail, call forwarding, 3-way calling, caller ID, etc., plus access to a Web-based interface for additional enhanced features, e.g., scheduled call forwarding and Call Blast (an incoming call rings a number of devices simultaneously; also known as “simultaneous ring”). Standard user bundles also require purchase of sufficient trunks to support.	\$13.00 per User bundle
<b>Standard User with Bundled Phone</b> – Includes all features of Standard User plus a required Bundled Phone Option from the list of phones in the Bundled Phone Options list. <b>By its order of Standard user with bundled phone, Customer agrees to a minimum three-year Service Commitment Period for Virtual Comm (see No. 4, below).</b>	\$13.00 per User bundle
<b>Premier User</b> – Provides all the capabilities of Standard User, plus: Premier Users will receive a Mobile client and Soft-phone client (both described below). In addition, instant messaging capabilities are provided to enable Premier Users to chat with other Customer Virtual Comm Premier Users, see the status of other Premier Users (i.e., Busy, Available, On a call, In a meeting), or share what is displayed on their desktop through a web browser.	\$35.00 per User bundle
<b>Premier User with Bundled Phone</b> – Includes all features of Premier User plus a required Bundled Phone Option from the list of phones in the Bundled Phone Options list. <b>By its order of Premier user with bundled phone, Customer agrees to a minimum three-year Service Commitment Period for Virtual Comm (see No. 4, below).</b>	\$35.00 per User bundle

<b>Remote User</b> – May be ordered with either a Standard or Premier User. Allows a different 911 service address than the primary service address.		N/A
<b>Standard Trunk Capacity</b> – For Standard Users, Standard Trunk Capacity provides capability to make or receive calls outside of Customer’s enterprise. A trunk includes unlimited intra-enterprise VoIP calling (VoIP origination and termination within Customer’s enterprise), and unlimited local calling and unlimited long distance (LD). Calls to international locations can also be made but are billed at metered rates.		\$23.00 per trunk
<b>Fax Station User</b> – For end users at Premier locations, provides basic telephony capability which, when combined with a fax machine connected to a Verizon-supported analog telephone adapter configured with the G.711 or T.38 codec, enables end users to send and receive faxes.		\$10.50
<b>Key System Packages</b> – For Premier locations, key system packages are available as grouped line packages where all lines are associated with the same telephone number. Each line in the package shares a similar Premier feature set, and all devices assigned to the package display all the lines associated with the package. So, an inbound call can be answered by an end user from any device assigned to the key system package.	2 Line	\$72.00 per pkg
	4 Line	\$140.00 per pkg
	8 Line	\$265.00 per pkg
	12 Line	\$375.00 per pkg
<b>User Bundle and Trunk Terms and Conditions</b>		
<ol style="list-style-type: none"> <li>Verizon will not conduct any maintenance of any equipment (whether or not supplied by Verizon under these Terms of Service) nor conduct any troubleshooting at any end user site that is not Customer’s primary service address.</li> <li>Trouble tickets involving feature packages or remote users will be routed through Customer’s designated administrator, who will be provided a checklist of the minimum tasks to be completed prior to calling in a trouble ticket. All such trouble-ticket calls will be handled on a commercially reasonable basis.</li> <li>Customer must maintain its Standard Trunk User count for at least a 30-day period before requesting a decrease in such trunk count.</li> <li>If Customer disconnects Standard User with Bundled Phone or Premier User with Bundled Phone (either a “User Bundle” for purposes of this Section) prior to the completion of the applicable minimum three-year Service Commitment Period, Customer shall pay an early termination charge equal to the number of installed User Bundles times the number of months remaining in the minimum three-year Service Commitment Period times the User Bundle MRC. There may also be early termination charges applicable to the CPE being terminated. For Standard User with Bundled Phone, Verizon may waive early termination charges if Customer is upgrading to a Premier User with Bundled Phone and keeps the Premier User with Bundled Phone in service through the required minimum three -year term.</li> </ol>		

1.2 **Site Package Activation Charge.** Customer will pay an NRC of \$150.00 for each site it establishes. This charge includes the provisioning of the network-based features and includes one Auto Attendant, one Enhanced Call Queue, and access to the Web-based MySite administrator portal.

1.3 **CPE and Virtual Comm Equipment.** Customer will pay the following charges for CPE and Virtual Comm Equipment, as applicable:

1.3.1. **Rental Equipment (Virtual Comm Equipment)**

1.3.4.3 **Shipping Charges.** Customer will be charged for equipment shipping costs. Such costs will vary based on the quantity of the equipment ordered and destination. A good faith estimate of the shipping charge will be provided at the time of Customer's order.

1.3.5-4 **CPE Replacement.** After Virtual Comm implementation is completed for purchased equipment, if Customer experiences a Virtual Comm service issue during the equipment warranty period that is determined by Verizon to be due to a defective phone, Verizon will replace the phone with a phone of similar capabilities. Verizon will ship the replacement phone to Customer who must return the defective phone to Verizon within 14 calendar days after receiving the replacement. Verizon will provide return labels to Customer for use in shipping the defective equipment back to Verizon. If Verizon does not receive the defective phone within 30 calendar days of the date Customer received the replacement phone, Verizon will bill and Customer will pay the purchase price of the replacement phone.

1.4 **Optional Network Features.** Each Customer location will include a set of features as described above in Section 1.2 (Site Package Activation Charge). Customer will pay for additional optional network features at the following rates, which are fixed for the Service Term:

<b>Optional Network Features</b>	<b>MRC</b>
Auto Attendant	\$25/instance <sup>1</sup>
Hunt Group	\$10/instance
Enhanced Call Queue	\$15/instance
Stand-alone Voice Mail	\$6.00/instance
Stand-alone UC Features	\$8.00/instance
Receptionist <sup>2</sup>	\$36.00/configured user <sup>5</sup>
Tablet Client	\$1.25/configured user <sup>5</sup>
Mobile Client User <sup>3</sup> for Standard users	\$1.25/configured user <sup>5</sup>
Soft-phone Client User <sup>4</sup> for Standard users	\$1.25/configured user <sup>5</sup>
CRM Client	\$5.50/configured user
Instant Meeting Bridge	\$10.00/bridge (120-port capacity)
Call Recording	\$10.00/instance
Instant Meeting Moderator	\$15.00/configured user <sup>5</sup>
Call Center Agent	\$65.00/configured user <sup>5</sup>
Call Center Supervisor	\$85.00/configured user <sup>5</sup>
<a href="#">Migration Centrex</a>	<a href="#">\$15.00/configured license<sup>6</sup></a>
<a href="#">Migration HIPC</a>	<a href="#">\$0.00/configured license<sup>6</sup></a>
<a href="#">Migration PBX Large</a>	<a href="#">\$15.00/configured license<sup>6</sup></a>
<a href="#">Migration PBX Small</a>	<a href="#">\$20.00/configured license<sup>6</sup></a>
<a href="#">Migration Supplemental</a>	<a href="#">\$300.00/hour</a>
<p><sup>1</sup>With respect to the Auto Attendant feature, "instance" means each menu of options that a user may choose to access. Each separate listing of touch tone options presented to a user is considered a separate menu.</p> <p><sup>2</sup>Receptionist enables a configured user (e.g., an office receptionist) to monitor any or all of the end users who are provisioned with Virtual Comm accounts. Receptionist screens graphically display the monitored end users' status (i.e., busy, idle, do not disturb), as well as certain call information (e.g., name, number, session duration), and allows a Receptionist configured user to more efficiently process inbound calls to a Virtual Comm number.</p> <p><sup>3</sup>Mobile Client enables a configured user to install an application on his/her Android® or iOS®-based smartphone to utilize it as a Virtual Comm telephonic endpoint. Such configured users can configure their Virtual Comm services to receive inbound calls to their Virtual Comm number on their smartphone, or place outbound calls from their smartphone that present the caller ID of their Virtual Comm number to the called party. These calls may incur charges for use of cellular minutes or data services from the user's wireless provider. Such charges are the responsibility of Customer or the user, as applicable.</p>	

<sup>4</sup>.Soft-phone Client enables a configured user to use a Windows®-based or Mac®-based computer as a Virtual Comm telephonic endpoint. Such configured users can configure their Virtual Comm services to receive inbound-only calls, place outbound-only calls, or to enable both inbound and outbound calling.

<sup>5</sup>.For billing purposes, a user is a “configured user” when Verizon provisions the network feature and makes it available for assignment by Customer.

<sup>6</sup>.[For billing purposes, a user is a “configured license” when Verizon provisions the network feature and makes it available for assignment by Customer.](#)

1.5 **International Calling.** Virtual Comm may be used by Customer to complete international calls to the locations set forth in [Appendix I](#). These locations have been divided into four tiers with a per-minute rate designated for each tier. The following per-minute surcharges apply to PSTN calls which originate in the United States and terminate in the international locations specified for each tier:

Tier	Fixed Charge Per-Minute
A	\$.06
B	\$.10
C	\$.25
D	\$.50
